**Please note that numbers below 5 are suppressed. Also note that numbers may slightly differ from previous years due to recent change in reporting hospital discharges.*

- In the Wichita area (Butler, Harvey, Sedgwick, and Sumner), during the period of 9 years (1999-2007), 789 hospital discharges were due to unintentional injuries among children and adolescents ages 0-14 years.
- Out of the 789 hospital discharges due to unintentional injuries among 0-14 years old, 3% of hospital discharges were among children < 1 years, 33% among children 1-4 years, 25% among 5-9 years and 37% among 10-14 years.
- About 38% of the total unintentional hospital discharges were due to motor vehicle traffic accidents. About 43 % of the total hospital discharges due to motor vehicle traffic accidents occurred among 10-14 years old and 28% of these hospital discharges occurred among 5-9 years.
- About 25% of the total unintentional injury hospital discharges among 10-14 years were due to poisoning and another 15% were due to struck by/ against.
- The hospital discharge data showed a need of injury prevention efforts.
