#### Notice of Hearing on Proposed Administrative Regulations

The Kansas Department of Health and Environment, Division of Environment, Bureau of Environmental Remediation, will conduct a public hearing at 9 a.m. Wednesday, April 6, 2016, in the Flint Hills Conference Room, third floor, Curtis State Office Building, 1000 S.W. Jackson, Topeka, to consider the adoption of proposed new risk management program regulations K.A.R. 28-74-1, 28-74-2, 28-74-3, 28-74-4. A summary of the proposed regulations and the estimated economic impact follows.

#### Summary of Regulations:

**K.A.R. 28-74-1. Definitions.** The proposed regulation defines and clarifies additional terms that were not defined in K.S.A. 2015 Supp. 65-34,176. The terms defined by this regulation include: "acceptance," "department," and "environmental contamination."

**K.A.R. 28-74-2. Application.** The proposed regulation describes the application requirements to participate in the Risk Management Program. Each person electing to enroll a site in the program shall submit an application on a form provided by KDHE. Additionally, the application must be accompanied by the following: a site location map, a parcel and owner identification map, documented proof that the applicant provided written notification to all property owners and occupants to which the risk management plan applies, and a draft risk management plan.

**K.A.R. 28-74-3. Risk Management Plan.** The proposed regulation describes the requirements for an appropriate risk management plan. A risk management plan shall demonstrate that the extent of environmental contamination has been determined, remedial actions have been completed as necessary, contaminant concentration trends are stable or declining and are not dependent on the continued operation and maintenance of an active remedial system, and all current complete exposure pathways have been addressed. The proposed regulation further requires that a risk management plan include a

description of planned monitoring, inspection, or maintenance activities and the frequency for which these activities will be performed, a process for completing routine verification of and on-going notice to property owners and occupants to which the risk management plan applies, and a process for evaluating the effectiveness of the risk management plan.

**K.A.R. 28-74-4. Risk Management Plan Agreement.** The proposed regulation describes the requirements of a risk management plan agreement. The risk management plan agreement will clearly define the requirements and responsibilities that apply to the participant as well as KDHE and will establish the funding obligation required by K.S.A. 2015 Supp. 65-34,176. The risk management plan agreement becomes effective upon the secretary's signature and may be transferred to another person upon approval by the secretary.

#### Economic Impact:

Cost to agency: There are no costs to KDHE to implement these new proposed regulations. KDHE will utilize existing positions and major office equipment to implement and administer the Risk Management Program.

Costs to governmental agencies, private citizens, businesses, and the public: There will be no additional cost burdens placed on governmental agencies, private citizens, businesses, or the public due to the enactment of these regulations. The Risk Management Program Act (K.S.A. 2015 Supp.65-34,176) and these regulations are entirely voluntary, meaning that persons intentionally elect to participate in the Risk Management Program. Government agencies, private citizens and businesses who are subject to these regulations have voluntarily elected to participate in the program and would have a pre-existing responsibility for the long-term care and management of contaminated properties. The one-time payment required for entering into the Risk Management Program will be significantly less than the cost associated with performing more comprehensive long-term management of sites following remedy implementation.

The time period between the publication of this notice and the scheduled hearing constitutes a 60-day public comment period for the purpose of receiving written public comments on the proposed regulations. All interested parties may submit written comments prior to 5 p.m. on the day of the hearing to Maggie Weiser, Kansas Department of Health and Environment, Bureau of Environmental Remediation, 1000 S.W. Jackson, Suite 410, Topeka, 66612, by email to [mweiser@kdheks.gov](mailto:mweiser@kdheks.gov), or by fax to 785-296-7030. During the hearing, all interested parties will be given a reasonable opportunity to present their views orally on the proposed regulations as well as an opportunity to submit their written comments. In order to give each individual an opportunity to present their views, it may be necessary for the hearing officer to request that each presenter limit an oral presentation to an appropriate time frame.

Copies of the proposed regulations and the corresponding regulatory impact statement may be obtained from the KDHE Bureau of Environmental Remediation at <http://www.kdheks.gov/remedial/euc/index.html> or

(continued)

by contacting Maggie Weiser at [mweiser@kdheks.gov](mailto:mweiser@kdheks.gov), 785-291-3807 or fax 785-296-7030.

Questions pertaining to the proposed regulations should be directed to Maggie Weiser at the contact information above.

Any individual with a disability may request accommodation in order to participate in the public hearing and may request the proposed regulations and the regulatory impact statement in an accessible format. Requests for accommodation to participate in the hearing should be made at least five working days in advance of the hearing by contacting Maggie Weiser.

#### Request for Comments

Notice is hereby given that the Kansas Department of Health and Environment is soliciting comments regarding a proposed air quality operating permit. Colorado Interstate Gas Company, LLC has applied for a Class I operating permit renewal in accordance with the provisions of K.A.R. 28-19-510 et al. The purpose of a Class I permit is to identify the sources and types of regulated air pollutants emitted from the facility; the emission limitations, standards and requirements applicable to each source; and the monitoring, record keeping and reporting requirements applicable to each source as of the effective date of permit issuance.

Colorado Interstate Gas Company, LLC, 370 Van Gordon St., Lakewood, CO 80228, owns and operates Lakin Compressor Station located at Section 29, T24S, R36W, Kearny County, Kansas.

A copy of the proposed permit, permit application, all supporting documentation and all information relied upon during the permit application review process is available for public review during normal business hours, 8 a.m. to 5 p.m., at the KDHE, Bureau of Air, 1000 S.W. Jackson, Suite 310, Topeka, and at the KDHE Southwest District Office, 302 West McArtor Road, Dodge City. To obtain or review the proposed permit and supporting documentation, contact Cathy Richardson, 785-296-1947, at the KDHE central office or Ethel Evans, 620-356-1075 at the KDHE Southwest District Office. The standard departmental cost will be assessed for any copies requested.

Written comments or questions regarding the proposed permit may be directed to Cathy Richardson, KDHE, Bureau of Air, 1000 S.W. Jackson, Suite 310, Topeka, 66612-1366. In order to be considered in formulating a final permit decision, written comments must be received no later than noon February 15, 2016.

A person may request a public hearing be held on the proposed permit. The request for a public hearing shall be in writing and set forth the basis for the request. The written request must be submitted to Cathy Richardson, KDHE Bureau of Air, no later than noon February 15,

2016, in order for the secretary of health and environment to consider the request.

The U.S. Environmental Protection Agency has a 45-day review period, which will start concurrently with the public comment period, within which to object to the proposed permit. If the EPA has not objected in writing to the issuance of the permit within the 45-day review period, any person may petition the administrator of the EPA to review the permit. The 60-day public petition period will directly follow the EPA's 45-day review period. Interested parties may contact KDHE to determine if the EPA's 45-day review period has been waived.

Any such petition shall be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided for in this notice, unless the petitioner demonstrates that it was impracticable to raise such objections within such period, or unless the grounds for such objection arose after such period. Contact Ward Burns, U.S. EPA, Region 7, Air Permitting and Compliance Branch, 11201 Renner Blvd., Lenexa, KS 66219, 913-551-7960, to determine when the 45-day EPA review period ends and the 60-day petition period commences.
