2016-2017 ASSET MANAGEMENT WORKSHOP FOR UTILITIES

A.M. KAN WORK!

- Hays • September 28, 2016
- Iola • December 14, 2016
- McPherson • January 25, 2017
- Garden City • March 1, 2017
- Kechi • May 10, 2017
- Ottawa • May 31, 2017

Water and wastewater operators can receive five hours of certification credit for attending this workshop.

ASSET MANAGEMENT WORKSHOP FOR UTILITIES

A.M. KAN WORK!

In the coming years, water and wastewater utilities will need to implement new administrative systems and management tools to allow them to adapt to increased regulatory requirements and environmental complexities. *A.M. KAN WORK!* is one of the “new” tools to help communities address:

- new and stricter regulatory requirements;
- population changes;
- service demands;
- limited water supplies;
- variable climate conditions;
- aging infrastructure;
- increased energy costs; and
- limited state and federal funding.

Asset management is a relatively new program to Kansas and Kansas utilities, particularly for water and wastewater systems. *A.M. KAN WORK!* provides a structured program for helping water and wastewater utilities achieve sustainability through sound management practices.

This workshop can assist your utility system in defining the investment priorities for the level of service expected by your customers. Asset management provides the tools needed to actively and consistently analyze current operations and future needs to develop robust management systems and well-designed infrastructure plans to meet the increasing challenges.

Register now to learn how an asset management program can help your community meet the future!

Agenda

8:30 a.m. - 3:30 p.m.
