**RE: National Zinc – Cherryvale Removal Site Evaluation - Phase II RSE
Former National Zinc Site, Cherryvale, Kansas KDHE Project Code #C3-063-00026;
Consent Order Case #03-E-0022. Logan Park and Lake Tanko Ball Field**

Dear Ms. Burke,

On behalf of United States Steel Corporation and Citigroup Global Market Holdings, Inc. (Respondents), please find attached the proposed locations of samples for Logan Park and the Lake Tanko Ball Field. We reviewed the locations in the field and with you on January 21, 2015. We are providing the map requested by KDHE for review and concurrence on the sample locations. The sampling approach is outlined below.

- The sample layout is designed to assess broadly conditions at the ball field and Logan Park. Samples in shown are composites unless otherwise noted.
- Single point samples were requested by KDHE in selected areas where SRM was observed. Single point locations are identified on the map.
- The sample locations may be adjusted to avoid obstructions and utilities.
- We will notify KDHE of any major changes to the sampling pattern.
- We will contact the City of Cherryvale, School District and Recreation Commission and will work with them in the event there are some specific issues with the sample locations.
- Samples will be handled and processed as per the approved work plan.

Work will begin on the sampling following your concurrence with the sample locations. Should you have any questions, please do not hesitate to contact me at (713) 539-3636.

Regards, Mark Landress P.G.
