

## H1N1 – Coach Bill Snyder

### :30 H1N1 Vaccination TV PSA Script

**Coach Bill Snyder:** In football, there are many ways to defend yourself against the other team. But in life, your best defense against the H1N1 flu virus is vaccination.

**Coach Bill Snyder:** Healthcare workers and people in high risk groups are our first priority for vaccination. Those people, listed here, are the most at risk for severe illness and that's why it's so important that they be vaccinated first.

*The following high priority groups are listed on the screen:*

- *Pregnant women*
- *Caregivers of infants under 6 months*
- *People 6 months through 24 years old*
- *People 25-64 with high-risk medical conditions*

**Coach Bill Snyder:** This is no game. All Kansans should get the H1N1 vaccination. Call your doctor or visit [kdheks.gov](http://kdheks.gov) for more information.
