Testimony on House Bill 2547
to
House Committee on Agriculture and Natural Resources
by John Mitchell
Director, Division of Environment
February 12, 2014

KDHE appreciates this opportunity to provide testimony in support of House Bill 2547. This bill was introduced by the department to reduce the number of copies of maps to be included in new coal mining applications submitted to the agency. Some other language within the statute has also been cleaned up in the proposed amendment. The bill will not impact the operation of the program or create a fiscal impact on the agency.

I thank you for the opportunity to appear before the House Committee on Agriculture and Natural Resources and will gladly stand for questions the committee may have on this topic.
