

List of total number of Eligible Professionals and Hospitals by provider type

At a minimum, the final survey instruments will take into account four major groupings of provider types as identified below:

1. Provider Practice level - this grouping would capture physician, nurse practitioner, physician assistants, certified nurse midwives, and dentists
 - a. 14,192
2. Hospital level – this grouping would capture all acute care hospitals, children’s hospitals, and institutes for mental disease/psychiatric hospitals;
 - a. 194
3. Nursing Home level – this grouping would be directed at nursing homes and assisted living facilities
 - a. 2,317
4. All Others level – this grouping would be directed at all other entities that could potentially install an EHR and who serve Medicaid beneficiaries – e.g. Community Mental Health Centers, etc...
 - a. 1,466
