

How Do I Register?

Registration for WebEOC is through a KDHE-IT hosted secure portal. All registrants must be approved by a WebEOC project manager. Once they are approved, they will receive an e-mail with the username and password.

If you would like to register in WebEOC, go to the following web address: <https://kanphix.kdhe.state.ks.us/>. If you are a new user, click on the "Register" link on the left-side of the page. If you are already a KANPHIX user, click on the "Public Portal" link and then select "Request Additional Applications."

Click on the WebEOC link on the left-side of the page.

As the state's environmental protection and public health agency, KDHE promotes responsible choices to protect the health and environment for all Kansans. Through education, direct services and the assessment of data and trends, coupled with policy development and enforcement, KDHE will improve health and quality of life. We prevent illness, injuries and foster a safe and sustainable environment for the people of Kansas.

Health and Medical Disaster Response

Web-based Emergency
Operations Center

WebEOC

Web-based Emergency Operations Center

What is WebEOC?

Web-based Emergency Operations Center (WebEOC) is an online forum that acts as a virtual Emergency Operations Center for public health and emergency preparedness and response partners. WebEOC serves as an interactive hub of near to real-time information that is available to be shared with partners across the state. While WebEOC was originally designed to be used during an incident, the ability to quickly and easily access and share information makes it ideal for day-to-day usage, too.

WebEOC Features

- Multi-incident viewing
- Quick sharing of information
- Shared boards with emergency management
- Customizable boards for Kansas
- In-house board development
- KDHE Help Desk Support

WebEOC Boards

The following boards are currently available in WebEOC:

- Activity Log
- Significant Events
- Situational Awareness
- HAVBED
- Resource Request Form
- Meeting Notes

The WebEOC project management team will continually be working on and adding new boards to enhance user functionality and utilization.

Additionally, the KDHE-hosted WebEOC is integrated with the Kansas Division of Emergency Management's WebEOC. This will ensure that health and medical partners will have access to relevant information from the KDEM WebEOC and vice versa. KDEM information can be viewed from within the KDHE WebEOC system, so users will only have to have one WebEOC username and password.
