KANSAS TEENAGE PREGNANCY REPORT

The Kansas Department of Health and Environment (KDHE) annually publishes a teenage pregnancy report, summarizing data collected from vital records on stillbirths, abortions, and live births. The total of these three components represents the number of pregnancies. This document contains overall state teen pregnancy count and rate data, as well as teen pregnancy information by age group and county of residence.

List of Tables

Teenage Pregnancies by Number and Rate for Mothers Under 20, Kansas Residents, 1995-2004

Teenage Pregnancies for 10-19 Year Olds by Component and by Peer Group, by County of Residence, Kansas, 2004

Teenage Pregnancy Rates (10-14, 15-19 years of age) by County of Residence, Kansas, 2000-2004

Teenage Pregnancy Rates (10-19 years of age) by County of Residence, Kansas, 2000-2004

Technical Notes

Abortion (induced termination of pregnancy): The purposeful interruption of pregnancy with the intention other than to produce a live-born infant or to remove a dead fetus and which does not result in a live birth. [K.S.A. 65-2401 (4)]

Stillbirth: Any complete expulsion or extraction from its mother of a product of human conception, the weight of which is in excess of 350 grams, irrespective of the duration of pregnancy, resulting in other than a live birth, and which is not an induced termination of pregnancy. [K.S.A. 65-2401 (3)]

Live Birth: The complete expulsion or extraction of a product of human conception from its mother, irrespective of the duration of pregnancy, that, after such expulsion or extraction, shows any evidence of life such as breathing, heartbeat, pulsation of the umbilical cord, or voluntary muscle movement, whether or not the umbilical cord has been cut or the placenta attached. [K.S.A. 65-2401 (2)]

Residence Data: Residence data is information compiled according to the usual residence regardless of where the event occurred (including events occurring out-of-state).

Teenage Pregnancy Components: A live birth, stillbirth, or abortion occurring to a female under 20 years of age.

Teenage Pregnancy Rate:
$$\frac{\text{live births, stillbirths, abortions for females in a specific age-group}}{\text{female population in a specific age-group}} \times 1,000$$

Population:

U.S. Census Bureau population estimates and counts were obtained on the Internet at:

<http://www.census.gov/>

2002-2004 female age-group county population estimates were compiled by the U.S.

Census Bureau as of July 1 of each year.

2000 female age-group county population counts were compiled by the U.S. Census Bureau as of 4/1/2000.

2001 female age-group county population estimates were compiled by the Kansas Department of Health and Environment based on the 2000 Census counts.

Peer Groups:

For various demographic studies, it is useful to consider groups of counties with similar characteristics. "Peer Groups" of counties, as used in this summary, are defined as those with similar population density based on their 2000 actual census counts. In order to facilitate a time series

comparison, the assignment of counties to their peer group remains unchanged until the next decennial census. They will not necessarily have similar values for any other indicators. Frontier counties are defined as those with less than 6.0 persons per square mile, Rural counties as those with 6.0 - 19.9 persons per square mile, Densely-Settled Rural counties as those with 20.0 - 39.9 persons per square mile, Semi-Urban counties as those with 40.0 - 149.9 persons per square mile, and Urban counties as those with 150.0 or more persons per square mile. These definitions originated with the Kansas Department of Health and Environment, [Office of Local and Rural Health](#), and should *not* be confused with the U.S. Census Bureau's (USCB) definitions of urban and rural areas. Sources for calculation of population densities are population figures from the 2000 U.S. Census and land areas from the 2000 U.S. Census.

Counties are grouped in population density peer groups as follows:

Frontier	Trego	Pratt	Labette
Barber	Wallace	Republic	McPherson
Chase	Wichita	Rice	Neosho
Cheyenne		Rooks	Osage
Clark	Rural	Russell	Pottawatomie
Comanche	Anderson	Scott	Seward

Rate Reliability:

Vital statistics are easily influenced by random variation, and single-year rates can fluctuate from year to year. A multiple-year rate, such as a 5- or 10- year average of single-year rates, would be

more accurate in formulating conclusions on vital events. For example, between 2000 and 2004, the teenage pregnancy rate for Kansas varied from 26.1 to 30.3 teenage pregnancies per 1,000 10-19 female population. The 2000-2004 5-year teenage pregnancy rate was 28.0. The 5-year rate smoothes some of the variation in single-year rates and would be a more reliable indicator of teenage pregnancy rates in Kansas.

Rates based on a small or large number of events in a sparsely populated area can vary widely. To exemplify the variation that may occur with a small change in the number of events, in 2004, Wallace County had one of the lowest 10-19 female populations in Kansas at 124 and Sedgwick County had the highest at 33,000. With one teenage pregnancy occurring in Wallace County in 2004, the 10-19 teenage pregnancy rate was 8.1; whereas 1,078 teenage pregnancies occurring in Sedgwick County resulted in a teen pregnancy rate of 32.7 per 1,000 10-19 female population. If five more teenage pregnancies had occurred in each county, Wallace County's teenage pregnancy rate would have increased to 48.4, while Sedgwick County's rate would have increased only slightly, to 32.8 teenage pregnancies per 1,000 10-19 female population. Therefore, one must use caution when comparing rates of vital events between counties of significantly different population sizes to avoid misleading conclusions.

Unknowns:

County of residence is collected for all vital events that occur in Kansas. However, some states that share vital event data with Kansas may not collect the county of residence. This is the case with several states that collect abortion data. Those pregnancy outcomes will be reported as unknown and are not factored into any county-based rates.
