DIVISION OF ENVIRONMENT
BUREAU OF ENVIRONMENTAL REMEDIATION
ASSESSMENT & RESTORATION SECTION**

**ANNUAL PROGRAM REPORT
FOR THE
VOLUNTARY CLEANUP AND PROPERTY REDEVELOPMENT PROGRAM**

Pursuant to the requirements of K.S.A. 65-34,161 et seq.

ACTIVITIES FROM DECEMBER 1, 2013 TO NOVEMBER 30, 2014

BACKGROUND

The Voluntary Cleanup and Property Redevelopment Act was enacted by the Kansas Legislature on July 1, 1997 (Kansas Statutes Annotated 65-34,161 through 65-34,174). The purpose of the Act is to allow voluntary cleanups of contaminated properties with oversight by the Kansas Department of Health and Environment to promote the transfer, redevelopment, and reuse of contaminated properties and protect public health and the environment. Article 71 of Kansas Administrative Regulations, specifically K.A.R. 28-71-1 through 28-71-12, was promulgated on June 26, 1998, officially establishing the Voluntary Cleanup and Property Redevelopment Program (VCPRP). The law and program are administered by the Kansas Department of Health and Environment (the “Department”).

Under the VCPRP, voluntary parties with properties meeting the statutory criteria of low to medium priority and minimal risk can receive a “no further action” (NFA) determination from the Department. An NFA provides some protection from potential environmental liability. Properties that are adjacent to contaminated sites but did not contribute to the contamination may also receive a no further action determination. The VCPRP uses a streamlined approach to investigate and cleanup properties in an expeditious manner, thereby encouraging the redevelopment or enhancement of such properties. Clearly defined cleanup standards identifying the extent of cleanup have been developed and are provided to the voluntary party early in the program so that time and costs involved in cleanup can be determined. The VCPRP is truly voluntary and is designed for industries and businesses to properly address contamination on their properties through a private/state partnership. There are no additional burdens or requirements on voluntary parties participating in the program.

A Memorandum of Agreement (MOA) between KDHE and Region VII of the United States Environmental Protection Agency (USEPA) became effective March 2, 2001. The MOA provides USEPA’s acknowledgment of the adequacy of the Kansas VCPRP program and also provides assurances to voluntary parties that there will be no federal involvement at properties properly addressed within the VCPRP. The additional assurance from USEPA enhances the Department’s actions in issuing an NFA determination letter in terms of relieving environmental liability.

REPORT SUMMARY

In accordance with K.S.A. 65-34,173, the Department shall publish annually in the Kansas Register a summary of the number of applicants, the general categories of those applicants and the number of cleanups completed pursuant to this act. This annual report describes the activities accomplished by the Department in the VCPRP for the period of December 1, 2013, to November 30, 2014.

Since the inception of the Voluntary Cleanup Program on July 1, 1997, the Department has received a total of 675 completed application packages of which 664 properties have been determined eligible to participate in the program. A total of 654 voluntary agreements have been signed. Investigations have been initiated and/or completed at 569 properties. Currently, 235 properties are in one of three cleanup phases: the preliminary proposal stage, planning stage, or the active cleanup stage. Cleanups have been successfully completed at 79 properties.

A total of 7 new applications were received by the VCPRP during the past 12 months. The number of applications received is expected to increase as the economic climate continues to improve and KDHE implements change to improve program efficiencies.

NFAs are issued for properties at various points in the VCPRP process, including: 1) following cleanup of contamination; 2) following investigation that indicates no, or insignificant contamination present; and 3) when a property is impacted, but the contamination is determined to have originated from an off-property source. Twenty-four (24) NFAs were issued by the Department for the 2014 calendar year. To date, the Department has issued a total of 272 NFA letters (41% of total signed voluntary agreements). The NFA total encompasses 2,942 acres of property in the State of Kansas where environmental concerns have been addressed through the Voluntary Cleanup Program.

Approximately 74% of the properties participating in the VCPRP are from three industrial categories, including agri-business (29%), oil and gas (25% of the total), and manufacturing (20%). Participation by other categories includes commercial (14%), railroad (6%), government (3%) and private citizen (3%). Approximately 77% of all properties participating in the VCPRP involve groundwater contamination, which typically requires a longer cleanup period.

Tables 1 and 2 below summarize the number of applicants, the general categories of those applicants and the number of voluntary actions completed pursuant to K.S.A. 65-34,161 through 65-34,174. Figure 1 depicts the percentage of applications received relative to applicant category and Figure 2 depicts the cumulative voluntary actions within the VCPRP.

During this annual reporting period, KDHE requested and received input from industry on current VCP statutes, regulations and policies. KDHE hosted two meetings with stakeholders to evaluate and discuss potential changes and improvements to the program. Statute revisions are currently pending introduction to the legislature in 2015.

**TABLE 1
SUMMARY OF APPROVED VOLUNTARY APPLICATIONS**

Applicant Category	Contaminant Class Category*				Total Applications
	Class I	Class II	Class III	Class IV	
Agri-Business	3	22	86	80	191
Industry	18	16	62	38	134
Commercial	30	13	42	12	97
Oil/Gas Related	0	28	82	57	167
Governmental Entity	1	8	9	3	21
Private Citizen	7	6	2	1	16
Railroad Related	0	1	22	15	38
Class Category Total	59	94	305	206	664

***Definition of Classes:**

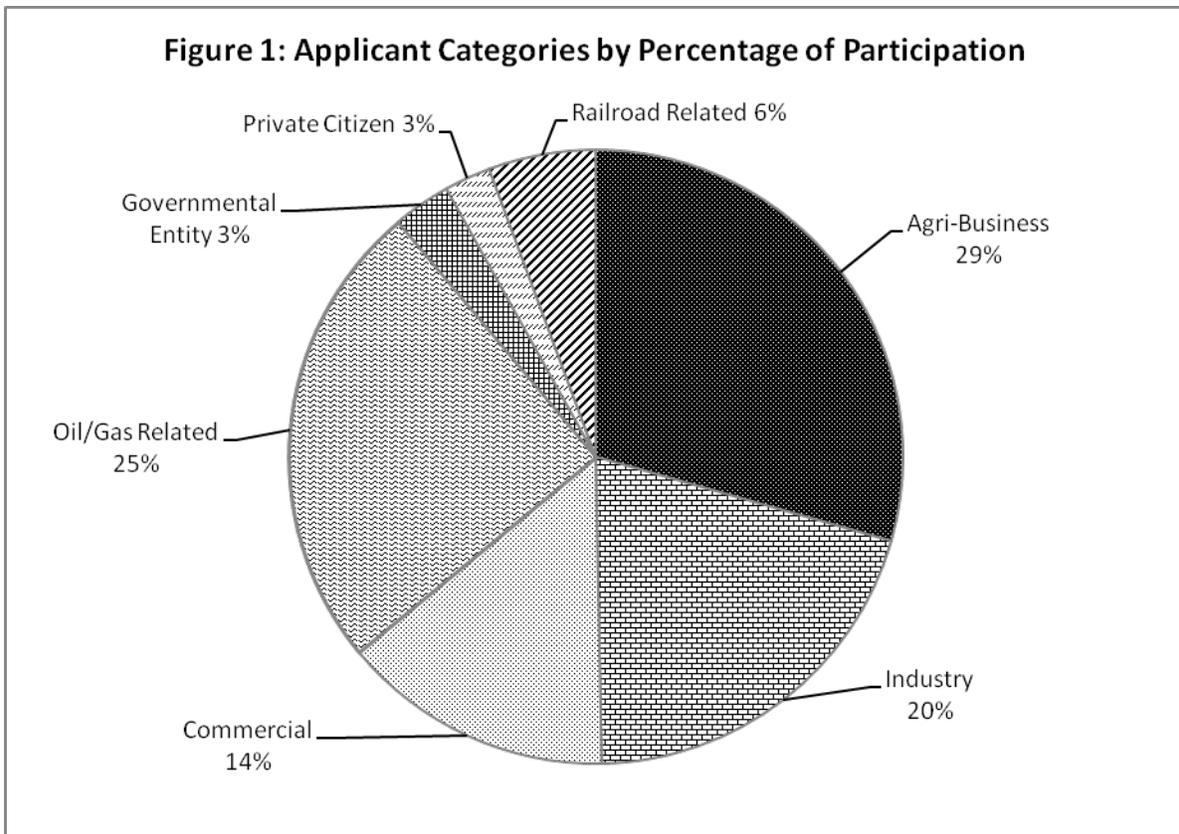

Class I - means suspected or confirmed contamination is determined to exist on the eligible property, and the eligible property is not a source of contamination or is located adjacent to a property with a known source of contamination.

Class II - means suspected or confirmed soil contamination is determined to exist on the eligible property, there is no known or suspected soil contamination migrating off the eligible property and there is no known or suspected ground water contamination.

Class III - means suspected or confirmed soil or ground water contamination, or both, is determined to exist on the eligible property, and there is no known or suspected soil or ground water contamination that has migrated off the eligible property.

Class IV - means suspected or confirmed soil or ground water contamination, or both, and the contamination exists on and off the eligible property.
