

mow & go

Leaves are a valuable resource that many property owners let go to waste every fall. As a homeowner, landscaper, or property manager, are there better options? Yes! Mulching (shredding) in-place is the best and simplest solution. It is easy to learn, easy to implement, and better yet, actually saves time & money!

Saves money: Reduce the money you spend on fertilizer by using natural fertilizer: leaves! Also reduce costs of landscape bags and the additional cost of disposal, if any.

Saves effort: Mulching leaves in place is easier and faster than bagging, raking or blowing them to the curb.

Keeps your property healthy: Recycles nutrients into your soil to feed your lawn & plants, improves soil health, and helps retain moisture.

Helps the environment: Transporting and disposing of leaves from your curb wastes energy and contributes to pollution.

By now you're thinking, "OK, I'm sold! So how do I mulch-in-place? What's the secret?" Check out the valuable information, a "how to" video and related resources on the **Mow & Go website** kdheks.gov/waste/mowandgo.html
