Tobacco use is the leading cause of preventable death and disease in Kansas.

As a health care provider, you can help.

An interactive, online course for health care providers demonstrating a “brief tobacco intervention” providers can use with patients who use tobacco products.

FACT:
Tobacco dependence is a chronic disease that often requires repeated intervention and multiple attempts to quit.*

FACT:
Effective treatments are available that can significantly increase rates of long-term abstinence.*

Continuing education credits have been approved for dentists, dental hygienists, physician assistants, doctors of medicine and surgery, and doctors of osteopathic, chiropractic and naturopathic medicine.

► Free training available online 24/7
► Takes about 30 minutes to complete
► Based on national clinical guidelines
► Appropriate for any member of the health care team including front office staff and clinical care staff
► Online at kstobaccointervention.org

Addressing Tobacco Use in Kansas: Brief Tobacco Intervention Online Training

Based on Clinical Practice Guidelines

The training content is based on national clinical guidelines on effective clinical treatments and practices for tobacco dependence*. These guidelines are based on an extensive body of research published during the last 30 years:

**Tobacco dependence treatments**

► clinically effective across a broad range of populations
► cost-effective
► includes brief tobacco interventions

**Medication**

► effective when used by itself
► more effective when used with counseling

**Counseling**

► individual, group and telephone counseling are effective
► individual, group and telephone counseling’s effectiveness increases with treatment intensity

### Training Content

Step-by-step demonstrations of the intervention and making a referral to the Kansas Tobacco Quitline at 1-800-QUIT-NOW (1-800-784-8669) for free telephone counseling
