Re: Recovered Groundwater Release From Recovery Well Header Near TW-39  
Koch Nitrogen Company, LLC Dodge City Nitrogen Plant, Dodge City, Ford County, KS  
EPA I.D. NO. KSD044625010  
Notification of Release Event

Ladies/Gentlemen:

Under its Hazardous Waste Management Permit (the Permit), Koch Nitrogen Company, LLC (KNC), the owner and operator of the Dodge City Nitrogen Plant located near Dodge City, Kansas, operates a groundwater collection and treatment system. This system collects groundwater from areas around the Plant and treats the groundwater to remove hexavalent chromium (Cr6) and other constituents of concern, which may be present in the groundwater as a result of historic operations at the Facility.

By this letter, KNC is notifying the U.S. Environmental Protection Agency (EPA) of a release of recovered groundwater to the soil from recovery well piping near TW-39. On June 11, 2013 KNC personnel discovered water flowing from the ground near recovery well TW-39. KNC immediately shut down the system and blocked in the nearest isolation valve. After the release was stopped, KNC excavated the soil around the buried piping, repaired the leak, and put the system back in service. Based on observations, approximately 1700 gallons of recovered groundwater were released to the soil.

Given the fact that the release consisted of unaltered groundwater and the groundwater was determined to be a nonhazardous waste, it is not clear whether the incident would constitute a release required to be reported under Part II, Section C.4 of the KNC Permit. This section requires written notification of any release of hazardous waste or hazardous constituents identified during the course of groundwater monitoring within fifteen days after discovery. Please consider this letter to constitute a Section C.4 notification in the event EPA determines that this incident is subject to this requirement.

By this letter, KNC is also notifying the Kansas Department of Health and Environment (KDHE) Bureau of Waste Management in writing of this event. Based on guidance previously received from the KDHE Bureau of Environmental Remediation, we understand the agency would not consider this incident to be a reportable release under the Kansas spill reporting law and regulations.

If you have any questions or require additional information regarding these matters, please contact Cory Zellers (620) 371-7914.

In accordance with Section B.2.b of the Permit and 40 CFR 270.11, I certify under penalty of law that this document and all attachments were prepared under my direction or supervision according to a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Sincerely,

KOCH NITROGEN COMPANY, LLC

Michael J. Sherbak II  
Plant Manager
