Please contact Thomas Osborn at
tosborn@coffeyville.com or 620-252-6131
with any questions regarding the open house.
Refreshments will be served.

Brownfields are properties that may be impacted by potential polluted sites. The U.S. Environmental Protection Agency administers the Brownfields Program through funding to communities to identify, investigate, and clean up Brownfield properties.

You are invited to come learn about Coffeyville's Brownfields Program and the benefits to the City of Coffeyville and you.

Brownfield Cleanup Grant: The Start of Coffeyville's Biking Trail System

The Coffeyville Community Enhancement Foundation Brownfields Cleanup Project is planning construction of a community bike path along a former rail spur. The bike path associated with this grant will be "Phase 1" of a larger project with the goal to link several of the parks in our community.

Brownfield Property Assessments: Revitalizing Old Properties for New Growth

The City of Coffeyville has two Brownfields Assessment Grants for identifying and investigating potentially contaminated properties that can be revitalized for new development. These grants enable the city and landowners to work together in revitalizing the community and building new opportunities for growth.
