

APPENDIX D

Instructions on How to Obtain Source Classification Codes and Emission Factors

Compilation of Air Pollutant Emission Factors, AP-42, Fifth Edition, Volume I: Stationary Point and Area Sources (AP-42)

AP-42 is the EPA's compilation of air pollutant emission factors for both criteria and toxic emissions. AP-42 Volume 1 addresses hundreds of stationary point and area sources. The latest edition (Fifth edition), as well as all subsequent supplements and updates, can be accessed via EPA's CHIEF website at <http://www.epa.gov/ttn/chief/ap42/>.

FIRE (Factor Information Retrieval System)

FIRE is now available as an internet application. The *WebFIRE* application web site provides fast and complete access to EPA's air emissions factors information. *WebFIRE* replaces the software application, FIRE version 6.25 and the MS Access version of the database. The *WebFIRE* can be accessed via EPA's CHIEF website at <http://cfpub.epa.gov/oarweb/index.cfm?action=fire.main>.

Source Classification Codes (SCCs)

The list of point source SCCs was most recently updated in December, 2010. The list is available at http://www.kdheks.gov/emission/download/Source_Classification_Code.xls.
