Request for Comments

The Kansas Department of Health and Environment is soliciting comments regarding a proposed air quality construction permit. The U.S. Department of Homeland Security (DHS) has applied for an air quality construction permit in accordance with the provisions of K.A.R. 28-19-300 to construct and operate the National Bio and Agro-Defense Facility (NBAR) adjacent to Kansas State University in Manhattan. Emissions of particulate matter (PM), PM equal to or less than 10 micrometers in diameter (PM₁₀), volatile organic compounds (VOCs), oxides of nitrogen (NO_x), sulfur oxides (SO_x), carbon monoxide (CO) and hazardous air pollutants (HAPs) were evaluated during the permit review process.

The DHS proposes to own and operate a stationary source located at 1980 Denison Ave., Manhattan (adjacent to Kansas State University), at which will be a bio-safety level-3 (BSL-3) and BSL-4 research facility equipped with two (2) medical waste, three (3) chamber, controlled-air incinerators. In addition, a Central Utility Plant containing seven (7) boilers (each with maximum design heat-input rating of 33.475 Million British Thermal Units/Hour (MMBtu/hr)) and seven (7) emergency generator diesel engines is to be constructed and operated.

A public comment period has been established until noon January 18 to allow citizens the opportunity to express any concerns they may have about this proposed permitting action. All comments should be submitted in writing to Terry T. Tavener, KDHE, Bureau of Air, 1000 S.W. Jackson, Suite 310, Topeka, 66612-1366, or presented at the tentatively scheduled public hearing (see below).

Any member of the public may request a public hearing be conducted to receive comments on the proposed issuance of the draft air quality construction permit. Written requests to hold a public hearing should be sent to the attention of Sharon Burrell at the address listed above or by fax to (785) 291-3953 and must be received by noon January 18. If a request is received, a public hearing is tentatively scheduled by KDHE from 5 to 9 p.m. January 25 at the city auditorium located in the City Hall, 1101 Poyntz Ave., Manhattan. If no requests to hold the public hearing are received by noon January 18, the public hearing will be cancelled. A notice of the cancellation will be posted at the KDHE Web site at http://www.kdheks.gov/bar/public_notice.html.

A copy of the proposed permit, permit application, all supporting documentation and all information relied upon during the permit application review process is available for public review for a period of 30 days from the date of publication during normal business hours, 8 a.m. to 5 p.m., at the KDHE, Bureau of Air, 1000 S.W. Jackson, Suite 310, Topeka. Also, a copy of the proposed permit can be reviewed at the KDHE North Central District Office, 2501 Market Place, Suite D, Salina. To obtain or review the proposed permit and supporting documentation, contact Terry Tavener, (785) 296-1581, at the KDHE central office, and to review the proposed permit

only, contact the air quality district representative at (785) 827-9639 in the KDHE North Central District Office. The standard departmental cost will be assessed for any copies requested.

John W. Mitchell
Acting Secretary of Health
and Environment

Request for Comments

The Kansas Department of Health and Environment is soliciting comments regarding a proposed air quality operating permit. Krause Corporation has applied for a Class I operating permit renewal in accordance with the provisions of K.A.R. 28-19-510 et seq. The purpose of a Class I permit is to identify the sources and types of regulated air pollutants emitted from the facility; the emission limitations, standards and requirements applicable to each source; and the monitoring, record keeping and reporting requirements applicable to each source as of the effective date of permit issuance.

Krause Corporation, 305 S. Monroe, Hutchinson, 67501, owns and operates a farm machinery and equipment manufacturing facility located at the same address.

A copy of the proposed permit, permit application, all supporting documentation and all information relied upon during the permit application review process is available for a 30-day public review during normal business hours at the KDHE, Bureau of Air, 1000 S.W. Jackson, Suite 310, Topeka; and a copy of the proposed permit can be reviewed at the KDHE South Central District Office, 130 S. Market, Suite 6050, Wichita. To obtain or review the proposed permit and supporting documentation, contact Kristin R. Fritchman, (785) 368-6683, at the KDHE central office; and to review the proposed permit only, contact David Butler, (316) 337-6042, at the KDHE South Central District Office. The standard departmental cost will be assessed for any copies requested.

Direct written comments or questions regarding the proposed permit to Kristin R. Fritchman, KDHE, Bureau of Air, 1000 S.W. Jackson, Suite 310, Topeka, 66612-1366. In order to be considered in formulating a final permit decision, written comments must be received before the close of business January 18.

A person may request a public hearing be held on the proposed permit. The request for a public hearing shall be in writing and set forth the basis for the request. The written request must be submitted to Sharon Burrell, Bureau of Air, not later than the close of business January 18 in order for the Secretary of Health and Environment to consider the request.

The U.S. Environmental Protection Agency has a 45-day review period, which will start concurrently with the 30-day public comment period, within which to object to the proposed permit. If the EPA has not objected in writing to the issuance of the permit within the 45-day review period, any person may petition the administrator of the EPA to review the permit. The 60-day public petition period will directly follow the EPA's 45-day review period. Interested parties may contact KDHE to determine if the EPA's 45-day review period has been waived.

Any such petition shall be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided for in this notice, unless the petitioner demonstrates that it was im-
