12:00pm	Timeline Recap and Next Steps	Hareesh Mavoori / Andy Allison

Take-home “Assignment” / Request for suggestions:

Please refer to the handout with tentative strata and categories for your review and suggestions. The idea is for members to discuss these preliminary groupings and suggest alternatives as appropriate with the goal of coming up with standard classifications (if possible) to stratify the underlying populations for reporting the measures. It is understood that we may not have access to the source data to allow such stratification in some cases, but wherever possible, these classifications could serve as the standard guidelines for all four workgroups. We welcome any thoughts you may have so that we could continue to refine the categories.

The last slide also has the definition for a medical home (which is the focus of both the State Quality Improvement Institute initiative as well as legislation approved this session in Kansas). Members are requested to recommend ideas on measures related to medical homes.

Please email your ideas/suggestions to Laverta.Greve@khpa.ks.gov
