

Holcomb Common Facilities, LLC.

Industrial Solid Waste Landfill

PERMIT NO. 420

SPECIAL CONDITIONS

- 1) Waste disposal in this landfill shall be limited to the following materials:
 - a) coal combustion by-products generated **on-site** at the industrial facility,
 - b) industrial waste streams generated **on-site** at the industrial facility that have been approved for disposal in the site-specific Operations Plan.
- 2) The facility operations shall be in compliance with the approved site-specific **Operations Plan**.
- 3) Construction of the phases shall be subject to a site-specific **Construction Quality Assurance (CQA) Plan** prepared by a licensed Kansas Professional Engineer and approved by the Bureau of Waste Management of the Kansas Department of Health and Environment. The CQA engineer shall certify the construction and submit the certification to KDHE for review and approval prior to disposal of waste in the certified phase.
- 4) The permittee shall ensure that the approved Groundwater Monitoring System and associated **Sampling and Analysis Plan** have been reviewed and approved by the Bureau of Waste Management for applicability to a phase being constructed for disposal of waste, prior to disposal in that phase.
