Municipal Programs Section
Rodney R. Geisler, P.E., Chief

September 30, 2014

EXECUTIVE SUMMARY

The Kansas Water Pollution Control Revolving Fund (the KWPCRF) is a way for the State of Kansas through the Kansas Department of Health and Environment (KDHE) to help communities finance water pollution control projects through low interest loans to local government. The repayments on the loans are returned to the KWPCRF to “revolve” for use by other Kansas communities. The “seed” money for the KWPCRF is provided by EPA through an act of Congress. The States must provide a minimum 20% match to these Federal grants.

Through this partnership, the State of Kansas and local communities can work together to protect and improve the environment while also building a financially stable fund to help meet municipal water quality needs of future generations.

Beginning in FFY '93, KDHE in conjunction with the Kansas Development Finance Authority (K DFA) determined the KWPCRF could sell additional revenue bonds to meet the volume of funding requests from local governments, or “leverage” the KWPCRF to generate additional funding for construction projects. This effort was successful, and KDHE in conjunction with K DFA has continued to sell State match and “leveraging” bonds on many occasions to enhance and expand the financial capability of the KWPCRF.

In conjunction with the FFY 2000 revenue bond issue, the Master Bond Resolution was also revised to establish the Environmental Initiatives Fund within the KWPCRF, which can provide funding to non-municipal applicants including non-point source pollution control projects. In conjunction with the FFY 2010 revenue bond issue, a new Master Financing Indenture was developed to provide cross-collateralization of the Kansas Clean Water and Drinking Water SRFs, and allow joint bond issues.

The KWPCRF also provides technical assistance (on site operator training and energy assessments, planning review, design conferences, construction inspection oversight) in addition to funding construction project costs. In FY '14, 6 wastewater authorities entered into new loan agreements and there were 5 major and 3 minor increase amendments to increase the loan amount, with a total of \$54.016 million being invested for new projects related to public health protection, water quality improvement, and permit compliance. There were also 34 loan amendments in the fiscal year to decrease loan amounts and finalize loan agreement repayment schedules in the total amount of \$1.252M decrease to loan agreements. These projects included:

- **Carbondale:** Rehabilitation of portions of the wastewater collection system. Loan Amount: \$3,181,800
- **Clay Center (Major Amendment):** Construction of upgrade to the existing wastewater treatment facility by addition of a belt filter press sludge dewatering system. Amount: \$474,075

- **Hesston (Major Amendment):** Rehabilitation and upgrade of the existing wastewater treatment facility to provide nutrient removal, including the effluent irrigation reuse facilities. Amount: \$1,036,456 (Green Project Reserve design.)
- **Kansas City:** Design and construction of various improvements and rehabilitation of the combined sewer system and separate sanitary sewer system within the city. Loan Amount: \$19,890,000
- **Newton:** Rehabilitation and upgrade of the existing wastewater treatment facility to provide nutrient removal, including increase of treatment capacity. Loan Amount: \$24,420,000 (Green Project Reserve design.)
- **Osage Co. SD #1:** Rehabilitation of portions of the wastewater collection system and sewage pumping stations. Loan Amount: \$284,200
- **Osawatomie:** Rehabilitation and upgrade of the existing headworks for the wastewater treatment facility. Loan Amount: \$1,273,000
- **Ozawkie:** Upgrade and replacement of three existing sewage pumping stations. Loan Amount \$848,120
- **Parsons (Major Amendment):** Rehabilitation of portions of the wastewater collection system, Phase 2. Loan Amount: \$1,249,495
- **Pittsburg (Major Amendment):** Replacement and upgrade of SCADA systems for the wastewater treatment facility and sewage pumping stations. Loan Amount \$500,000
- **Robinson (Major Amendment):** Rehabilitation of the existing wastewater treatment lagoon and portions of the collection system. Loan Amount: \$597,000

In summary, within SFY 2014, the KWPCRF provided:

- A total of \$54,016,364 to new loans and amendments to increase the loan amounts.
- Of the above, a total of \$17,317,585 was determined to meet the EPA policy requirements to qualify as Green Project Reserve funding. (Hesston (Major Amendment) \$91,000, Newton \$17,226,585)
- Of the above, a total estimated amount of \$851,480 loan funding will be provided as Principal Forgiveness to the Lake Gardner project, provided by amendment to the loan agreement.

- Not included in the above amount, a total of \$1,251,955 of decreases to loan amounts by amendments to existing loans were processed.

The revolving fund encourages participation by cities with populations 5,000 or less. Four of the 6 projects funded were for or within cities of 5,000 or less population. Since the revolving fund's beginning, about 30.1% of the money loaned has been to small communities. Future KDHE efforts will work to maintain this percentage as small community needs increase due to more stringent sludge and wastewater treatment requirements.

To qualify for a state revolving loan, the borrower must:

- Show a public health, water quality, or permit compliance need.
- Show financial need.
- Dedicate a source of money to repay the loan.
- Show the project is ready to proceed.
- Repay the loan once the project is constructed, according to the agreed-upon schedule.
- Meet the required federal and state laws and regulations of the KWPCRF Program.

I. INTRODUCTION

This is the Kansas Annual Report for Fiscal Year (FY) 2014 (7/1/13-6/30/14) for the Kansas Water Pollution Control Revolving Fund (KWPCRF). This Report describes how the State of Kansas has met the goals and objectives of its Clean Water State Revolving Loan Fund (CWSRF) for the previous fiscal year as identified in the Intended Use Plan, the actual use of funds, and the financial position of the KWPCRF. The KWPCRF helps protect the health of Kansas by financing infrastructure improvements which provide treatment of sewage and wastewater.

II. FINANCIAL OVERVIEW

In FFY '93, KDHE, in conjunction with the Kansas Development Finance Authority (KDFA), was successful in "leveraging" the KWPCRF through sale of a 20 year revenue bond. This effort resulted in the sale of \$71.2 million KDFA revenue bonds in January 1993 to provide the required 20% State Match and also "leverage" additional monies. In FFY '95 a second revenue bond issue was sold, providing additional State Match through the issuance of \$6.915 in state match revenue bonds. In FFY '97 a third revenue bond issue was sold for \$39.26 million, providing additional State Match and "leverage" monies. In FFY '98 a fourth revenue bond issue of \$80.5 million was sold, to refinance a portion of the 1993 bonds and to provide additional "leverage" loan dollars. In FFY '99, a short term revenue bond of \$470,000 was sold to provide additional state match for the FFY '99 Capitalization Grant. Also in FFY 2000, a short term revenue bond of \$2.5 million was sold to provide additional State Match for the 2000 Capitalization Grant. In FFY 2000, a fifth revenue bond issue of \$82.915 million was sold to refinance the \$2.5 million bonds and to provide additional State Match and "leverage" monies. At that time the Master Bond Resolution was also revised to establish the Environmental Initiatives Fund within the KWPCRF, which can then provide funding to non-municipal applicants, anticipated to fund non-point source pollution control projects. In FFY '01, a sixth revenue bond issue of \$141.045 million was sold, to refinance selected prior bonds, provide \$4.8 M additional State Match, and provide \$40 M additional "leverage" monies. In FY '03, a seventh revenue bond issue of \$101.575 million was sold, to refinance selected prior bonds and provide \$90 M additional "leverage" monies. In FY '04, an eighth revenue bond issue of \$50.14M was sold, to refinance selected prior bonds, provide \$5.0M additional State Match, and provide \$40.0M additional "leverage" monies. In FY '06, a ninth revenue bond issue of \$118.86M was sold to refinance selected prior bonds, provide \$2.0M additional State Match, and provide \$60.88M additional "leverage" monies. In FY '09, a tenth revenue bond issue of \$66.545M was sold to provide \$5.6M additional State Match, and provide \$60.0M additional "leverage" monies. In FY '11, the eleventh revenue bond issue of \$213,950,000 was sold under the new Master Financing Indenture in conjunction with the Kansas Public Water Supply Revolving Fund, to provide \$5.0M additional State Match, provide \$60.0M additional "Leverage" monies to the KWPCRF, and to refinance selected prior bonds for both SRF programs.

The KWPCRF received a federal grant in SFY '14 from the Title VI allotment of \$12,051,000, and this is the amount of federal funds made available in FY '14 by all SRF grants (see Exhibit 3). Also, recycled monies available in FY '14 were \$2,133,942 (the amount released back for new loan agreements after bond repayments were made and the Projected Revenue Certificate was finalized). In years prior to FY '10, the actual State borrowing amount for FY '10 and prior year's loans was determined by multiplying the total Loan Amounts (from Exhibit 1, Part 1) minus the project costs funded with recycled monies, minus the project costs funded with Leveraged bond monies by 20/116. In this way the necessary State Match for both

the Loan and the 4% Administration monies was provided as the binding commitments were established. All State Match funds from these prior bond issues have been disbursed to projects. With the State Match borrowing in SFY 2011, a different approach was required. The \$5.0M of State Match that was borrowed was immediately spent on prior disbursements to existing loans, assuring the State Match bond proceeds were quickly utilized and also the State Match to the EPA funding was quickly spent. Additional State Match bonds were sold in January 2013 to match the FFY 2012 cap grant, and additional State Match bonds were sold in December 2013 to match the 2013 and 2014 anticipated Cap Grants. These funds were also immediately spent on prior disbursements to existing loans, assuring the State Match bond proceeds were quickly utilized and also the State Match to the EPA funding was quickly spent.

The total interest earnings include accrued interest during construction, interest repayments on loans from communities, interest earned on State Match borrowing and Leveraged Bond borrowing account balances, and interest earned on the Debt Service Reserve Fund (see Exhibit 3). In FY '14, \$474,150 was drawn from the Federal ACH for administrative expenses. (See Exhibit 11).

Kansas has made progress in meeting the State's water quality financing needs.

- Six wastewater authorities entered into 6 new loan agreements (also known as "binding commitments"), and there were 5 major and 3 minor amendments increasing the loan amounts of existing loans, in the total amount of \$54,016,364 increased loan amounts.
- There were 34 amendments to existing Loan Agreements to decrease loan amounts and/or provide final repayment schedules, in the total amount of \$1,251,649 decrease to loan amounts. This results in a net increase of \$52,764,769 in total loan amounts for the fiscal year.
- Disbursements from the KWPCRF to the various recipients totaled \$33,648,260 on an accrual basis (see Exhibit 8). In addition, \$373,768 from the Federal ACH and \$1,125,310 from service fees was used for actual program administrative expenses in FY '14 (see Exhibit 11).
- All binding commitments, i.e. KDHE signature of a loan agreement or loan amendment, provided financial assistance for construction of wastewater collection and/or treatment facilities. Binding commitments were to provide assistance to municipal wastewater facilities projects as described in Section 212 of the Federal Clean Water Act, and also non-point source pollution control projects as described in Section 319 of the Federal Clean Water Act could be funded.

These "Section 212" projects include secondary treatment and advanced treatment facilities and upgrades including sludge handling improvements, infiltration/inflow correction and control, new interceptors, and sewer rehabilitation. There were no new "Section 319" projects funded for stormwater treatment. A detailed breakdown of the binding commitments made is shown in Exhibit 2.

III. GOALS AND ACCOMPLISHMENTS

A. Short Term Goals and Accomplishments

The State of Kansas must annually prepare an Intended Use Plan, listing specific projects targeted for funding and describing short-term and long-term goals to be implemented in FY '14. The State has progressed toward successful completion of its short-term goals:

1. To provide financial assistance to water quality improvement projects for discharge to streams and water bodies within "high quality watersheds" consistent with the provisions of the Project Priority System.

The program has been successful in accomplishing this goal as the projects for Ozawkie and Kansas City funded improvements in the Kansas/Lower Republican River Basin in support of the Governor's Water Quality Initiative.

2. To provide financial assistance for sewerage facilities to municipalities with population of 5,000 or less.

The fund is continuing to be popular with small communities as 4 of the 6 projects during the year were for municipalities with populations of 5,000 or less. Project costs of \$6.81 million of the total \$54.01 million (12.6%) in FY '14 were for these smaller projects. For the program to date, about 30.1% (331.5/1,101.0) of monies in loan agreements have been to small communities.

3. To assure compliance with Water Quality Standards and effluent limitations through encouraging construction of sewerage improvements in support of KDHE Permitting and Enforcement activities.

The projects funded within FY '14 and the KDHE and K DFA combined efforts in FFY '93, FFY '95, FFY '97, FFY '98, FFY '99, FFY '00, FFY '01, FY '03, FY '04, FY '06, FY '09, and FY '11 in leveraging the fund and providing the required state matching funds indicate progress in accomplishing this goal.

The sewer rehabilitation projects and/or subsequent I/I removal for Carbondale, Osage Co. SD #1, Ozawkie, Parsons (Major Amendment), Robinson (Major Amendment) and Kansas City will help operations compliance with the existing treatment facilities. Improvements to the existing or construction of new mechanical treatment facilities at Clay Center (Major Amendment), Hesston (Major Amendment), Newton, Osawatomie, and Pittsburg (Major Amendment) will help achieve compliance with the Kansas Surface Water Quality Regulations and also provide progress toward the nutrient reduction goals of the Kansas Nutrient Reduction Plan. The projects to expand and rehabilitate the existing lagoons at Robinson (Major Amendment) will improve compliance with the Kansas Surface Water Quality Standards.

4. To encourage municipalities to use the KWPCRF for solving problems related to public health protection, water quality improvement, sludge handling improvements, and wastewater treatment facilities compliance through the construction of sewerage projects.

The program has been successful in accomplishing this goal as 6 new projects and 8 amendments for over \$54.01 million signed loan agreements during the year. The project at Newton provides, in part, expanded treatment capacity for new areas of the communities.

Ten traditional wastewater treatment design projects were completed in FY 2014 to the point of initiation of operation of the newly constructed facilities and numerous projects are now making repayments on loans. Also one “green innovative” non-point source pollution control project was completed during the SFY. All required repayments were received in full and on schedule.

Also note, the number of projects and total project amounts that were completed in FY 2013 to the point of initiation of operation was not complete and accurate. A total of 11 projects in the amount of \$10,426,914 were reported, but the correct total is 13 projects in the amount of \$10,670,837. The additional projects were Cherokee Co. SD #1 and Viola. Of these 13, none were “green innovative” non-point source pollution control project completed to the point of initiation of operation in FY 2013. This was discovered when updating the National Information Management System (NIMS) for 2014, and NIMS is now correct.

The projects for Kansas City, Newton, Osawatomie, Parsons (Major Amendment), and Pittsburg (Major Amendment) and were necessary to comply with schedules in permits and/or orders from KDHE or EPA.

The use of the Fund continues as projects continue to approach KDHE for funding, and total project cost estimates continue to exceed available funding. Due to this, KDHE has completed several revenue bond sale efforts in the past to generate additional leverage funds, and if necessary will continue these efforts in the future as allowed by the financial capability of the Fund.

5. To assure compliance with domestic sewage sludge reuse criteria and disposal practices through construction of any necessary sludge handling improvements to comply with the 40 CFR Part 503 EPA regulations.

Various projects help accomplish this goal by upgrading the sludge handling aspects of existing mechanical treatment facilities when the overall project is completed. These projects include Clay Center (Major Amendment), Hesston (Major Amendment), and Newton. KDHE preliminary project activities through the year continue to address this problem, and we expect continued loan activity in the coming year.

6. Fund green infrastructure, water and energy efficiency and environmentally innovative projects in an amount that is at least ten percent of the capitalization grant.

Congress has directed that a goal of at least 10 percent of the FFY 2014 capitalization grant is established for funding “Green Project Reserve” projects. Kansas has continued to solicit green infrastructure, water and energy efficiency, and environmentally innovative projects, and has achieved this goal as in FFY 2014 the total estimated GPR amount funded was \$17,226,585. KDHE is now reviewing the KWPCRF statutes and regulations to consider changes to establish

a linked-deposit approach to fund these types of non-point source pollution control projects. KDHE has required and approved business cases for projects that have been determined to not categorically qualify for the Green Project Reserve, as required by EPA guidance. Business cases are posted on the KDHE website (www.kdheks.gov/muni/index.htm) upon financing approval.

7. Provide the maximum allowable amount of principal forgiveness available to selected projects.

Projects for communities that could not otherwise afford necessary projects continue to be coordinated with the CDBG grants program and the Rural Development grant and low interest loan funding programs thru the Kansas Interagency Advisory Committee (KIAC) process. KDHE has provided the available principal forgiveness is to deserving projects (reference Exhibits 1A through 1D), and in the future is considering changing the methods of providing the additional subsidization to projects to be based on abnormally high cost projects resulting in abnormally high user charge impacts when compared to median household income of the service area population. These decisions will be presented in the development of future Intended Use Plans.

8. To encourage municipalities to use the KWPCRF to implement EPA's Sustainability Policy.

EPA's Sustainability Policy encourages states to develop projects and provide funding to projects that repair existing infrastructure ("Fix it First"), promote effective utility management, or provide long term planning. These Sustainability Policy principals are also implemented through the KIAC discussions with other agencies. The projects funded for Kansas City (CSO correction/control), Newton (WWTP rehab and upgrade), Osage County SD #1 (sewer rehab), Carbondale (sewer rehab), Osawatomie (headworks replacement), Ozawkie (pumping station rehab and replacement), Hesston (Major Amendment - WWTP rehab and upgrade), Parsons (Major Amendment - I/I correction and control sewer rehab), Leon (amendment – sewer rehab), Colony (amendment – sewer rehab), and Robinson (Major Amendment – sewer rehab) are "Fix it First" projects.

9. To encourage Green Project Reserve (GPR) designs in projects selected to be funded, and to emphasize funding to GPR and "KDHE Green" projects.

The KWPCRF has been successful in implementing this aspect of the federal program in SFY 2014. The projects at Hesston (effluent irrigation to municipal golf course) and Newton (greater than 20% energy efficiency improvement) accomplish these goals.

10. Expedite project development and construction by encouraging projects to begin construction within one year of providing the KWPCRF low interest loan.

The KWPCRF program has continued to accomplish this short timeframe goal between project application and construction start. The new EPA goal is to have all funded projects under construction within one year of capitalization grant award. The program continues to draw and spend the federal capitalization grant funds very quickly, by spending federal funds "first in, first out" (FIFO) to any

project that includes all current federal requirements as soon as federal funds are available and until available federal funds are exhausted.

11. Continue implementing of the current and successful financial model.

The KWPCRF continues to work with the Kansas Development Finance Authority (KDFA) and the financial consultants to the KWPCRF, to monitor and track the current status of the KWPCRF and the KPWSRF under the cross-collateralization agreements of the Master Financing Indenture (MFI), and update the financial modeling software as deemed appropriate. KDHE will continue to work with other state agencies under the IAA to continue implementation of the KWPCRF, including management of the significant amount of prepayments now being received.

12. Operating Procedures.

The policies and procedures of the KWPCRF are continually reviewed and updated as necessary, to simplify and improve efficiency of the application, approval, financing, payments, and close out processes.

B. Long Term Goals and Accomplishments

In its Intended Use Plan, the State of Kansas made the following long-term commitments:

1. To maintain a self-supporting revolving loan program through the Kansas Water Pollution Control Revolving Fund in order to improve and protect water quality and public health.

To date, this goal is being met. The long term cash flow and fund balance projections developed by program financial advisors indicate the debt coverage ratios for the revenue bonds meet or exceed requirements. Also, the excess repayments of principal, i.e. principal repayments above the amounts necessary to satisfy payments on the KDHE Leveraged Bonds, are substantial and will continue to be deposited into the General Loan account. This has allowed the sale of Leveraged Bonds in the past, and KDHE will sell additional leveraging bonds in the future as necessary and when capable. This also allows "recycled" monies to be available for projects and placed in loan agreements.

The service fees generated by the loan repayments continue to be used to pay for KDFA and/or Division of Accounts and Reports (DAAR) of the Department of Administration services, are also helping to support KDHE administration of water pollution control programs, and provide funding for several operator training contractors from outside the Department. See also Item V.A. for a discussion of administrative costs and service fees and see also Attachment 5.

2. To establish and manage an effective and efficient State Revolving Fund Program, provided that its revolving nature is assured in perpetuity.

To date, this goal is being met. The Fund has been sufficiently popular with municipal projects that all available funds are quickly committed to loan agreements, and the Fund has "leveraged" additional funds for major projects on ten occasions. The Fund has been efficient with a low administrative cost to project cost ratio, and projects would move very quickly into and through construction. Long term cash flow and fund balance projections developed by program financial advisors indicate a sufficient debt coverage ratio and continued growth of the Fund. A new Master Financing Indenture was developed in FY '11. Independent audits of the Fund have now been conducted for the past seventeen years and an independent audit is also being conducted for SFY '14. An A-133 Audit of the KWPCRF was conducted for FFY '13 and all questions and/or concerns are now resolved.

The recent changes to the KWPCRF program as a result of additional Federal conditions on the Capitalization Grants starting with FFY '10 funding have substantially increased the administrative burden to KDHE. Hopefully the Fund will remain popular with municipalities, and KDHE will take whatever actions are necessary to assure KWPCRF debt is repaid and the program continues financially secure into perpetuity.

3. To provide the type and amount of assistance most advantageous to local communities consistent with assuring the long-term purchasing power and stability of the Fund.

The State continues to pursue these long term goals. KDHE and KDFA will continue to monitor the financial status of the Fund.

4. To continue to fund water quality improvement, sludge handling improvements, and public health protection projects on a priority basis as presented in the Project Priority List.

Projects are included on the Intended Use Plan (IUP) first on basis of priority from the List, and then based on readiness to proceed. Projects for communities with population of 5,000 or less are often included on the basis of priority need, to help in development of projects.

5. To support implementation of Water Quality improvements plans as presented within the Kansas Water Plan and TMDL plans written by KDHE and approved by EPA.

This goal will continue to the FFY 2015 effort. KDHE efforts have been successful, as reflected in the large number of water quality improvement projects funded in the past and targeted by the IUP for funding in the future. The KWPCRF also continues to target funding to projects in the Kansas Lower Republican River Basin and in the Lower Arkansas River Basin in support of the Governor's Water Quality Initiative, and is targeting funding to projects with discharges to High Quality Watersheds as described in the Project Priority System.

6. To provide funding to non-traditional borrowers for water quality improvement and public health protection projects, including non-point source pollution control projects.

The fund is now providing financing to non-traditional borrowers for non-point source pollution control projects and in the past 5 years has provided \$8,071,832 to 16 loans. These projects will improve water quality in the local areas by alleviating surface runoff non-point sources of pollution.

7. Provide low-cost financing for important water quality projects while maintaining the perpetuity of the CWSRF.

Kansas continues to use a financial planning model to guide decisions on leveraging capability, bond debt coverage factors, and cash investments. Kansas works to balance the goals of maximizing subsidies while maintaining the fund in perpetuity.

8. Work with other state funding sources to coordinate water quality and asset management financing.

The KWPCRF program continues to routinely meet with other agency programs that finance wastewater infrastructure in Kansas, including the U.S. Department of Agriculture (USDA) Rural Development program, the Department of Housing and Urban Development's (HUD) Community Development Block Grant (CDBG) program as administered by the Kansas Department of Commerce, and meets monthly with other state agencies that are parties to the IAA for the KWPCRF and KPWSRF. The financing programs continue to meet with potential applicant cities to discuss program application requirements and present funding packages, which can maximize cost savings to the applicant cities and improve efficiency of all programs.

9. Use effective outreach techniques to reach important water quality priorities and maintain a high pace level.

The KWPCRF continues to bring projects to the KWPCRF program that address the state's most important water quality priorities. Various outreach techniques continue to be used, including meetings with watershed organizations, participation in conferences, brochures, KIAC meetings, and personal visits to communities. The KWPCRF will continue these efforts and respond to evolving water quality and environmental priorities in the state and nationally.

10. Expand CWSRF accessibility by creating financial assistance programs that address nonpoint source control and other nontraditional CWSRF projects.

New financing options are being evaluated, including the use of the "linked deposit" program, in the hope these types of projects can continue to access the KWPCRF program for cost-effective financing. KDHE is currently reviewing the statutes and regulations to determine any changes necessary to implement a "linked deposit" program of funding for non-point source pollution control project funding.

11. Expand available financing by issuing KWPCRF leveraged bonds as and when needed.

KDHE with the assistance of KDFA has periodically leveraged by issuing tax-exempt revenue bonds secured jointly by the KWPCRF and the KWPCRF thru cross-collateralization, which enabled funding for a greater number of projects than would otherwise have been possible while securing the continued financial security of the previously issued revenue bonds. The KWPCRF program has in the past experienced greater demand for funding than it would be able to service without leveraging. Leveraging decisions are made based on funding needs, modeling and financial analysis to ensure additional funds are needed and can be spent in a timely manner, while complying with all requirements of the Internal Revenue Service (IRS) for tax exempt bond status and all conditions of the Security and Exchange Commission (SEC) of the U. S. Treasury for tax exempt revenue bonds. There was not a need to issue leveraging bonds in SFY 2014.

IV. DETAILS OF ACCOMPLISHMENTS

A. Fund Financial Status

1. Binding Commitments

As shown in Exhibit 2, the Kansas Water Pollution Control Revolving Fund entered into binding agreements with 6 projects and 5 major and 3 minor amendments to existing Loan Agreements in order to provide financial assistance for Section 212 "traditional" wastewater collection and treatment projects and also in the past for Section 319 "green innovative" non-point source pollution control projects. The total amount of binding commitments to loans in SFY 2014 is \$54,016,364. Also, by receiving the FFY '13 EPA Capitalization Grant offer KDHE has obtained additional funds for Administration. Many of the projects funded in this fiscal year have all of the "Cross-Cutters" requirements imposed, and in the future additional projects will be funded with all "Cross-Cutters" imposed to insure total funded projects exceed the total Capitalization Grants received for the program.

2. Sources of Funds

Exhibit 3 shows all sources of KWPCRF funds for FY '13. Federal funds of \$12,051,000 were received from the 2013 appropriation during SFY 2014.

3. Revenues and Expenses

The Statement of Revenues, Expenses, and Changes in Fund Net Assets is Exhibit 11 of this report. Fund revenues consisted of ACH draws of capitalization grants restricted for administration, interest earned on investments and debt service reserve funds, interest repayments on loans to communities, as well as capitalized interest during construction on certain loans. Fund expenses included KDHE administration expenditures, amortized bond issuance costs, arbitrage rebate, and interest paid on bonds.

4. Disbursements

On an accrual basis during the fiscal year a total of \$33,648,260 was disbursed, reference Exhibit 8, which is the total Project Payments, Interest Accrued, and Fees Accrued. This includes Federal monies (\$23,064,265) and State Match (\$3,800,000), reference Exhibit 9, and \$6,783,995 of Leveraged Bond monies and recycled monies to numerous projects. In addition, \$1,125,310 has been expended for the annual audit, payment to DAAR for accounting and reporting services, payment to KDFA for bond administration services, and KDHE administrative expenses (see Exhibit 11). These expenses are paid from revenue generated from a service fee charged to all loan recipients. The \$27,337,316 TOTAL Select Disbursements includes \$23,064,265 Federal monies for project payments, plus \$473,051 actual KDHE program administration costs, including the costs to administer the Needs Survey (see Exhibit 9).

5. Supplemental Information

Exhibit 14 entitled "Supplemental Schedules" contains three sections which provide detailed information regarding investments, accounts receivable, and accounts payable amounts included in the Statement of Net Assets. Earnings on investments by the Pooled Money Investment Board within the State Treasurer's Office accrued at an annual rate of approximately 0.097% during the fiscal year. With creation of the Master Financing Indenture in December 2010, the KWPCRF also has cash held by the Trustee, United Missouri Bank.

6. Audit for FY '14

The State Single Audit for Fiscal Year '14 (i.e. 7/1/13 through 6/30/14) is being conducted by CliftonLarsonAllen LLP. The independent audit of the KWPCRF for the prior twelve months of SFY '13 which ended June 30, 2013, was conducted by RubinBrown. The independent audit report of the KWPCRF for FY '14 will be included as Attachment 2 to this Annual Report when the Audit Report becomes available. The State Single Audit for Fiscal Year '14 will also include a review of the KWPCRF; the Audit Report for SFY '14 is not yet available. The State Single Audit Report for SFY '13 is available on the website <http://www.kslpa.org/docs/reports/R-13-007.pdf>.

B. Assistance Activity

Exhibits 1-3 and Exhibit 6 illustrate the assistance level financial activity of the Fund for FY '14.

Exhibit 1 shows new projects and increase amendments which the KWPCRF has funded. The chart is separated into four sections: Part 1 lists all Section 212 publicly owned treatment works receiving assistance; Part 2 lists all Non-Point Source Management Program loans (of which there were none); Part 3 (not shown) would present the National Estuary projects (of which there were none); and Part 4 shows the binding commitment made to provide program administration costs. The projects funded in FY '14 count toward "Cross-Cutters" requirements, and in the future additional projects will be funded with all "Cross-

Cutters" imposed to ensure total funded projects exceed the total Capitalization Grants received for the program.

For each project, Exhibit 1 shows the communities served and loan applicants, project number, assistance amount, binding commitment date, construction start date, initiation of operations date, the type of assistance being provided, and the interest rate and maturity of all loans.

Exhibit 2 shows a breakdown of binding commitments by quarter.

Exhibit 3 illustrates the sources of funds for FY '14 broken down by quarter.

Exhibit 6 shows the assistance amount provided to each Section 212 and Section 319 project by needs category.

The level of risk for outstanding loans is consistent for the communities receiving assistance, in that the KWPCRF typically requires a "General Obligation Pledge" and so the bond rating of a community (or even the lack of a rating) is of secondary importance. This demand for a "G.O. Pledge" coupled with KDHE review/approval of the Financial Capability submittal and certification of fund sources available for debt service (including loan repayments and existing debt) and operation, maintenance, and replacement expenses ensures adequate funds are provided for repayments to the Fund.

Several wastewater systems within the State are operated as a "utility", i.e., are fully supported by the rate payers. These systems historically operate with "Revenue Obligation" debt only. KDHE revised procedures within FFY '92 under the Master Bond Resolution to accommodate these systems. Any wastewater system which did not or could not present a "General Obligation Pledge" was required by the covenants of the KDFA Revenue Bond to secure the obligation of the Municipality to make loan repayments by an Insurance Policy issued in favor of KDHE. The Insurer which issues the Policy had to be rated not less than "AAA" by Moody's Investors Services, Inc. and "AAA" by Standard & Poor's Corporation. These Insurance Policies typically required a 10% loan reserve account be established and might require a rate covenant. Such loan reserve accounts continue to be held in trust by the Fund. KDHE has further revised procedures within FFY '11 under the Master Financing Indenture to continue to accommodate systems that historically operate with "Revenue Obligation" debt only, with similar requirements that reflect current financial market conditions but recognize a Policy of Bond Insurance is no longer available for the relatively low amounts of the loans provided by the KWPCRF.

Now with the advent of the ARRA program funding and the FFY 2010 and subsequent federal appropriations, certain projects which qualify for the "green project reserve" also received "principal forgiveness" for a portion of the KWPCRF loan. This combination of loan low interest and principal forgiveness has now allowed the KWPCRF to fund non-point source pollution control projects to not-for-profit applicants, without endangering the financial stability of the KWPCRF.

C. **Provisions of the Operating Agreement/Conditions of the EPA Capitalization Grants**

The State of Kansas agreed to numerous conditions in the Operating Agreement and the 22 previously received Capitalization Grant Agreements from EPA. The ARRA grant included many additional unique conditions. In prior years, KDHE had reported compliance with special conditions of old Capitalization Grants from which administrative funds were actually being spent. In FFY '98, EPA requested KDHE spend all Capitalization Grant funds from prior years in an "expeditious and timely" manner. Therefore the older Capitalization Grants are being completely drawn down, with the administrative funds amounts carried forward to newer Capitalization Grants in a process where KDHE "reserves the right" to draw funds for current administrative expenses from the current Capitalization Grant being utilized, up to the latest received Capitalization Grant. Therefore, KDHE will report compliance for administrative expense spending of federal funds with the Special Conditions of the Capitalization Grant currently being drawn. KDHE believes all conditions have been met, and several conditions are more fully described below. The grants will be utilized for project costs, and also for the administrative costs, on a "first in - first out" basis. KDHE has "reserved the right" for the budgeted administrative expenses to be spent from a future grant. The following conditions have been met as described in the operating agreement or the capitalization grant agreement:

- Agreement to Accept Payments
- State Laws and Procedures
- State Accounting and Auditing Procedures
- Recipient Accounting and Auditing Procedures
- Use of the Automated Clearing House (ACH)
- Repayments
- Annual Audit
- Annual Report
- Annual Review
- Anti-lobbying
- Rural Area Business Enterprise Development Plan
- Use of EPA Approved Indirect Cost Rate
- Prior EPA Approval of Administrative Contracts and Equipment Purchases
- Development of Priority System, List, and IUP with Public Participation
- Suspension and Debarment Certifications
- Use of Administrative Monies in Compliance with 40 CFR 31.36
- Use of Recycled Paper
- Implement the EPA - approved Quality Assurance Plan
- Hotel and Motel Fire Safety Act of 1990
- Financial Status Reports

The following conditions are being met as described more fully below.

1. Provide 20% State Match.

The total provided for State Match since the inception of the Program is \$62,116,691. KDHE completed the sale of State Match bonds in January 2013 for \$2,655,845 with \$1,482,045 used to fully match the 2012 Cap Grant, and

\$1,173,800 to partially match the 2013 Cap Grant. KDHE completed the sale of State Match bonds in December 2013 for \$3,800,000 with \$1,236,400 providing the rest of the match amount to the 2013 Cap Grant, and provided the entire required match amount of \$2,563,600 to the 2014 Cap Grant. And so \$32,400 remains to partially match the future FFY 2015 Cap Grant.

Additional State Match bonds will be sold in the future as needed for the additional State Match funding for the FFY '15 and future Capitalization Grants. This borrowing may also provide state match for the future FFY 2016 Capitalization Grant.

2. Binding Commitments Within One Year

The State of Kansas will enter into binding commitments to provide assistance from the KWPCRF in amounts greater than or equal to 120 percent of each quarterly grant payment (per schedule in the grant offer or subsequent amendments) within one year after each scheduled quarterly ACH increase. See Exhibit 4 for the comparison of select binding commitments to grant payments.

3. Expeditious and Timely Expenditure

The State of Kansas will disburse all cash draws and other available KWPCRF funds in a timely and expeditious manner. Kansas will monitor the projects to ensure timely initiation of operations in accordance with the established schedules.

4. Eligible Activities of the KWPCRF

All projects and project costs funded by the KWPCRF were eligible for funding by the KWPCRF. The eligible activities of the KWPCRF have not changed during the year, however the ARRA grant and the FFY 2010, FFY 2011, FFY 2012 and FFY 2013 Cap Grants require principal forgiveness be provided, and requires the KWPCRF attempt to fund "green project reserve" qualifying projects.

5. Compliance with "Cross-Cutters" Requirements

The KWPCRF loan application packets reflect all "cross cutters" requirements. This information is closely reviewed before signing a Loan Agreement, approving an engineering contract, or approval of construction bids. Also, KDHE provides oversight inspection and reviews on-going construction administration of all projects.

Any prior year's funded projects which met all "Cross-Cutters" that exceeded the federal share of the capitalization grants were banked toward the next capitalization grant's "Cross-Cutters" requirement. As additional Capitalization Grants are received additional projects are being funded requiring compliance with "Cross-Cutters" requirements, and so specific projects will be identified in future Intended Use Plans. The Procurement Policy is updated as necessary to ensure all necessary Federal Cross-Cutters are addressed.

6. MBE/WBE (DBE) Requirement

The FFY 2013 Program Requirements and prior EPA Capitalization Grants include various "fair share" objective goals for the KWPCRF to provide MBE/WBE (DBE) participation. There are four separate categories of "fair share" objectives including supplies, equipment, services, and construction for the entire agency. The KWPCRF Procurement Policy reflects the (MBE/WBE) Disadvantaged Business Enterprise utilization approach acceptable to EPA Region VII through the FFY '13 Capitalization Grant for the "construction" category. The supplies, equipment, and services categories may be utilized with the 4% administration portion of the grant, and are not reported here. MBE/WBE (DBE) participation for supplies, equipment, and services are reported separately to EPA by KDHE. The "fair share" objective goals for "construction" within the FFY 2013 and prior EPA Capitalization Grants are MBE - 4.1% and WBE - 6.9%.

The older loan agreement individual loan recipients submit a completed EPA Form 5700-52A within 15 days after each quarter in which sub-agreements were awarded for Loan Agreement costs. These submittals are compiled by KDHE and a Quarterly MBE/WBE Consolidation Report is submitted to EPA Region VII within 30 days after each quarter in which sub-agreements were awarded for Loan Agreement costs. The newer loan agreements reflect the new DBE regulations. The DBE regulation changes created new forms to be utilized for reporting, and impose a semi-annual reporting frequency on loan recipients. However, KDHE continues to report to EPA Region 7 on a quarterly basis.

For SFY '13 for Loan Agreement ("construction") costs, a total of \$562,222 was reported for sub-agreements with MBE/WBE firms. This includes \$0 MBE subcontracts and \$562,222 WBE subcontracts. For the program to date 4.60% (14.71/319.8) of the total Capitalization Grants amount have been agreements awarded to MBE firms, and 5.79% (18.51/319.8) have been agreements and sub-agreements awarded to WBE firms.

7. Other Federal Authorities

The State of Kansas has complied with all applicable federal authorities and special conditions of the EPA Capitalization Grants.

Recipients of KWPCRF assistance have complied with the program requirements presented within the loan agreements between the recipient and the State of Kansas. The recent loan recipients are required to submit project audit reports for fiscal year 2013 by September 30, 2014, as specified in the Loan Agreements. Typically, project audits are completed by all loan recipients where required by the loan agreements, but not all are submitted by September 30. As in prior years, KDHE will continue to pursue submittal of all project audits from loan recipients as required by the covenants of the loan agreements. An audit tracking system is maintained by KDHE to log incoming audits. After the September 30 deadline reminder letters are sent out to those not received.

The Federal OMB Circular A-133 requires any loan recipient that receives in excess of \$500,000 in Federal funds within a fiscal year to conduct an A-133 audit, and KDHE can designate certain projects in the IUP as having received

federal funds for A-133 compliance purposes. The loan recipient' fiscal year is typically January 1 to December 31, and in these cases the KWPCRF institutes a procedure to review the IUP designations and/or project payment records in January. If a loan recipient has a different fiscal year period a similar notification process is followed. KDHE notifies every loan recipient that has received project payments from the Federal Capitalization Grants of the amount of Federal funds allocated or received in the prior calendar (or local fiscal) year. This allows the recipient auditor to determine if an A-133 type audit is required. (OMB has recently published new rules regarding A-133 Audits, and the threshold is now federal funds greater than \$750,000 for non-Federal entities with Fiscal Years beginning on or after December 26, 2014. This would be FY 2015 for most loan recipients as the fiscal year is the calendar year, and SFY 2015 for the State of Kansas.)

8. State Environmental Review Process (SERP)

During FY '14, the State of Kansas conducted environmental reviews on the 6 Section 212 and Section 319 projects in accordance with the SERP. It was determined that no Environmental Impact Statements (EIS) were necessary; instead, an Environmental Assessment (EA) was prepared and a Finding of No Significant Impact (FNSI) was issued for each project.

9. Cash Draw

Exhibit 5 shows the total drawn from the Federal ACH for projects and Administration expenses. Excluding the ARRA funds, Leveraged Bond monies and Recycled Loan monies, this represents an 86.10% Federal Share in FY '14. Overall the program now has an 82.53% Federal Share, excluding the ARRA funds, Leveraged Bond monies and Recycled Loan monies. The ARRA monies are tracked separately, as there was no state match requirement.

The KWPCRF uses the cash flow method of leveraging the CWSRF. The federal capitalization grants are **not** used as security on the bonds. For SFY2014 the KWPCRF continued to follow the EPA Memorandum "Clarification of Cash Draw Rules for Leveraged SRF Programs" (August 26, 2011). The entire amount of state matching funds for the 2014 cap grant was deposited to the KWPCRF and has been paid to loan recipients. The Payment Schedule provided to EPA reflected this plan. State match was provided before the payment of capitalization grant funds was received and all state match funds were disbursed before any federal funds were drawn for project payments, therefore the grant funds are drawn at a 100% proportionality ratio.

10. Third Quarter Disbursement Schedule/Commitment

With reference to EPA Headquarters Memo 00-10, beginning in FFY 2000, disbursement projections are no longer required by EPA.

11. Independent Audit per 40 CFR 35.3165

The Division of Accounts and Reports (DAAR) of the Kansas Department of Administration on behalf of KDHE and the KWPCRF has contracted for a

financial audit per 40 CFR 35.3165 for FY '14. The State Single Audit for Fiscal Year '14 will also include a review of the KWPCRF; the Audit Report for SFY '14 is not yet available. A Financial Audit of the KWPCRF was conducted for FY '13, and that report is available. The Financial Audit for FY '14 is not yet available.

12. Priority List and Intended Use Plan

The SFY 2015 Priority List and Intended Use Plan, indicating the use of the funds provided by the FFY 2014 Cap Grant, were submitted to EPA for approval and acceptance.

13. Green Project Reserve

The EPA guidance document entitled "2010, Clean Water and Drinking Water State Revolving Fund 20% Green Project Reserve: Guidance for Determining Project Eligibility" dated April 21, 2010, and the EPA guidance document entitled "2011, Clean Water and Drinking Water State Revolving Fund 20% Green Project Reserve: Guidance for Determining Project Eligibility" dated May 20, 2011 and the EPA guidance document entitled "2012 Clean Water State Revolving Fund 10% Green Project Reserve: Guidance for Determining Eligibility" dated March 2, 2012 requires the Annual Report include "information regarding key project characteristics, milestones, and environmental/ public health protection results" to achieve "4) compliance with the Green Project Reserve requirement" of the EPA guidance and federal law. The FFY 2013 EPA Guidance document references the prior FFY 2012 document. (The FFY 2014 EPA guidance is not referenced here as the FFY 2014 Capitalization Grant was not received in SFY 2014.) A summary of Green Project Reserve funding with FFY 2010 Capitalization Grants is provided in Exhibit 1A within this Annual Report. A summary of Green Project Reserve funding with FFY 2011 Capitalization Grants is provided in Exhibit 1B within this Annual Report. A summary of Green Project Reserve funding with FFY 2012 Capitalization Grants is provided in Exhibit 1C within this Annual Report. A summary of Green Project Reserve funding with FFY 2013 Capitalization Grants is provided in Exhibit 1D within this Annual Report.

The KWPCRF published the "Final SFY 2011 KWPCRF Intended Use Plan" dated September 16, 2010, which presents the plan and approach to assure the minimum 20% Green Project Reserve (GPR) funding goal is met. KDHE chose to continue the methods utilized for the ARRA funding to encourage GPR projects receive funding.

The FFY 2010 Cap Grant GPR goal amount was \$3,678,200. KDHE had set aside 20% of the 2010 federal appropriation, that is, \$3,678,200, for non-point source (NPS) pollution control projects. As shown on the Exhibit 1A allocation spreadsheet, the total estimated GPR amount of \$5,755,628 was funded.

The FFY 2011 Cap Grant GPR goal amount was \$2,665,600. Also, KDHE has set aside 20% of the 2011 federal appropriation, that is, \$2,665,600, for non-point source (NPS) pollution control projects. As shown on the Exhibit 1B allocation spreadsheet, the total estimated GPR amount of \$11,043,051 was funded.

The FFY 2012 cap grant GPR goal amount was \$1,275,700. Also, KDHE has set aside 10% of the 2012 federal appropriation, that is, \$1,275,700, for non-point source (NPS) pollution control projects. As shown on the Exhibit 1C allocation spreadsheet, the total estimated GPR amount of \$1,083,243 was funded.

The FFY 2013 cap grant GPR goal amount was \$1,205,100. KDHE did not set aside any of the 2013 federal appropriation, for non-point source (NPS) pollution control projects. The approach had been to provide 100% principal forgiveness to NPS projects, however the principal forgiveness amounts from the federal appropriations have declined over the years, and so no new NPS GPR projects were solicited. As shown on the Exhibit 1D allocation spreadsheet, the total estimated GPR amount of \$17,226,585 was funded.

The total amount of cap grant GPR set aside amounts goal from 2010 through 2013 is \$8,644,600 while the total GPR amounts provided from 2010 through 2013 is \$35,108,507.

The Watershed Management Section of the Bureau of Water administers the NPS projects funded by the KWPCRF.

KDHE will continue to develop the GPR aspects of all other “traditional” wastewater collection and treatment projects from the 2015 Intended Use Plan, and consider adding additional traditional wastewater projects as funding allows.

14. Principal Forgiveness

The April 21, 2010, EPA Guidance, the May 20, 2011, EPA Guidance, and the March 2, 2012 EPA Guidance also requires the Annual Report include “information regarding key project characteristics, milestones, and environmental/public health protection results” to achieve “5) compliance with the additional subsidization requirement” of the EPA guidance and Federal law. The FFY 2013 EPA grant award requires the continued use of the FFY 2012 guidance. (The FFY 2014 EPA guidance is not referenced here as the FFY 2014 Capitalization Grant was not received in SFY 2014.) A summary of principal forgiveness for Loan Agreements funded with the 2010 Cap Grant is provided in Exhibit 1A within this Annual Report. A summary of principal forgiveness for Loan Agreements funded with the 2011 Cap Grant is provided in Exhibit 1B within this Annual Report. A summary of principal forgiveness for Loan Agreements funded with the 2012 Cap Grant is provided in Exhibit 1C within this Annual Report. A summary of principal forgiveness for Loan Agreements funded with the 2013 Cap Grant is provided in Exhibit 1D within this Annual Report.

The KWPCRF published the “Final SFY 2011 KWPCRF Intended Use Plan” dated September 16, 2010, which presents the plan and approach to assure the minimum principal forgiveness amounts are met and the maximum allowable amounts are not exceeded.

The FFY 2010 cap grant maximum principal forgiveness set aside amount was \$9,181,294 and as shown on Exhibit 1A the total estimated principal forgiveness amount of \$9,181,294 was funded.

The FFY 2011 cap grant maximum principal forgiveness set aside amount was \$4,116,837 and as shown on Exhibit 1B the total estimated principal forgiveness amount of \$4,116,837 was funded.

The FFY 2012 cap grant maximum principal forgiveness set aside amount was \$1,063,482 and as shown on Exhibit 1C the total estimated principal forgiveness amount of \$1,063,482 was funded.

The FFY 2013 cap grant maximum principal forgiveness set aside amount was \$851,480 and as shown on Exhibit 1D the total estimated principal forgiveness amount of \$851,480 was funded.

KDHE will continue to administer the principal forgiveness aspects of the Clean Water SRF program for wastewater collection and treatment projects from the 2015 Intended Use Plan, and consider adding additional projects as funding allows.

The GPR status of a project design and the amount of principal forgiveness is summarized in the Executive Summary of this Annual Report for all projects funded within the report year.

Programmatic Condition No. 6 of the FFY 2010 Capitalization Grant, Programmatic Condition 3 of the FFY 2011 Capitalization Grant, Programmatic Condition 3 of the FFY 2012 Capitalization Grant, and Programmatic Condition 3 of the FFY 2013 Capitalization Grant include the following paragraph:

“Priority for additional subsidies should be given to communities that could not otherwise afford such projects or that are defined by the state as disadvantaged. To further ensure sustainability of projects receiving additional subsidies, these subsidies should be directed to: 1) repair, replacement, and upgrade of infrastructure in existing communities; 2) investigations, studies, or plans that improve the technical, financial and managerial capacity of the assistance recipient to operate, maintain, and replace finances infrastructure; and/or 3) preliminary planning, alternatives assessment and eligible capital projects that reflect the full life cycle costs of infrastructure assets, conservation of natural resources, and alternative approaches to integrate natural or “green” systems into the built environment. The recipient agrees to provide in its Annual Report an explanation as to how they did or did not address this provision.”

As previously indicated, the KWPCRF met the intent of this grant condition by providing a minimum 15% principal forgiveness to all loans for engineering and construction costs to assure the minimum required Additional Subsidy requirement is met, and also provided an additional 25% principal forgiveness in certain loans for engineering and construction costs of the “green” design components of the project to encourage these types of design components and also help assure the minimum 20% of capitalization grant funding for Green Project Reserve stipulated goal is met. As the amounts of federal funding for principal forgiveness on prior loans are reduced any new loans are not receiving principal forgiveness, as the prior loan commitment amounts are being satisfied.

15. Federal Funding Accountability and Transparency Act (FFATA)

The KWPCRF complies with the requirements of FFATA by selecting a number of projects to report into the federal database each year in a total dollar amount somewhat exceeding the amount of the Capitalization Grant for that federal fiscal year. See Attachment 6.

16. The KWPCRF complies with the requirements for Loan recipients to conduct A-133 Audits, as presented by EPA. The Loan Recipients required to conduct A-133 Audits for the Fiscal Year (calendar year) 2014 and presented in Attachment 7.

V. PROGRAM CHANGES

A. Comparison with the Intended Use Plan

The Annual Report reflects the following changes from the original Intended Use Plan.

- Of the projects listed on the Intended Use Plan 6 obtained loan agreements. The 6 projects which signed loan agreements were generally on schedule with the IUP. The numerous other projects listed on the IUP and the updates to the IUP continue to be developed. The projects which have been funded are listed in Exhibit 1. All other projects on the IUP are developing engineering studies and applications.
- Program administration disbursements were estimated in the IUP to total 4% of the projected disbursements for projects for the year. Actual administration disbursements totaled \$1,599,078 (\$473,768 ACH plus \$1,125,310 service fees) (see Exhibit 11). Considering the Federal/State, Leveraged Bond, and Recycled Monies disbursements, total disbursements in SFY 2014 including capitalized interest accrued and service fees accrued are \$33,333,804 (reference Exhibit 8), and administration disbursements are 4.80% of the total.

B. Modifications of Goals and Objectives

- The Final IUP listed eleven long term goals, and KDHE management of the KWPCRF reflected these goals. KDHE efforts are to manage the KWPCRF to provide a financing option attractive to local governments in constructing water pollution control projects of high priority to both the local and state governments, while protecting and maintaining the financial security of the revolving loan fund in perpetuity. KDHE anticipates a review and possible modifications to the long term goals of the program in development of the upcoming Intended Use Plans.
- The Final IUP also listed twelve short term goals, and KDHE has made progress in achieving these goals in FY '14. The KWPCRF continues to fund projects on a priority basis from the approved Project Priority List, while also offering low interest loan financing to nearly any and all projects for municipalities with population of 5,000 or less.

VI. PROPOSED IMPROVEMENTS

A. Modification of the Program

At the time of this FY '14 Annual Report, i.e. June 30, 2014, KDHE is concentrating on developing many smaller (i.e., less than \$1.0M), several mid-size (i.e., \$1.0M to \$10.0M), and several larger (i.e., over \$10 M) projects. As before, the Priority System targets projects on a watershed basis, with the Governor's Water Quality Initiative directing resources to the Kansas/Lower Republican basin and also the Lower Arkansas basin.

The Tax Increase Prevention and Reconciliation Act of 2005 (TIPRA) has had a significant effect on the cash flow management and future borrowing projections and timing of bond sale of the KWPCRF, with the result the bond sale schedules were significantly delayed. Also, the prior turmoil in the national credit markets continues to impact the daily routine and management of the KWPCRF. Daily operations and decision making as well as operating procedures have adjusted to these ongoing challenges to the management of the Program. With the passage of the ARRA significant additional Federal funding was available, but with significant additional administrative provisions. The FFY 2010, FFY 2011, FFY 2012, and FFY 2013 Federal funding also includes many of these new administrative and reporting provisions.

Also, Congress passed the 2014 Water Resources Reform and Development Act (WRRDA) on June 10, 2014, which provided amendments to Title I, Title II, Title V, and Title VI (the SRF program) of the Clean Water Act. This will require many, many changes to the KWPCRF program as well as the Loan Agreements and project funding efforts for water pollution control projects. Kansas will work to provide the changes necessary to continue to receive Capitalization Grants into the future, as well as continue to access the significant non-federal funds now "revolving" within this low interest loan fund. Significant changes to program documents and project procedures are expected as a result of WRRDA.

B. Long and Short Term Goals for Future IUP

KDHE will continue to pursue the short-term and long-term goals of the Program. The impending federal demands for changes to the state revolving fund programs will be difficult and demanding to administer. The new Master Financing Indenture allows the KWPCRF management team to better react and adjust to financial market. These issues and priorities will continue to be discussed and debated in the public hearing process of the Intended Use Plan.

The Kansas Surface Water Quality Standards continue to be updated with revisions adopted by regulation and the Total Maximum Daily Load documents continue to be finalized presenting new Waste Load Allocations, which drive NPDES effluent limitations and subsequent upgrades to wastewater treatment facilities. Even with the potential of delays for certain projects, all available funds in the KWPCRF are being fully utilized by the projects which are now voluntarily proceeding. KDHE will continue to encourage all necessary projects proceed with construction of upgrades and pollution control improvements.

KDHE completed the sale of additional State Match Bonds in December 2013, and will conduct an additional bond sale as necessary in the future for additional state match.

KDFA continues to provide services as required by the revenue bonds. Accounting and reporting services are provided by the Kansas Department of Administration. A three-party Inter-Agency Agreement is in place presenting the duties, responsibilities, and payments for services.

KDHE is continuing to develop and implement options to provide funding to Non Point Source (NPS) pollution control projects under the new Master Financing Indenture, following the current EPA funding opportunities which allow these types of projects to receive low interest loan funding through the linked-deposit program approach.

EXHIBIT 1 PART 1: SECTION 212 PUBLICLY OWNED TREATMENT WORKS

PROJECT NAME COMMUNITIES SERVED	PROJECT NUMBER	ASSIST AMOUNT	BINDING COMMIT DATE	CONSTRUCTION START DATE	INITIAL OPER DATE	* TYPE	INT RATE (a)	MATURE DATE

NOTE 1 - Summary of Significant Accounting Policies

A. Description of Program

The Kansas Water Pollution Control Revolving Fund (the Fund) was established pursuant to K.S.A. 65-3321 et seq in 1988 by the Kansas Legislature. The Fund was created to implement the State's participation under the Federal Clean Water Act as amended by the Federal Water Quality Act of 1987. Under Kansas law, the Secretary of the Department of Health and Environment (KDHE) administers the Water Pollution Control Revolving Loan Program (the Program). The Federal Act authorizes the Environmental Protection Agency (EPA) to award capitalization grants for deposit into state revolving funds in order to provide financial assistance for constructing publicly owned wastewater treatment facilities. The Program is the response by the State to federal law changes governing the development of publicly owned wastewater treatment works. The state revolving fund may be used to make loans, fund debt service reserves and provide other types of financial assistance to public entities. Initial funding for the Program is to be provided from the federal capitalization grants and state matching funds. The state matching funds must be equal to 20% of the federal capitalization grants. Under the Program, of the total amount to be deposited in a state revolving fund from federal capitalization grants and state matching funds, 83 1/3% is to be provided by federal capitalization grants and 16 2/3% is to be provided by state matching funds. The Fund is to be established, maintained and credited with repayments and the Fund equity is to be available in perpetuity for providing such financial assistance.

Loans are made to municipalities from the Fund for eligible project costs. Kansas Administrative Regulation 28-16-113 establishes the interest rates for the loans, together with fees set for servicing the loans, to be an amount equal to 60% of the previous three months' average "bond buyers 20 bond index" as published on Friday of each week for the preceding three months. KDHE administers those aspects of the Program relating to selection of projects and the making of loans to eligible municipalities. Kansas Development Finance Authority (KDFFA) issues revenue bonds for the state matching funds needed and for leveraged borrowing for the Fund. The Department of Administration administers the accounting and reporting aspects of the Program relating to the receipt and disbursement of monies within the Fund, including disbursement of loans to municipalities and billing and collecting of loan repayments. Moneys in the Fund are deposited with the Treasurer of the State of Kansas.

B. Measurement Focus, Basis of Accounting

The Fund is an enterprise fund of the State. The financial statements of the Fund are prepared on the accrual basis of accounting and on an economic resources measurement focus in accordance with accounting principles generally accepted in the United State of America. With this measurement focus, all assets and all liabilities are included on the statement of net position. The statement of changes in fund net position presents increases (revenues) and decreases (expenses) in net total position. Revenues are recognized when earned and expenses are recorded when liabilities are incurred. The statement of cash flows provides information about how the Fund meets the cash flow needs of its activities. Program management has decided that

this approach is necessary to demonstrate the success of the Program and to assure interested parties that the Fund will be available in perpetuity as intended.

C. Disclosure

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from estimates.

D. Net Position

Cash is considered the fund and account balances on deposit with the State of Kansas Treasurer even though these monies are invested as part of the State's idle funds pool and earn average daily balance interest. Cash also includes balances held by the Trustee, UMB Bank, na.

Investments include guaranteed investment contracts, fully flexible repurchase agreements and other investments as permitted by Master Bond Resolution No. 37, dated November 9, 1992, Supplemental Resolution No 37-a, dated January 8, 1993, Supplemental Resolution No. 37-b, dated July 7, 1995, Supplemental Resolution No. 37-c, dated January 7, 1997, Supplemental Resolution No. 37-d, dated May 1, 1998, Supplemental Resolution No. 37-e, dated May 7, 1999, Supplemental Resolution No. 37-f, dated November 5, 1999, Supplemental Resolution No. 37-g, dated December 3, 1999, Supplemental Resolution No. 37-h, dated January 7, 2000, Supplemental Resolution No. 37-i, dated August 17, 2001, Supplemental Resolution No. 37-j, dated October 4, 2002, Supplemental Resolution No. 37-k, dated May 6, 2004, Supplemental Resolution No. 37-l, dated July 14, 2005, Supplemental Resolution No. 37-m dated July 10, 2008, Supplemental Resolution No. 37-n dated November 6, 2008, Supplemental Resolution No. 37-o dated March 5, 2009, Supplemental Resolution No. 37-p dated November 4, 2010, Master Financing Indenture dated November 1, 2010, the First Supplemental Financing Indenture dated December 15, 2010, the Second Supplemental Financing Indenture dated May 15, 2011, the Third Supplemental Financing Indenture dated November 1, 2012 and the Fourth Supplemental Financing Indenture dated January 15, 2013.

Receivables include interest earnings, current loan repayments due and loan principal balances outstanding. All receivables are considered collectable, therefore, no allowance account has been established.

Net position represents the difference between assets and liabilities. Net position invested in capital assets, net of related debt, consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowings used for the acquisition, construction or improvement of those assets. Currently the fund has no net position invested in capital assets. Net position is reported as restricted when there are limitations imposed on their use. All assets of the program have been determined to be restricted in accordance with the conditions of the Water Pollution Control capitalization grants and bond covenants. Restricted net position includes EPA capitalization grants restricted for loans to municipalities and for

program administration expenses. The amount of capitalization grants restricted for program administration is being recognized as revenue when earned.

The statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The Fund only has one item that qualifies for reporting in this category. It is the deferred amounts on refunding reported in the statement of net position. A deferred amount on refunding results from the difference in the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt. In addition to liabilities, the statement of net position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The Fund has no items that qualify for reporting in this category.

In previous years, bond issuance costs were classified as assets and amortized over the life of the bonds using the straight line method. With the implementation of GASB Statement No. 65, bond issuance costs are to be recognized as an expense in the period incurred. The provisions of this statement are to be applied retroactively to the earliest period presented in the financial statements. The beginning net position for fiscal years ended June 30, 2014 and June 30, 2013 have been restated to retroactively apply the provisions of this statement. The beginning net position for the earliest period has been adjusted.

The Fund revenues consist of operating and nonoperating revenues. Operating revenues include: 1) interest earned on loans, 2) federal grant dollars earned for administrative costs, 3) loan service fees and 4) interest subsidy on the 2010 SRF-1 bonds. Nonoperating revenues include investment income on bond reserves and other invested program moneys, federal grant dollars drawn for loans and any other revenues not classified as operating revenues.

The Fund expenses consist of operating and nonoperating expenses. Operating expenses include: 1) administrative costs and 2) loan principal forgiveness. Nonoperating expenses include: 1) revenue bond interest, 2) revenue bond premium and discount amortized, and 3) bond defeasance costs.

NOTE 2 - Long-Term Debt

The balances of Revenue Bonds issued by Kansas Development Finance Authority at the fiscal year end are as follows:

2001 Series II		\$ 141,045,000
Less Bonds Paid	5.50%	(63,295,000)
Less Bonds Defeased		(37,250,000)

2028	4,295,000	875,996	5,170,996
2029	4,795,000	620,658	5,415,658
2030	5,645,000	335,595	5,980,595
	\$ 237,185,000	\$ 67,529,836	\$ 304,714,836

NOTE 3 – Arbitrage Rebate

In accordance with Internal Revenue Code Section 148(f) relating to arbitrage restrictions on tax-exempt bonds, there is currently no rebate liability for the 2001, 2004, 2005, 2008, 2010, 2013 or 2013-2 bonds.

NOTE 4 - Federal Capitalization Grants

Ninety-six percent of the federal capitalization grants awarded by the EPA are to be loaned out to municipalities. Up to four percent of the capitalization grants may be spent on Program administration. Management of the Fund has determined that the entire four percent will be spent on administration as evidenced by the budget page of each grant agreement. Therefore, as administration funds are drawn down, Fund equity is reduced and Program administration grant revenue is recognized.

Federal capitalization grants awarded through the year end are as follows:

Federal Fiscal Year	Loans	Program Administration	Total Grant
1989 Grant Award	\$ 8,431,725	\$ 351,322	\$ 8,783,047
1990 Grant Award	8,714,020	363,084	9,077,104
1991 Grant Award	17,783,600	740,983	18,524,583
1992 Grant Award	16,836,716	701,530	17,538,246
1993 Grant Award	16,655,190	693,966	17,349,156
1994 Grant Award	10,334,364	430,599	10,764,963
1995 Grant Award	10,673,182	444,716	11,117,898
1996 Grant Award	17,482,935	728,451	18,211,386
1997 Grant Award	5,359,104	223,296	5,582,400
1998 Grant Award	11,668,441	486,185	12,154,626
1999 Grant Award	12,050,539	486,225	12,536,764
2000 Grant Award	11,629,920	484,577	12,114,497
2001 Grant Award	11,526,451	480,269	12,006,720
2002 Grant Award	11,552,112	481,338	12,033,450
2003 Grant Award	11,477,030	478,210	11,955,240
2004 Grant Award	11,483,968	478,499	11,962,467
2005 Grant Award	9,335,904	388,996	9,724,900
2006 Grant Award	7,568,736	315,364	7,884,100
2007 Grant Award	9,272,064	386,336	9,658,400
2008 Grant Award	5,860,032	244,168	6,104,200
2009 Grant Award	5,860,128	244,172	6,104,300
2009 Grant Award - ARRA	33,959,232	1,414,968	35,374,200
2010 Grant Award	17,655,360	735,640	18,391,000
2011 Grant Award	12,794,880	533,120	13,328,000
2012 Grant Award	12,246,720	510,280	12,757,000
2012 Grant Award	<u>11,568,960</u>	<u>482,040</u>	<u>12,051,000</u>
	319,781,313	13,308,334	333,089,647
Less cumulative amounts drawn Down	<u>(296,717,429)</u>	<u>(8,665,212)</u>	<u>(305,382,641)</u>
	23,063,884	4,643,122	27,707,006
Less amounts drawn down during Fiscal Year 2014	<u>(23,063,884)</u>	<u>(473,433)</u>	<u>(23,537,317)</u>
Balance Available	<u>\$ 0</u>	<u>\$ 4,169,689</u>	<u>\$ 4,169,689</u>

As of June 30, 2014, \$4,169,689 of the capitalization grants had not been drawn down.

SFY '13 and SFY '14 SRF Audit Findings and Responses

A final copy of the Independent Auditors Report of the KWPCRF for the Fiscal Year ended June 30, 2014, is not yet available. The SFY '13 Auditors Report is now posted on the KDHE website at <http://www.kdheks.gov/muni/index.htm> (37 pages).

The KWPCRF is a major program, and so is being reviewed in the SFY '14 Single Agency Audit, and the Report is not yet available. The KWPCRF was reviewed in the SFY '13 Single Agency Audit. The State of Kansas Single Audit Report for SFY '13 is available on the Kansas Legislative Division of Post Audit website located at <http://www.kslpa.org/docs/reports/R-14-008.pdf> .

Program: Kansas 2012 Clean Water State Revolving Loan Program
Grant Number: CS 200001 12
Re: Federal Financial Report

Dear Mr. Puglisi:

Attached is the final Federal Financial Report for the grant listed above. This report covers the budget period September 1, 2012 thru March 31, 2014.

Should you have any questions, please contact Cathy Colglazier, Fiscal Officer, at 785-296-1625.

Sincerely,

A handwritten signature in black ink that reads "Robert Moser, MD". The signature is written in a cursive style with a large, sweeping flourish at the end.

Robert Moser, MD,
Secretary

Paperwork Burden Statement
 According to the Paperwork Reduction Act, as amended, no persons are required to respond to a collection of information unless it displays a valid OMB Control Number. The valid OMB control number for this information collection is 0348-0061. Public reporting burden for this collection of information is estimated to average 1.5 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0060), Washington, DC 20503.

Department of Health & Environment

Sam Brownback, Governor

February 28, 2014

Las Vegas Finance Center
U.S. Environmental Protection Agency
PO Box 98515
Las Vegas, NV 89193-8515

To Whom It May Concern:

Enclosed are revised final Federal Financial Reports for the two grants listed below. The FFRs were revised to reflect the Program Income Earned and Spent.

CS 200001 10	FY 2010 Clean Water State Revolving Loan Fund Program
CS 200001 11	FY 2011 Clean Water State Revolving Loan Fund Program

Should you have any questions, please contact Cathy Colglazier, Fiscal Officer, at 785-296-1625.

Sincerely,

A handwritten signature in black ink that reads "Robert Moser, MD".

Robert Moser, MD,
Secretary

Attachment 3

The KDFB Independent Audit Report is available on the KDFB website located at <http://kdfb.org/> hover over "ABOUT KDFB", and click on "Audit".

Attachment 4

Environmental Benefits Matrix
(6 pages)

CBR Reports Information
(17 pages)

included in Attachment 6. In FY 2011, EPA will provide, as needed, additional technical assistance.

D. Reporting Requirements

The conference report (H. Rpt. 111-316, at 166) for the FY 2010 Appropriation directs EPA and the States not only to track how additional subsidies are used, but also "by what types of communities." The language of the FY 2010 conference report carries forward for FY 2011. States shall report quarterly in the CWSRF Benefits Reporting (CBR) and DWSRF Project Benefits Reporting (PBR) systems on the use of all SRF funds. This information will also need to be included in the Annual Report. Quarterly reporting shall include use of the funds for the GPR and Additional Subsidization as described in D1 below, as well as information on the environmental benefits of SRF assistance agreements, as described in D2.

1. Data Elements

For both SRFs, the CBR/PBR and the Annual Report must contain information on the progress made in meeting the GPR and Additional Subsidization requirements.

For all projects that receive additional subsidization, the following data elements must be entered quarterly into CBR/PBR and, a list containing the following information must be included in State Annual Reports. (Additional clarification on the items listed below is provided in CBR/PBR.)

- a. Assistance Recipient Name
- b. Total amount of SRF assistance provided
- c. Project name and identification number
- d. Project Location
- e. Type of additional subsidy (grant, principal forgiveness, negative interest).
- f. Amount of additional subsidy

g. Y/N – Would the recipient have been able to afford a loan without the additional subsidy (Using the States' own criteria for making this determination, such as use of their SRF loan evaluation criteria)?

h. Characteristics of the community served by the project - population of communities (based on NIMS categories)

For projects that receive funding under the Green Project Reserve, a list of projects that includes the following information must be included in the Annual Report and entered into CBR/PBR. (Additional clarification on the items below is provided in CBR/PBR.)

a. Assistance Recipient Name

b. Total amount of SRF assistance provided

c. Project name and identification number

d. Type of project (green infrastructure, water efficiency, energy efficiency, environmentally innovative).

e. Amount of SRF funding for GPR portion of the project

f. Of the total amount of GPR funding, the amount of subsidy provided (if any)

g. A brief description of the project (i.e., rain garden, renewable energy at POTW, water efficient fixtures).

h. Population served by the project (not required for CWSRF nonpoint source projects)

2. Environmental/Public Health Benefits Reporting

In 2005, all 51 CWSRF programs agreed to use a suite of environmental indicators to show how their CWSRF projects impact water quality and public health. The CBR system was developed based on these indicators: States shall report quarterly in CBR on the environmental benefits of all assistance agreements. The specific required data elements are listed in Attachment 7.

In FY 2010, the DWSRF program identified project level data to be reported quarterly to the Drinking Water Project and Benefits Reporting System (PBR) for the base program. These data elements will be used for states' quarterly reporting in FY 2011. The data elements are identified in Attachment 8 and will be used for reporting environmental/public health benefits of DWSRF assistance agreements.

3. Annual Report/ CBR/PBR

The CBR and PBR are the best available means of comprehensively tracking project-level information on a real-time basis. The data elements identified in Section D1 have been added to the existing data elements in the CBR/PBR systems. The CBR/PBR forms must be completed quarterly, starting with the first quarter in which the assistance agreement is made.

The data elements identified in Section D1 and Attachments 7 and 8 must also be reported in the Annual Report. Summary reports, compiling the quarterly data, can be generated by CBR/PBR and may be included as an attachment to the Annual Report to meet this reporting requirement.

Attachment 7: CWSRF Benefits Reporting Data Elements

Environmental Benefits Data Fields	Required/Optional
Borrower	required
Loan Execution Date	required
Tracking #	required
Other Tracking Number	optional
Assistance Type	required
Effective Interest Rate	required
Incremental Funding	optional
Phase #	optional
Original Tracking #	optional
CWSRF Assistance Amount	required
Repayment Period	required
Final Amount (checkbox)	required
% Funded by CWSRF	required
Same Environmental Results checkbox	optional
CWSRF Total From All Projects	required
Check if loan funds one or more NPS project(s)	required
Total NPS projects	required
CW Needs Survey Number	optional
If applicable, the number of NPS projects	required
Project Description	required
Facility Name	required
Population Served By the Project	required
Population Served By the System	required
Wastewater Volume (Design Flow) for the project	required
Wastewater Volume (Design Flow) for the system	required
Wastewater Volume (Design Flow) eliminated/conserved by this project	required
Needs Categories	required
Discharge Affected	required
NPDES Permit Number/No NPDES Permit	required
Other Permit Type	optional
Other Permit Number	optional
Waterbody Name (Primary Impacted)	required
Waterbody ID (Primary Impacted)	optional
Waterbody Name (Other Impacted)	optional
Waterbody ID (Other Impacted)	optional
Receiving Waterbody	required
State Waterbody ID	optional
Project Location (lat/long)	optional
Contributes to Water Quality... Improvement/Maintenance	required
Allows the System to... Achieve Compliance/Maintain Compliance	required
Affected Waterbody is... Impaired/Meeting Standards	required
Allows the System to Address... existing TMDL/Projected TMDL/Watershed Management Plan	required
Designated Surface Water Uses	required
Other Uses and Outcomes	optional
Project Comments	optional

Sources and Distribution of Loan Service Fees
(3 pages)

MEMORANDUM

DATE: September 16, 2014

TO: KWPCRF General 2.1 File

FROM: Rodney R. Geisler, P.E., Chief, Municipal Programs

SUBJECT: Supplemental Document for SFY 2014 Annual Report
Sources and Uses of Loan Service fees

Several years ago in a Memo entitled "Guidance on Fees Charged by States to Recipients of Clean Water State Revolving Fund Program Assistance" dated October 20, 2005; EPA presented a policy memo regarding CW SRF service fees to clarify when service fees earned on loans are considered "program income" and when these are not "program income". Determining the amounts of Program Income and Expenses for each of the three categories of service fee income as presented in the EPA Memo is a time consuming and detailed review, and is presented on the attached spreadsheet "Sources and Distribution of Loan Service Fees". This memo serves as an up to date "procedures guideline" being used for the Kansas Water Pollution Control Revolving Fund (KWPCRF).

Service fees are earned on all loans funded by any source of funds in the KWPCRF.

Program Income is any service fee earned on federal funds paid to any loan.

Program Income Earned During the Grant Period is any service fee earned on federal funds paid to any loan in the KWPCRF during the time period the individual Capitalization Grant is still open, that is, up to the date the FFR (Federal Financial Report) is prepared and dated, and signed by the Secretary.

Program Income Earned After the Grant Period is any service fee earned on federal funds paid to any loan in the KWPCRF after the time period the individual Capitalization Grant is still open, that is, after the date the FFR (Federal Financial Report) is prepared and dated, and signed by the Secretary, thru the end of the repayment period of each loan that received federal funds.

Non-Program Income is any service fee earned on the non-federal funds used for payments to loan agreements. This includes state match bond funds, leveraging bond funds, and "recycled" funds from repayments of prior loan agreements.

KDHE staff in conjunction with Department of Administration staff have prepared a spreadsheet of all loans, showing the federal funds (and other source funds) paid to CW

SRF loans. A determination is made which loans have received payments with funds from cap grants. If the cap grant is not yet closed (the FFR is not yet completed) these fees are Program Income Earned During the Grant Period. If the cap grant has been closed (the FFR has been completed) these fees are Program Income Earned After the Grant Period. Sometimes the service fee on cap grant funds can be “½ and ½” during and after the grant period. This spreadsheet up thru SFY 2014 is attached.

Expenses paid with KWPCRF service fees can be and are used first in support of the KWPCRF program, and also then in support of the “106 program” to administer the NPDES water quality program. These expenses may include any typical expense of administering a funding/construction program, and any typical expense of administering an enforcement/technical assistance program such as salaries and fringe benefits, travel, rent, office supplies and equipment, communications, technical and financial association fees and conferences, and technical assistance contracts.

All KWPCRF service fees earned and spent for expenses are reviewed by the KWPCRF program management staff. In accordance with the advice provided by the auditors conducting the Independent Financial Audit of the KWPCRF program many years ago, monthly reports of service fee expense expenditures charged to Program Administration (the 603(d)(7) administrative funds from the cap grants) and to the KWPCRF Service Fees are extracted from the computer accounting database and reviewed. This review is to assure the expense is properly assigned as a KWPCRF expense spent in support of the KWPCRF program administration, or as a Water Quality related 106 Program NPDES expense. Individual expenses paid from CW SRF Service Fee Account 7531 could be either Program Administration (PA) or Water Quality related (WQ), and the printed out reports are marked accordingly.

Salaries are now recorded and paid through a computerized database “SMART” (the Statewide Management, Accounting, and Reporting Tool), and that information is utilized in the Summary. Indirects are also automatically billed, and the info from the SMART database is utilized.

EPA requires the Program Income Earned During the Grant Period be used only for SRF Program Administration, and that is what is happening. EPA also requires the Program Income Earned After the Grant Period be used first for SRF Program Administration, and that is what is happening, although these funds can also be used for Water Quality related expenses with the approval of EPA. Non-Program Income can be used for any Water Quality related expense, similar to “106 Program” funding, and this is what is happening.

Typically, the service fees spent for Program Administration in support of the SRF program exceeds the Program Income Earned During the Grant Period. The remaining service fees spent are Water Quality related expenses in support of the NPDES program. EPA Region 7 has approved the use of SRF service fees for salaries and expenses for Water Quality related expenses in prior written correspondence.

Attachment – Spreadsheet of Service Fees and Expenses

All prime awardee data as reported by agencies. The assistance prime awardee data includes agency submissions as of 08/24/2014 and the contracts prime awardee data includes procurement data downloaded from FPDS as of 08/25/2014. Please note that availability of DOD contracts prime awardee data is delayed by 90 days to protect operations tempo. All Sub-awardee data is based on prime awardee submissions from FSR5, for sub-contracts as of 08/24/2014 and for sub-grants as of 08/24/2014. For more information about the data, data sources, and data timeliness, please see Learn.

The quality procurement data is maintained by the federal agencies by annual verification and validation of their data in FPDS. For more information on how the quality is maintained and what the government is doing in ensuring the quality please see (PDF).
