Ladies and Gentlemen,

On September 28, 2012 at 2:30 pm, Elise Stucky-Gregg and Cory Zellers with Koch Nitrogen Company, LLC Dodge City (KNC) and Mostafa Kamal and Everett Spellman, KDHE Bureau of Waste, discussed the KNC RCRA Part B renewal application.

KNC requested allowance for submittal of the Part B permit renewal application with all sections completed and then at a later date submittal of an amendment to the section related to the corrective program and corrective action plans in order to update the application with new data expected to be received over the next several weeks. Based on the discussion, KNC intends to submit a complete renewal application and to subsequently amend the application's corrective program and corrective action plan sections no later than February 28, 2013. KNC agreed to include in the cover letter to the permit renewal application a description of the information that will be amended and the reason for the delay in providing the information along with the schedule when the information will be provided.

In the interim, the existing groundwater recovery and treatment system will continue to be operated as approved.

Thank you for your time and comments on September 28.

Elise Stucky-Gregg
Environmental Leader
