The Kansas Department of Health Environment (KDHE) Capacity Development Program, in partnership with Wichita State Environmental Finance Center (EFC), Ranson Financial and Kansas Municipal Utilities (KMU), encourages representatives from your utility to attend an upcoming rate setting and financial planning training. The session provides participants with an understanding on major considerations when setting rates; rate structure options and pricing objectives; financial planning considerations; and strategies for communicating rate information to your board and community. The training will provide classroom instruction as well as interactive participant exercises and discussion.

Funding for the Rate Setting and Financial Planning training is provided through a contractual arrangement between the KDHE Capacity Development Program, using the State Revolving Loan Set-asides, and the Wichita State Environmental Finance Center in partnership with Ranson Financial and Kansas Municipal Utilities.

AUDIENCE. This training would be beneficial for Financial/Accounting Staff, Finance Directors, Utility Directors, City Managers, City Clerks, Board/City Council Members, Customer Service Managers, Operators, Engineering Staff and other utility employees/stakeholders.

Training is approved for 1 CMC Experience or 1 MMC Advanced Education point for city clerks.
