**Cc:** Johnson, Jeremy; Rohrman, Wray  
**Subject:** Hex chrome depth (4ft. vs. 10ft.)

Elise/Cory:

The EPA approved w/comments Koch's July 26, 2012 Phase II RFI Work Plan Addendum: Tier II Soil Sampling Plan in our letter of November 21, 2012. Koch submitted responses and revised pages dated December 7, 2012.

You mentioned in our phone call last Thursday, that there was a proposed change from EPA's approval with comments on the Project Manager comment #3.

In response to EPA Project Manager Comment #3, Koch proposed to change the sampling depth for Hex Chromium from four (4) foot to ten (10) foot and is aware that concentrations above applicable standards may require additional vertical delineation. After consideration of Koch's proposal, EPA is in agreement to extend the sampling depth for Hex Chromium from 4 foot to 10 foot and as further described in Koch's response to EPA Project Manager Comment #3.

If you have any questions about this or anything else, please let me know.

Thanks!
