Narrator:

If your home was built before 1978, you may have a hidden danger lurking all around you... lead-based paint.

Think your older home is safe? Think again. Old lead based paint is poisonous.

Accidently ingested it can cause learning disabilities, as well as organ and nervous system damage.

If you care about your family’s health, get the facts about lead based paint.

Call or visit kansashealthyhomes.org.

(Various Scenes from shoot)

We see a family participating in activities like eating, watching TV, studying, mowing the lawn, playing on the porch, etc.

They are unaware of the danger lurking all around them.
