

Question	Answer
<p>What do I do when I can't find the formula in the dropdown list of Formula Names on the Health Interview?</p>	<p>The Formula Name dropdown list does not include:</p> <ul style="list-style-type: none"> • Formulas not approved for issuance in Kansas. • Unusual formulas that are approved for issuance, but no food packages are set up in KWIC yet.  <p>If the infant is taking a formula that is not approved in Kansas, select the similar Kansas-approved formula, i.e. the formula you expect to issue. Then document on the Notes screen the name of the formula the infant is actually taking.</p> <p>If it is an unusual formula that is approved, but not in the list, just enter the base food package formula - Similac Advance and document the actual formula in Notes. Call the State Agency as soon as possible to get the needed formula entered into the system, so checks can be printed.</p> <p>Remember that you can see if a formula is approved by the Kansas WIC Program by checking Appendix 1 of the PPM, <i>Formula Manufacturers and Products</i>. http://www.kdheks.gov/nws-wic/PPM Table of Contents.htm</p>

Question	Answer
<p>Do I need to record historical formula information for children on the Health Interview screen?</p>	<p>No. The formula fields on the Health Interview screen only need to be completed if an infant or child is currently consuming formula.</p> <p>If there is a reason to record historical formula information for a child, document it on the Notes screen. For example, a child was consuming Pediasure, but has recently been transitioned to foods and no formula. That would be a significant item to record in a note. But there is no reason to enter anything in the formula fields on the Health Interview screen.</p> <div data-bbox="678 802 1414 1255" style="border: 1px solid black; padding: 5px;"> <p>Gomez Addams DOB</p> <p>Client ID 1061481 WIC Category C Status Active</p> <p>Health Interview ATOD Health Concerns</p> <hr/> <p>Feeding</p> <p>Breastfed Stopped Breastfeeding</p> <p>Date BF Stopped 07/08/2005</p> <p>Formula Type <input type="text"/></p> <p>Formula Name </p> <p>Formula Consumed per day ounces</p> </div> <p>If you unintentionally enter something in the Formula Type field, just delete the entry. Otherwise, KWIC will require that you enter Formula Name and Formula Consumed per day.</p>
