

WARNING

Dry sanding and dry scraping of paint in dwellings built before 1978 is dangerous!

The improper removal of old paint is a significant source of lead dust and the primary cause of lead poisoning:

Renovators you are required by law to notify owners and occupants of the hazards associated with lead paint before you do work!

Homeowners information is available to you free of charge to help you deal safely with lead paint in your home:

Ask this retailer for a free publication that explains the dangers of lead in paint and how to reduce your risk of lead poisoning.
