and Environment**

**Notice of Hearings**

The Kansas Department of Health and Environment has prepared eight Total Maximum Daily Loads (TMDLs) for streams in the Smoky-Hill-Saline and lower Solomon River Basins that are impaired by not meeting state water quality standards. These TMDLs address impairment issues that KDHE has identified with the help of the Basin Advisory Committees and represents the third round of TMDLs for waters in the Smoky-Saline Basin since 2004. The TMDLs presented for public review follow:

**Smoky Hill Saline River Basin:**

1. Smoky Hill River near Mentor — Total Suspended Solids
2. Smoky Hill River near Mentor — E. Coli Bacteria
3. Smoky Hill River at Junction City — Total Suspended Solids
4. Big Creek, Smoky Hill River near Russell, and Landon Creek near Russell — Total Phosphorus
5. Big Creek — Total Suspended Solids
6. Big Creek — E. Coli Bacteria
7. Big Creek — Nitrate

**Lower Solomon River Basin:**

1. Solomon River at Niles — Total Suspended Solids

These TMDLs are available for review at the Kansas Department of Health and Environment TMDL Web site at <http://www.kdheks.gov/tmdl/index.htm>. Additionally, copies of the TMDLs can be obtained by contacting the Bureau of Water, Watershed Planning Section, at (785) 296-8791.

Two public hearings are scheduled to take testimony from interested parties. The hearings are scheduled as follows:

**February 10, 2 p.m.**

Hays Convention and Visitors Bureau  
(Hays Welcome Center)  
2700 Vine St., Hays

**February 11, 10:30 a.m.**

City of Assaria City Hall  
315 E. Main St., Assaria

The first portion of the hearing will be a briefing by the Watershed Planning Section, outlining each of the TMDLs. The public record for these TMDLs will be held open until February 24. After reviewing the testimony and public comments, KDHE will make any appropriate revisions to the TMDLs and will submit them to Region VII of the U.S. Environmental Protection Agency.

Any individual with a disability may request accommodation in order to participate in the public hearing process and may request the proposed TMDLs in an accessible format. Requests for accommodation should be made at least five working days in advance of the hearing by contacting KDHE.

In the event of inclement weather this hearing will not be rescheduled, in which case comments will need to be submitted in writing. Requests, questions or written comments should be directed to Tom Stiles, KDHE, Watershed Planning Section, 1000 S.W. Jackson, Suite 420, Topeka, 66612-1367, (785) 296-6170 or fax (785) 291-3266, or e-mail at [tstiles@kdheks.gov](mailto:tstiles@kdheks.gov).

**Notice of Hearing**

The Kansas Department of Health and Environment has prepared two Total Maximum Daily Loads (TMDLs) for streams and lakes in the Upper Republican River Basin and three TMDLs for streams in the Solomon River Basin that are impaired by not meeting state water quality standards. These TMDLs address impairment issues that KDHE has identified with the help of the Basin Advisory Committees and represents the second round of TMDLs for waters in the Solomon Basin since 2003 and the third round of TMDLs for waters in the Upper Republican Basin since 2003 and 2006. The TMDLs presented for public review follow:

**Upper Republican Basin:**

1. Upper Prairie Dog Creek and Norton Lake — Total Phosphorus and Eutrophication (revision to existing Eutrophication TMDL)
2. Lower Prairie Dog Creek — Total Phosphorus

**Solomon Basin:**

1. North Fork Solomon River at Portis — E. Coli Bacteria
2. South Fork Solomon River near Osborne — E. Coli Bacteria

## Request for Comments

The Kansas Department of Health and Environment is soliciting comments regarding a proposed air quality operating permit. City of Anthony-Anthony Municipal Power Plant has applied for a Class I operating permit renewal in accordance with the provisions of K.A.R. 28-19-510 et seq. The purpose of a Class I permit is to identify the sources and types of regulated air pollutants emitted from the facility; the emission limitations, standards and requirements applicable to each source; and the monitoring, record keeping and reporting requirements applicable to each source as of the effective date of permit issuance.

City of Anthony-Anthony Municipal Power Plant, Anthony, owns and operates a municipal power plant located at 71D S.W. 20 Road, Anthony.

A copy of the proposed permit, permit application, all supporting documentation and all information relied upon during the permit application review process is available for a 30-day public review during normal business hours at the KDHE, Bureau of Air, 1000 S.W. Jackson, Suite 310, Topeka; and a copy of the proposed permit can be reviewed at the KDHE South Central District Office, 130 S. Market, Suite 6050, Wichita. To obtain or review the proposed permit and supporting documentation, contact Lynelle Ladd, (785) 296-1719, at the KDHE central office; and to review the proposed permit only, contact David Butler, (316) 337-6042, at the KDHE South Central District Office. The standard departmental cost will be assessed for any copies requested.

Direct written comments or questions regarding the proposed permit to Lynelle Ladd, KDHE, Bureau of Air, 1000 S.W. Jackson, Suite 310, Topeka, 66612-1366. In order to be considered in formulating a final permit decision, written comments must be received before the close of business February 22.

A person may request a public hearing be held on the proposed permit. The request for a public hearing shall be in writing and set forth the basis for the request. The written request must be submitted to Sharon Burrell, Bureau of Air, not later than the close of business February 22 in order for the Secretary of Health and Environment to consider the request.

The U.S. Environmental Protection Agency has a 45-day review period, which will start concurrently with the 30-day public comment period, within which to object to the proposed permit. If the EPA has not objected in writing to the issuance of the permit within the 45-day review period, any person may petition the administrator of the EPA to review the permit. The 60-day public petition period will directly follow the EPA's 45-day review period. Interested parties may contact KDHE to determine if the EPA's 45-day review period has been waived.

Any such petition shall be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided for in this notice, unless the petitioner demonstrates that it was im-

practicable to raise such objections within such period, or unless the grounds for such objection arose after such period. Contact Patricia Scott, U.S. EPA, Region VII, Air Permitting and Compliance Branch, 901 N. 5th St., Kansas City, KS 66101, (913) 551-7312, to determine when the 45-day EPA review period ends and the 60-day petition period commences.
