**Re:** Class 1a Permit Modification to Change Reverse Osmosis Unit Installation Date  
Koch Nitrogen Company, Dodge City  
EPA ID# KSD044625010

Dear Mr. LeRock:

In a letter dated February 6, 2007 address to the Kansas Department of Health and Environment (KDHE), Koch Nitrogen Company (KNC) requested directions to change permit documents to reflect the accurate installation date for the reverse osmosis unit at the Dodge City facility. This task can be accomplished through a Class 1a permit modification. To initiate the process, submit revised pages to the permit application documents along with highlight/strikeout copies. KDHE will then make the necessary modifications to the permit and forward revised pages to KNC. Following approval, KNC must also notify the mailing list of the modification.

If you have any questions or concerns, you may contact me at [espellma@kdhe.state.ks.us](mailto:espellma@kdhe.state.ks.us) or (785) 296-1616.

Sincerely,

Everett Spellman
