Date

Additional Product information

This is a loose fill product that can be easily installed for any depth. This product is less expensive than the mulch but is very effective for the safety of the children. It has replaced wood chips and pea gravel for many years and worked out very well.

No Fault Sport Group, LLC
Product Manufacturer

11/30/11
Date

Additional Product Information

No Fault Safety Surface has two layers and is installed in various depth depending on the applicable critical fall height of the playground equipment. The top layer, or wear course, is comprised of EPDM rubber, which does not contain waste tires and makes up .375" of each installed surface. The bottom layer, or base mat, is comprised of SBR Rubber, which is 100% recycled waste tires. The depth of the base mat will vary depending on the total depth needed to meet the applicable critical fall height. Therefore, the weight of SBR used in each installation, thus the number of waste tires used in each installation, will vary as well. Attachment 1 provides the SBR weight & number of tires used to install one square foot of No Fault Safety Surface at each depth we currently have ASTM F1292 testing for.

Documentation has been provided from our SBR supplier, International Mulch Company, to verify the use of Kansas Waste Tires in the base mat installation of No Fault Safety Surface.

Please note that No Fault Safety Surface must be installed with both layers in order for the test results provided to be compliant with ASTM F2192.

Notes on Vendor/Distributor

Authorizations or Restrictions

(Use the next page to list ALL of the authorized vendors/distributors of these products)

No Fault Sport Group, LLC is the manufacturer of the No Fault Safety Surface product. We do sale the product direct to end users, but also utilize a system of Distributors / Sales Reps. A list of authorized Distributors / Sales Reps. as been provided on the form provided.

Regardless of who the end user purchases this product from, No Fault Sport Group will arrange and provide the installation. Every No Fault Safety Surface installation is performed by a a trained and certified No Fault Sport Group installation crew.
