

## **H1N1 –Asthma Patient Testimonial :30 Radio PSA**

**(Background music playing)**

**Asthma Patient:** I got the H1N1 vaccine because I have health risks, I have asthma.

For a person who has asthma to contract H1N1 it could lead to either hospitalization or even death.

Between missing work and office calls and medication, a vaccine is very inexpensive.

I would say if you like to breathe get the H1N1 vaccine.

**Announcer VO:** Stay healthy. Get vaccinated. A message from the Kansas Department of Health and Environment and this station.
