ACRONYMS AND ABBREVIATIONS.....x

CHAPTER I INTRODUCTION

A. History and Present Situation.....I-1
B. Statutory Authority and Charge.....I-1
C. Purpose and Intent.....I-1
D. Organization and Use.....I-2
E. Law and Regulations.....I-3
F. Other Resources.....I-3

CHAPTER II REPORTS, PLANS, AND SPECIFICATIONS

A. Procedures for Water Supply Project Approval.....II-1

1. Approval Steps.....II-1
2. Scope of Review.....II-4
3. Deviations/Modifications to KDHE Standard Approval Procedure.....II-4

B. Documentation requirements for Water Supply Project Approval.....II-5

1. Preliminary and Engineer's Reports.....II-5
2. Plans and Specifications (General).....II-5
3. Documentation Requirements for New Wells.....II-7
4. Water Sampling Requirements for New Sources (Surface Water and Wells).....II-9

CHAPTER III GENERAL FACILITIES CONSIDERATIONS

A. General Design Guidelines.....III-1

1. Alternative Solutions and Regionalization....III-1
2. Service Needs.....III-1
3. Design Periods.....III-1
4. Conservation.....III-2
5. New Processes, Methods, Chemicals, and Equipment.....III-2
6. Waste Handling and Disposal.....III-3
7. Costs and Financing.....III-3

B. Plant Siting Considerations.....III-3

1. Evaluation of Site Alternatives.....III-3
2. Plant Siting Restrictions.....III-4
3. PWSS and Pollution Sources.....III-4
4. Sanitary Survey.....III-4

C. Plant Layout and other Considerations.....III-5

1. Plant and Building Layout.....III-5
2. Materials of Construction.....III-5
3. Ventilation and Dehumidification.....III-5
4. Operation and Maintenance.....III-6
5. Automation.....III-6
6. Monitoring, Sampling, and Laboratory Requirements.....III-6
7. Emergency Plan.....III-6
8. Safety.....III-6
9. Contamination of Treated Water.....III-6
10. Disinfection.....III-7
11. Hydraulics.....III-7
12. Piping and Channels.....III-7

CHAPTER IV SOURCE DEVELOPMENT

A. Quantity Requirements.....IV-1

1. Flowing Sources.....IV-1
2. Impoundments.....IV-2
3. Wells.....IV-2

B. Quality Requirements.....IV-2

C. Surface Water - Resources and Other Requirements.....IV-2

1. Flowing Sources.....IV-3
2. Impoundments.....IV-4
3. Existing Lakes.....IV-5
4. Single Purpose Lakes.....IV-5
5. Multipurpose Lakes.....IV-7
6. Intake Structures.....IV-7
7. Off-Channel Reservoirs.....IV-9

D. Groundwater - Resource Facilities and Other Requirements.....IV-9

1. Sanitary Surveys.....IV-10
2. Location and Protection of Wells.....IV-11
3. Construction Criteria for Wells.....IV-13

4. Construction Criteria for Well Houses, Discharge Piping, and Appurtenances.....IV-22
5. Construction Criteria for Pitless Units and Related Appurtenances.....IV-27

CHAPTER V DESIGN OF WATER TREATMENT PROCESSES

A. Introduction.....V-1

B. Regulatory Summary of Treatment Requirements.....V-1

1. Scope of Review.....V-1
2. VOC Removal.....V-2
3. Fluoride Control.....V-2
4. Clarification and Disinfection or Microbial Removal and Inactivation.....V-3
5. Corrosion Control for Lead and Copper.....V-4
6. IOC and SOC Removals.....V-5
7. Radionuclide Removal.....V-5
8. DBPs Control and Removal.....V-6

C. Summary of Optional Treatment Requirements.....V-7

1. Introduction.....V-7
2. Softening or Hardness Removal.....V-8
3. Iron and Manganese Removal.....V-8
4. Hydrogen Sulfide Removal.....V-9

D. General Design Considerations.....V-10

1. General Criteria.....V-10
2. Permit Application.....V-11
3. Remaining Chapter Organization.....V-11

E. Presedimentation.....V-11

1. Basin Design.....V-11
2. Chemical Additions.....V-12
3. Presedimentation Criteria.....V-12

F. Rapid Mixing and Coagulation.....V-12

1. Requirement.....V-12
2. Location.....V-13
3. Rapid Mix Criteria.....V-13
4. Mechanical Mixers - Alum Coagulation without Softening Solids Recycle.....V-13
5. pH Criteria.....V-14
6. Softening Requirements.....V-14

G. Flocculation.....V-15

1. Requirement.....V-15
2. Exception.....V-15
3. Basin Design.....V-15
4. Detention Time.....V-16
5. Equipment.....V-16
6. Piping.....V-17

H. Sedimentation.....V-17

1. General Requirements.....V-17
2. Conventional Basin Criteria.....V-19
3. Solids Contact Basin Criteria.....V-21

I. Flotation.....V-24

J. Filtration.....V-24

1. Rapid Rate Gravity Filters.....V-25
2. Structural and Hydraulic Details.....V-26
3. Flow Control.....V-27
4. Filter Bottoms and Strainer Systems.....V-27
5. Filter Media.....V-28
6. Underdrain and Support Gravel.....V-30
7. Rate of Filtration.....V-30
8. Backwash.....V-31
9. Backwash Rate and Duration.....V-32
10. Backwash Equipment.....V-32
11. Surface Wash or Subsurface Wash.....V-33
12. Air Scouring.....V-33

K. Softening or Hardness Removal.....V-34

1. Requirement.....V-34
2. Related Criteria.....V-35
3. Lime Softening Process.....V-35
4. Lime-Soda Ash Softening Process.....V-36
5. Split Treatment.....V-36
6. Caustic Soda Softening.....V-37
7. Cation Exchange Process.....V-37

L. Stabilization.....V-40

1. Recarbonation of Softened Water.....V-40
2. Split Treatment.....V-41
3. Ion Exchange.....V-41
4. Polyphosphate.....V-41
5. Carbon Dioxide Reduction By Aeration.....V-41

6. Water Instability Due To Biochemical Action In the Distribution System.....V-41
7. Other Treatment.....V-41
8. Control of Stability.....V-41

M. Disinfection.....V-42

1. CT Requirements.....V-42
2. Groundwater (Excluding GWUI).....V-42
3. Surface Water and GWUI.....V-43
4. Ozonation.....V-46

N. Taste and Odor Control.....V-56

1. Requirement.....V-56
2. Chlorine and Chlorine Dioxide.....V-57
3. Hydrogen Sulfide Removal.....V-57
4. PAC.....V-57
5. GAC.....V-58
6. Potassium Permanganate.....V-58
7. Copper Sulfate.....V-59
8. Ozone.....V-60
9. Other Methods.....V-60

O. Iron and Manganese Removal.....V-60

1. Removal by Oxidation, Detention, and Filtration.....V-60
2. Removal by Manganese Zeolite (Greensand) Filtration.....V-62
3. Stabilization by Sequestration.....V-63
4. Removal by Zeolite Ion Exchange.....V-64
5. Removal by Line-Soda Ash Softening.....V-64
6. Testing Equipment.....V-65

P. Aeration and Air Stripping.....V-65

1. Types.....V-65
2. Protection of Aerators.....V-66
3. Disinfection.....V-66
4. Corrosion Control.....V-66
5. Aerator Design Criteria.....V-66

Q. Adsorption with GAC.....V-70

1. Design Basis.....V-70
2. Contactor Type and Number.....V-71
3. Media Requirements.....V-72
4. Materials of Construction.....V-72
5. Competitive Adsorption.....V-72

6. Water Stability.....V-72
7. Disinfection and Biological Activity.....V-72
8. Backwashing.....V-73
9. Regeneration of Spent GAC.....V-73

R. Removal of Trace Inorganic Contaminants.....V-73

S. Membrane Separation Processes.....V-74

1. Membrane Types.....V-74
2. Useful Life of Membranes.....V-75
3. Performance Evaluation of Membranes.....V-75
4. Pretreatment Requirements.....V-76
5. Bypass Water.....V-76
6. System Redundancy.....V-76
7. Cleaning the Membrane.....V-76
8. Post Treatment Requirements.....V-76
9. Instrumentation.....V-77
10. Waste Disposal.....V-77
11. Operator Training and Startup.....V-77

T. Fluoridation

1. Requirements.....V-77
2. Application Principles and Criteria.....V-78

CHAPTER VI WATER STORAGE TANKS

A. Primary Design Considerations

1. Types of Storage.....VI-1
2. Location.....VI-1
3. Materials.....VI-2
4. Foundation.....VI-2
5. Sizing.....VI-2
6. Roof and Sidewall.....VI-4
7. Overflow.....VI-5
8. Vents.....VI-5
9. Level Controls.....VI-5

B. Other Considerations.....VI-6

1. Access.....VI-6
2. Basins and Wet Wells.....VI-6
3. Drain.....VI-6
4. Fire Protection.....VI-6
5. Freezing.....VI-6
6. Grading.....VI-6
7. Internal Catwalk.....VI-6
8. Painting and/or Cathodic Protection.....VI-6

9. Safety.....VI-7
10. Security.....VI-7
11. Silt Protection.....VI-7
12. Disinfection.....VI-7
13. Pressure Tanks.....VI-8
14. Underground/Ground Level Reservoirs.....VI-8

CHAPTER VII PUMPING FACILITIES

A. General Requirements.....VII-1

B. Pumping Stations.....VII-1

1. Location.....VII-1
2. Facilities.....VII-1
3. Space Requirements.....VII-1
4. Equipment Servicing.....VII-2
5. Sanitary and Other Conveniences.....VII-2
6. Stairways and Ladders.....VII-2
7. Heating.....VII-2
8. Ventilation.....VII-2
9. Dehumidification.....VII-2
10. Lighting.....VII-2
11. Suction Wells.....VII-2

C. Pumps.....VII-3

1. Types.....VII-3
2. Selection Criteria.....VII-3
3. Number of Pumps.....VII-4
4. Desirable Operating Conditions.....VII-4
5. Pump Suction and Priming.....VII-4
6. Drives.....VII-4
7. Power Requirements.....VII-5
8. Well Pump Selection and Installation.....VII-5
9. Booster or High Services Pumps.....VII-5

D. Appurtenances.....VII-5

1. Valves.....VII-5
2. Piping.....VII-5
3. Gauges and Meters.....VII-6
4. Water Seals.....VII-6
5. Controls.....VII-7
6. Automatic and Remote Controlled Stations.....VII-7
7. Standby Power.....VII-7
8. Water Prelubrication.....VII-7

CHAPTER VIII DISTRIBUTION SYSTEMS

A. Basic considerations.....VIII-1

1. Quantity and Pressure.....VIII-1
2. Quality.....VIII-1
3. General Pipeline Location.....VIII-1

B. Protection Considerations.....VIII-2

1. Separation of Water Mains and Sewers.....VIII-2
2. Separation of Water Mains and Other Pollution Sources.....VIII-4
3. Cross-Connections.....VIII-4
4. Line Crossings.....VIII-5
5. Pressure.....VIII-6
6. Dead Ends.....VIII-6
7. Repairs, Replacements, and Extension of Mains.....VIII-6
8. Frost.....VIII-6
9. Plastic Pipes.....VIII-7
10. Pressure and Leakage Tests.....VIII-7
11. Thrust Blocks.....VIII-7
12. Valves.....VIII-7
13. Sanitary Precautions.....VIII-7
14. Disinfection.....VIII-8
15. Deposits and Corrosion.....VIII-8
16. Plumbing.....VIII-8

C. Materials and Installation.....VIII-8

1. Used Pipe.....VIII-8
2. Joint Materials.....VIII-8
3. Valves, Air Relief, and Blow-Off Chambers...VIII-9
4. Fire Hydrants.....VIII-9
5. Installation of Mains.....VIII-9

D. System Design.....VIII-10

1. Field Studies.....VIII-10
2. Computer Modeling.....VIII-10
3. Valve Spacing.....VIII-10
4. Valve Sizing.....VIII-11
5. Valve Location.....VIII-11
6. Metering.....VIII-11
7. Water Loading Stations.....VIII-12

CHAPTER IX CHEMICAL STORAGE, HANDLING, AND APPLICATION

A. Basic Considerations.....IX-1

1. Plans and Specifications.....IX-1
2. Application Points.....IX-1
3. Feed Equipment.....IX-1
4. Chemicals.....IX-7

B. Chlorine Gas Requirements.....IX-11

1. Chlorinator Specifications.....IX-11
2. Chlorine Containers.....IX-13
3. Chlorinator Piping.....IX-14
4. Testing Equipment.....IX-15
5. Respiratory Protection Equipment.....IX-16
6. Chlorine Feed and Storage Room Specifications.....IX-16

C. Other Chemicals.....IX-18

1. Hypochlorites.....IX-18
2. Acids and Caustics.....IX-19
3. Sodium Chlorite for Chlorine Dioxide Generation.....IX-19
4. Ozone.....IX-20
5. Anhydrous Ammonia.....IX-21
6. Lime Slurry.....IX-21
7. Powdered Activated Carbon.....IX-21
8. Polyphosphates.....IX-21
9. Polymers.....IX-21
10. Quicklime and Soda Ash.....IX-21

BIBLIOGRAPHY

APPENDIX A Listing of Selected Kansas Statutes and Regulations Pertaining to Public Water Supply

APPENDIX B Water Quality Testing for New Public Water Supply Sources

APPENDIX C Procedures for Pressure and Leakage Testing of Mains

APPENDIX D Water Main Disinfection Procedures
