

H1N1 – Pregnant Woman Testimonial :30 TV PSA

(Background music playing)

Pregnant Woman: After talking with my doctor several times and doing some research on my own, I decided that getting the H1N1 vaccine was the best choice for myself.

I wanted to get Dylan vaccinated since he is so young, not only to keep ourselves safe, but to keep the new baby safe.

Being pregnant I knew I had more of a risk of getting really sick, so I knew that I needed to get the vaccination to keep myself healthy.

Announcer VO: Stay healthy. Get vaccinated. A message from the KDHE. Call or visit our web site for vaccine locations.
