Field Activities

Pre-Design Data Acquisition efforts were conducted, consisting of:

- Groundwater samples were collected in GWU 3 and GWU4 to address data gaps. Groundwater samples were collected from 1 deep only direct push location; 5 shallow and deep direct push locations; 3 shallow, intermediate, and deep direct push locations; and 4 shallow, intermediate shallow, intermediate deep, and deep direct push locations.

Reviews and Submittals

April 18, 2015. Submittal of *North Industrial Corridor Site East of Chisholm Creek Investigation and Groundwater/ Surface Water Interaction Study Work Plan* to KDHE. Report prepared by CDM Smith.

April 18, 2015. Submittal of *North Industrial Corridor Pre-Design Data Acquisition Report* to KDHE. Report prepared by SCS Aquaterra.

Planned Actions for the Next Quarter (April 1, 2015 – June 30, 2015)

Address KDHE comments on NIC East of Chisholm Creek Work Plan and NIC PDA Report.

City to conduct preliminary groundwater investigation for the source of VOC contamination found at GWU3-GP31 in the vicinity of New York and Central intersection. Probe locations will be identified to KDHE before field work is conducted.

Finalize NIC East of Chisholm Creek Investigation and Groundwater/Surface Water Interaction Study Work Plan.

Begin preparations for aquifer testing at locations proposed in the NIC PDA Report.

Submit NIC MNA Work Plan for GWU1 to KDHE.

Anticipated Compliance Problems

None.

Sampling Results; Tests; Data; and/or Conclusions Based Upon Current Data

PDA data provided under separate cover as a data report on April 18, 2015.
