Policy Recommendation:

To comply with Kansas State Statute 72-5201, school children (K-12) should receive annual school-based dental screenings. The KDHE Bureau of Oral Health has designed oral health screenings that assist schools in meeting this statutory requirement. KDHE screenings identify the presence of decay, previous dental experience (fillings and/or sealants), infection, swelling and pain. Parents are notified of the screening results and those with dental treatment needs are referred to local dentists for care. It is recommended that school nurses monitor these referrals to insure that children receive the care they need. School screenings are not a substitute for an examination by a dental professional and it is recommended that all children have a dental home that provides regular, comprehensive dental care. Aggregated data from the KDHE school screening program provides the state with information about the burden of oral disease among Kansas school children.

Watch our video on the school screening program [click here](#).

Rationale:

- Oral health care is a critical component of good health.
- Tooth decay is the most common chronic childhood disease, five times more common than asthma. Untreated tooth decay can lead to pain and suffering; affecting a child’s ability to eat, speak, and focus in school, resulting in absenteeism and affecting the ability to learn.
- School screenings provides parents with information about their children’s oral health and the importance of regular dental treatment.
- School screening data allows the state to identify areas with high levels of dental disease. Preventive interventions can be implemented in these targeted areas to improve the oral health of Kansas school children.

Standards:

1. KDHE school dental screenings are performed by local volunteer dentists or dental hygienists. School nurses organize dental screening programs using local volunteers. KDHE Bureau of Oral Health staff can assist schools with setting up screenings and recruiting screeners. Contact the KDHE Bureau of Oral Health at 785-296-5116 or email kboh@ks.gov for assistance.
2. KDHE screeners all use the same screening protocol. Dental screeners complete a calibration training found through KS-TRAIN, [http://ks.train.org](http://ks.train.org), Course #1029736. This assures all screeners are screening in the same standardized manner. (Two hours of dental continuing education will be given upon successful completion of course.)
3. Prior to screening day, parents are notified that their child will have a dental screening. Individual signed permission slips are not required for screenings, but parents/guardians must
have the opportunity to opt their child out of the school screening by notifying the school. Sample notification forms can be downloaded from [http://www.kdheks.gov/ohi/screening_program.htm](http://www.kdheks.gov/ohi/screening_program.htm) or found in Appendix III.

4. Dental screenings should be performed on an annual basis.

5. Sample KDHE screening forms may be downloaded from [http://www.kdheks.gov/ohi/screening_program.htm](http://www.kdheks.gov/ohi/screening_program.htm) or found in Appendix II.

6. Aggregated school screening data should be entered by the school nurse or the screeners into the web-based school screening database. Instructions on how to access to the database is posted at [http://www.kdheks.gov/ohi/download/screening_initiative/To_Submit_Dental_Screening_Data.pdf](http://www.kdheks.gov/ohi/download/screening_initiative/To_Submit_Dental_Screening_Data.pdf)

7. Oral screening findings should be documented in each student’s individual health record.

8. All parents/guardians should be sent notification of their child’s screening results. A sample form can be found on [http://www.kdheks.gov/ohi/screening_program.htm](http://www.kdheks.gov/ohi/screening_program.htm) available in English and Spanish, or in Appendix IV.

9. School nurses should monitor the dental referral through completion, providing assistance to the student’s parent/guardian based on available resources. Suggestions for locating dentists or dental services can be found in Appendix I or at [www.kdheks.gov/ohi/health_care_assist.htm](http://www.kdheks.gov/ohi/health_care_assist.htm).

10. Strict patient confidentiality measures should be implemented during the screening process based on the requirements of the Family Educational Rights and Privacy Act (FERPA) and/or the Health Insurance Portability and Accountability Act (HIPAA).

### School Preparation:

1. Work with the appropriate persons within the school to coordinate the screening activity.

2. The process for coordination with school administrators and teachers varies among schools. Work with the school staff so the screening process is as minimally intrusive as possible to the student’s school day. Screening can be done at any time during the day but remind teachers that it is important for students to refrain from eating immediately prior to the screenings.

3. Determine who will be entering the school screening data into the KDHE web-based entry system. Review the procedure at [http://www.kdheks.gov/ohi/screening_program.htm](http://www.kdheks.gov/ohi/screening_program.htm), and contact the Bureau of Oral Health (kboh@ks.gov) to gain access to the database.

4. If you are a screener, make sure you have completed the Screener training at [http://ks.train.org](http://ks.train.org).

5. To use screening time at the school most effectively, prepare forms for recording the results of the screening for each student in advance.

6. An “assistant” such as a parent volunteer may accompany the screener to document the findings. If this process is used, keep in mind that the screener is responsible for ensuring that the documentation is accurate, and confidentiality is maintained.

7. Gather all materials needed to conduct the oral screening: gloves, face masks, hand sanitizer, tongue blades, cotton tip applicators, flashlight and any other optional supplies (i.e. toothbrushes). If you need assistance in obtaining supplies, contact the Bureau of Oral Health at kboh@ks.gov.

8. A small table will be needed to hold the supplies and to use as a writing surface while documenting the screening findings. Place a chair at each end of the table to be used for the child or screener to sit in while screening (screener’s preference). The screener may find it easier to screen the younger children from a seated position and stand while screening older students.
9. Have an appropriate receptacle available to discard disposable items used during the screenings. During a routine dental screening there is NO anticipated screener contact with mucous membranes, blood, and/or saliva. However, universal precaution recommendations will be used, and gloves, masks and tongue depressors will be used and disposed of in between every child.

10. To assist with the flow of students, you may wish to have a teacher, staff assistant or parent volunteer supervise the students waiting to be screened.

11. Prior to screening, students should be given an explanation and a demonstration of the dental screening process. Explain to the students that a form with their dental screening results will be sent to their parent/guardian.

12. Students can be lined up one after another during a class screening. Make sure that there is enough room between the child being screened and the next child to ensure privacy. The student who is being screened should have his/her back to the other students during the screening.

13. It can be helpful to have a line marked on the floor for waiting students to stand behind and a spot marked for the students to stand on during the screening. Masking tape works well.

**Screener Procedure:**

1. Ask the student to step forward for the screening. As the student is coming forward observe the symmetry of the face and neck; inspect the extraoral tissue (lips, cheeks, and neck).

2. Ask the student if anything in his/her mouth hurts or concerns them.

3. If a student states they have oral problems discuss with the student the symptoms he/she has and the duration of the symptoms.

4. Inspect the intraoral tissues (lips, cheeks, teeth, tongue, palate, and gums). Look for bleeding, decay, infection, redness, swelling, sores and/or lesions.

5. Determine the appropriate treatment urgency code for the student using the Kansas School Screening Calibration Coding System. The treatment urgency code is the screening category that will be reported to the student’s parent/guardian.

6. Make sure the screening data is properly recorded on the forms available at [http://www.kdheks.gov/ohi/screeningプログラム.htm](http://www.kdheks.gov/ohi/screeningプログラム.htm) or in the Appendix.

**Paperwork:**

1. Document oral screening findings in the student’s individual health record and complete the screening results form to be sent to the student’s parent/guardian (see sample form in Appendix). If approved by your school district a copy of the sample form completed for the student may serve as documentation for the student’s individual health record.

2. Efforts should be made by the school nurse to assist parents/guardians with referral completion. Suggestions for locating dentists or dental services can be found at [www.kdheks.gov/ohi/health_care_assist.htm](http://www.kdheks.gov/ohi/health_care_assist.htm).

3. Aggregate the individual screening data onto the School Total Tally Sheet. This sheet can easily be transferred to the KDHE Web based data entry system that provides the information to KDHE.

4. Let KDHE know if there are any problems or suggestions for improvement. Contact us at [kboh@ks.gov](mailto:kboh@ks.gov).
Considerations for the School Health Team

Children learn best when they are healthy, and yet one of the most overlooked and most important ingredients is oral health. Oral health includes the natural development of children's teeth and gums from primary to permanent teeth as well as freedom from dental decay, broken and missing teeth, and unsightly smiles. Poor oral health can lead to failure to thrive, inability to concentrate and learn because of pain, misbehavior and infections that can lead to absences, severe systemic illnesses and even death.

The KDHE Bureau of Oral Health suggests the following oral health resources for school nurses, teachers, parents and students. The resources may be used as part of the formal health education curriculum or as part of presentations for small groups. If you have questions about this or other information please call the BOH at kboh@ks.gov or (785) 296-5116.

Oral Health and Learning: When Children's Oral Health Suffers, So Does Their Ability to Learn - This fact sheet describes the relationship between acute dental problems and learning in children. It discusses lost school time, restricted activity days, learning problems, impaired speech development, reduced self-esteem, and inability to concentrate. It describes programs for improving oral health, including those funded by Maternal and Child Health Services Block Grants to States. This fact sheet was produced by the National Maternal and Child Oral Health, Resource Center under its grant (1H47MC00048) from the Maternal and Child Health Bureau, Health Resources and Services Administration, U.S. Department of Health.

Pediatric Oral Health Learning Modules
A series of seven self-contained online modules designed to assist health professionals in managing the oral health of infants and young children, produced by the National Maternal and Child Oral Health Resource Center.

P.A.N.D.A.
P.A.N.D.A. is an acronym for Prevent Abuse and Neglect through Dental Awareness. This is an educational program to help dental professionals and others recognize and report suspected cases of child abuse and neglect.

Dental Home/Safety Net Clinics

- If you are looking for a referral to a dentist in your area, contact the Kansas Dental Association at 785-272-7360 or www.ksdental.org.

- If you are looking for a dental provider that is enrolled in the Medicaid program, use the link to the KMAP website below and click on “Find A Doctor” and search for “Dentist” under provider type. https://www.kmap-state-ks.us/Public/Beneficiary/default.asp

- If you have child that may be eligible for HealthWave or Medicaid, dental care will be covered with their medical benefits. Information about these programs is available at: http://www.kancare.ks.gov/ or http://www.insurekidsnow.gov

- If you are looking for help in finding low cost orthodontic care, you may contact the Virginia Brown Foundation at http://www.smileschange.lives.org. Another foundation that will help children receive orthodontic services is Smiles for a Lifetime, www.S4L.org. Kansas is also a pilot state for Donated Orthodontics Service Program and the application can be located at: http://www.isortho.org/LinkClick.aspx?fileticket=W0TworohGDE%3d&tabid=71

- If you have limited resources, some safety net clinics will provide dental care at reduced costs based on your income. Kansas Clinics with dental services are listed in the following table:

**Total:**

---

*This form is used to screen for oral health needs among students and may be used by school health personnel to identify children who may need additional dental care.*

*Images of school supplies such as toothbrushes, toothpaste, and floss are depicted on the form.*

*The form is designed to be filled out during a dental screening session.*

*The form includes spaces for notes and comments to track progress and identify potential risks.*

*Children are assessed based on their oral health status, including the presence of untreated decay, treated decay, and sealants.*

*Code 1 indicates the absence of decay and problems, Code 2 identifies patients needing sealants or preventive treatments, Code 3 recommends dental check-ups, and Code 4 highlights urgent care needs.*

*The form is designed to be used with Delta Dental and the Department of Health and Environment to support oral health initiatives in Kansas.*

*For more information, contact Delta Dental or visit [their website](https://www.deltadental.org).*

Parent/Guardian Notification

Notification can be done a number of ways here are a few examples but it is not all inclusive.

1. Form can be sent home to each student (see example below)

2. Email blast can be done notifying parent/guardian attaching form (see example below)

3. Announcement can be made on your school district or school website stating the dental screenings will be conducted in compliance with Kansas State Statute 72-5201. Please contact your school nurse if you wish to have your child opt out of the screening.

4. Can be present in your student handbook that is available to all parents stating that during the school year Hearing, Vision, and Dental screenings will be conducted. If you have any question or concerns please contact your school nurse.
Parent/Guardian Notification

USD ____ will be providing a free dental screening to all students enrolled in ____ in compliance with Kansas State Statute 72-5201. All students will be screened unless the parent/guardian does not want the child to participate. Oral health is an important part of children’s overall health, and is a critical component in the child’s ability to learn and succeed in school. If you wish to opt out of the screening, please fill out and return the form at the bottom of the page. If your child does participate, a copy of the results of the screening will be sent home with the child.

If you have questions feel free to call me at school __________________ or by e-mail at __________________. Thank you for your cooperation!

Sincerely,

USD ____ School Nurse

_____ I do not wish to have my child participate in the free dental screening.

Student ___________________________ Grade____________

Toolkit

USD________ está proveyendo una evaluación dental gratuita a todos los estudiantes inscritos en ___. En cumplimiento con el Estatuto Estatal de Kansas 72-5201, todos los estudiantes del distrito serán examinados salvo que los padres no deseen que su hijo participe en la evaluación. La evaluación se realizará en la escuela de su hijo y será gratuita. La salud bucal es una parte importante de la salud general de los niños, y es un componente crítico de su capacidad de aprender y tener éxito en la escuela. Si desea no formar parte del proceso de evaluación, por favor complete y devuelva el formulario en la parte inferior de la página. Si su hijo participa, se enviará una copia de los resultados de la evaluación a casa con el niño.

Si tiene alguna pregunta, sientase libre de contactarme en la escuela o por correo electrónico a _____________________________ Gracias por su cooperation.

Atentamente,

______________________________

Nombre, R.N.
USD________ Enfermera Escolar

______ No quiero que mi niño/a participe en la evaluación dental gratuita.

Estudiante: ____________________________ Curso: ________
Screening Results

Child’s Name____________________________________________________________

Dear Parent or Guardian,

Your child has received a dental screening at school today. The results of the screening indicate that:

(Check all that apply)

____ Your child has no obvious dental problems.

____ Your child should be evaluated for preventive care (cleaning) or sealants.

____ Your child appears to have some dental problems which should be evaluated by a dentist. Please make an appointment at your earliest convenience so that your child can receive a complete examination. Your dentist will determine what, if any, treatment is needed.

____ Your child appears to have an **URGENT** dental need. Please contact a dentist as soon as possible for a complete examination.

A screening is not a comprehensive clinical examination. No x-rays were taken and the screening does not replace an in-office dental examination by your family dentist. All children need to have regular routine care by a dental professional.

Additional

Comments:____________________________________________________________________________
_____________________________________________________________________________________
_____________________________________________________________________________________

Parent: Please take this referral to the dentist if it is recommended above. Return to the school nurse with dentist’s signature when work is completed.

Resultados de Examen Dental

Nombre del Niño__________________________________________________________

Estimado Padre o Tutor,
Su hijo ha recibido hoy un examen dental en la escuela. El resultado del examen indica que:

(Marcar todos los que correspondan)

_____ Su hijo no tiene problemas dentales obvios .

_____ Su hijo necesita cuidado preventivo de rutina y/o sellado dental.

_____ Su hijo parece tener algunos problemas dentales que deberían ser evaluados por un dentista. Por favor haga una cita en cuanto pueda de forma tal que su hijo pueda recibir un examen completo. Su dentista determinará si es necesario algún tratamiento.

_____ Su hijo parece tener una necesidad dental urgente. Por favor contacte un dentista en cuanto pueda para un examen completo.

No se tomaron rayos X y el examen no reemplaza un examen dental en el consultorio del dentista de su familia. Si no tiene un dentista familiar y necesita ayuda para obtener cuidado dental, pedir a la enfermera de la escuela.

Comentarios Adicionales___________________________________________________

________________________________________________________

Padre: Por favor lleve este referido al dentista si en esta nota se le recomienda que lo haga. Devolver a la enfermera escolar con la firma del dentista cuando se ha completado el trabajo.

________________________________________________________

Nombre del Niño

Firma del Dentista                  Fecha
