COMMUNITY HEALTH NEEDS ASSESSMENT
TOP HEALTH PRIORITIES
1. Access to healthcare services
2. Access to dental health services
3. Access to mental health services

ADDRESSING COMMUNITY HEALTH PRIORITIES
“To increase awareness of healthcare services available, Konza now creates and distributes newsletters highlighting services and resources available within the community. These newsletters are handed out at the clinics, community coalition meetings, health fairs, etc. to increase awareness of services offered.”

COLLABORATION EXAMPLE
“After the Local Health Department's funding was reduced, Konza’s main clinic is now where WIC services are provided. Konza has also established a Family Planning Program on-site at the main clinic to provide these services that were previously available through the health department.”

COMMUNITY PARTNERSHIPS
HOSPITAL “has collaborative relationships in place and community support from health care providers resulting in maximizing available health care resources while avoiding duplication of services...”
HEALTH DEPARTMENT “work collaboratively with Geary and Riley County Health Department to maximize services available to target population...”
MENTAL HEALTH CENTER “collaborative relationships with the local mental health providers, the largest being Pawnee Mental Health”
PRIVATE PRACTICES “collaborates with community private practice health care providers, dentist and the Geary County USD 475 school district to maximize available health resources by avoiding duplication of services...”

CARE COORDINATION & PATIENT-CENTERED MEDICAL CARE
“Konza continues to provide high quality, comprehensive health care (that includes dental and mental health services) to the medically underserved population of Geary County and the surrounding area through care coordination and collaboration with other providers to maximize resources. This collaboration has increased during this past grant year to ensure services previously provided by the Health Department are still available to meet the health needs of our community.”

USING GRANT FUNDS TO IMPROVE PATIENT CARE
“Community Based Primary Care Clinic (CBPCC) funds are extremely important and are a critical component that enhances Konza’s ability to provide high quality, comprehensive health care (that includes dental and mental health services) to the medically underserved population of Geary County and the surrounding area (including Riley County). CBPCC funds will be used for salary support for 2 Nurse practitioners, 1 Radiology Technician and 1 RN for the immunizations clinic...”
