COMMUNITY-BASED PRIMARY CARE CLINIC GRANTEES
State Fiscal Year 2017 Fact Sheet

The Community-based Primary Care Clinic (CBPCC) program helps make primary medical and dental care, prescription drugs and preventive health care services accessible and affordable to underserved Kansans. Over $7 million in state general funds were awarded to thirty-nine clinics across the state. The following information was compiled from the SFY 2017 CBPCC applications.

Clinic Locations (39 Counties)

Clinic Types

- 17 FQHCs
- 8 free clinics
- 1 local health department
- 5 Medicare-certified rural health clinics
- 8 non-federally qualified health centers

Building Community Partnerships

Clinic Collaborative Relationships with Others

Every clinic has a collaborative relationship with the health department and local hospital.

Vast majority of clinics have relationships with other local clinics and practices, as well as the mental health center.

Many clinics have relationships with other organizations including local businesses, churches, nonprofits, and government agencies.

Assessing the Community Needs

Status of Community Health Needs Assessment progress as reported by clinics

Top Community Health Priorities Identified

1. Access to quality, affordable healthcare
2. Access to mental health services
3. Obesity and physical activity
   Chronic disease prevention
   Access to dental care
Quality and Clinical Services

In addition to providing general primary care services, 53% of grantees receive funding to support dental/oral health services and 66% to support prescription assistance. More than 90% of grantees provide chronic disease management and offer preventive care, including immunizations.

All grantees report annual quality measures and are expected to conduct quality improvement (QI) activities annually. Grantees’ areas of focus ranged from the adoption of electronic health records and/or the patient-centered medical home model to improving patient registration/appointment process and increasing patient satisfaction.

“Our clinic focused on eliminating the amount of time between the [patient assistance] application and the patient receiving medications by creating a common guideline for patients for the application process.”

“[The clinic] now has access to the electronic medical record systems of both hospitals in the community, which provides assistance in reviewing a patient’s visits to emergency rooms and specialists.”
