

To: Vaccines for Children (VFC) Providers
From: Timothy Budge, Immunization Program Section Chief
Date: February 4, 2015
Subject: 2015 VFC Provider Enrollment

Dear VFC Providers,

The Kansas Immunization Program (KIP) staff wishes to express our gratitude and appreciation for your service to the VFC program. Participating in the VFC Program represents your dedication to providing immunization services to children who otherwise might not receive protection from vaccine preventable disease.

The 2015 VFC Enrollment Form will be found on iV-4 (our new contact management system!). We hope you'll like the New Online Enrollment Process! See link below for Registration and Enrollment:

www.contactkswebiz.info

Please see the attached "Instructions for Registration and VFC Enrollment.pdf" for further guidance.

The Centers for Disease Control (CDC) requires that all immunization programs across the nation use the same Provider Agreement and Profile forms for the 2015 VFC enrollment. If you are a Direct Entry Provider into KWebIZ please see the attached "VFC Category Patient Count Report and Your 2015 VFC Enrollment.pdf" for further guidance.

Please complete the Online Enrollment by March 6, 2015, no exceptions! Timely completion and submission of your enrollment will assure your clinic of uninterrupted vaccine delivery.

Important VFC program information for the 2015 VFC Enrollment!

1. Dependent on our next KWebIZ upgrade all VFC providers are allowed to order vaccine as needed.
Note: Vaccine orders must meet the four validations in order to be processed.
2. It is imperative that you familiarize your clinic with the 2015 Policy and Procedure forms! Please visit our website within the next 48 hours to view the 2015 forms at:

http://www.kdheks.gov/immunize/imm_manual_pdf/index.html

KIP appreciates the stewardship each provider continues to demonstrate in assuring that VFC vaccines are managed appropriately so that each child is immunized with uncompromised vaccine. Your hard work and commitment to keeping children healthy and free of vaccine preventable disease is admirable.

Thank you!
