PREVENT LOSS FROM EXPIRED VACCINES!!

Check and rotate your stock to assure shortest dated vaccine is used first. (Post vaccine expiration date table.)

Notify the state Immunization Program if vaccines are going to expire within 3-6 months.

CHECK AND RECORD REFRIGERATOR AND FREEZER TEMPERATURES TWICE A DAY

- Once in the am when the practice opens.
- Once in the afternoon to allow for adjustments prior to the time the practice closes.

What to do if a power failure occurs, the refrigerator door was left open, the temperature was too cold, the refrigerator plug was pulled, or any other situation which would cause improper storage conditions:

1. Close the door and/or plug in the refrigerator/freezer.
2. Record the current temperature of the refrigerator/freezer.
3. Store the vaccines at appropriate temperatures. Make sure that the refrigerator/freezer is working properly or move the vaccines to a unit that its. Do not automatically throw out the affected vaccine.
4. Collect essential data on the reverse side of this sheet and notify the state health department.
5. **Call all manufacturers of affected vaccine(s) (see table on the backside) and ask to speak to medical advisor.**
