

BROWNFIELDS ASSESSMENT DECISION
Kansas Department of Health and Environment
Bureau of Environmental Remediation

SITE NAME: Former Moore Property BTA
ADDRESS: 314 South Clark
CITY /COUNTY: Lyons/ Rice County
REFER TO REPORT DATED: July 27, 2010
REPORT TYPE: Phase I Brownfields Targeted Assessment (BTA)
REPORT DEVELOPED BY: Terracon

DECISION DISCUSSION AND RATIONALE

The Kansas Department of Health and Environment (KDHE) conducted a Phase I Brownfields Targeted Assessment (BTA) at the former Moore Property in Lyons, Kansas. The BTA was conducted for the City of Lyons in response to environmental uncertainties associated with potential petroleum contamination. This site is being worked under the Central Prairie RC&D petroleum grant. An eligibility determination from the EPA was granted on April 21, 2010.

Based on information collected during the Phase I report, it appears that the All Appropriate Inquiry (AAI) was attained with no significant data gaps. No "Recognized Environmental Conditions" (RECs) was identified at the property; therefore, no further assessment is recommended at this time.

The conclusions and recommendations provided herein are based exclusively on the conditions identified through the Brownfields Assessment. Future contaminant releases on the subject property and/or future discovery of additional environmental impacts may warrant subsequent response not discussed in the BTA report or this document.
