30 Second PSA – Seasonal Flu

Man: Who needs the flu vaccine? You! People over 50 are at higher risk of getting complications from the flu. Protecting my friends and my family is why I get the flu shot. The flu vaccine is safe and effective. If you're older, like me, you need to get the flu shot and avoid the risk of deadly complications. The flu ends with you!

Narrator: Stay healthy. Get vaccinated. A message from the KDHE.
