## INFANT OUTPATIENT SCREENING For Infants Who Do Not Pass Their Birth Facility Screening

### SOUND BEGINNINGS ADVISORY COMMITTEE RECOMMENDATIONS

Early detection and assessment of hearing loss are the keys to successful habilitation of infants and toddlers. With universal newborn hearing screening mandated in Kansas since July 1999, all infants are required to have their hearing screened once parents have consented. It is preferable for the screening to be completed prior to discharge from the birthing facility but no longer than 5 days unless medically contraindicated. It is expected that the birthing facility refer rate for an outpatient screening will be no more than 4% (AABR) to 6-10% (OAE). It is recommended that the infant have an outpatient screening prior to infant audiologic assessment with Otoacoustic Emission (OAE) and/or Automated Auditory Brainstem Response (AABR) technology.

The Advisory Committee strongly recommends that the **outpatient screening is scheduled prior to discharge from the birthing facility and completed by one month of age**. The outpatient screening may be offered through the birth facility.

## KANSAS INFANT OUTPATIENT SCREENING PROVIDERS

Please check first with the birth facility to see if they provide the outpatient newborn hearing screening.

The following audiologists have indicated that they conduct OAE or AABR screening as recommended by the Newborn Hearing Screening Advisory Committee for the outpatient screening of infants.

### CLAY CENTER

Hearing Doctors of Kansas  
617 Liberty Street  
Clay Center, KS 67432-1564
