

2015 Kansas Behavioral Risk Factor Surveillance System Local Data

Ellis County

January 2017

2015 Kansas Behavioral Risk Factor Surveillance System Local Data

State of Kansas
Sam Brownback, Governor

Kansas Department of Health and Environment
Susan Mosier, MD, MBA, FACS, Secretary and State Health Officer

Report Preparation:
Pratik Pandya, MPH
Advanced Epidemiologist
Bureau of Health Promotion (BHP)

Report Supervision:
Ghazala Perveen, MBBS, PhD, MPH
Director of Science and Surveillance, Health Officer II
Bureau of Health Promotion (BHP)

Project Funding:
Partial funding for the 2015 Behavioral Risk Factor Survey was provided by cooperative agreement 6NU58DP006025-01-01 from the Centers for Disease Control and Prevention, Atlanta GA and by Kansas Health Foundation 200804006-01, Wichita, KS.

Table of Contents

Alcohol Consumption	
Binge Drinking	1
Arthritis	
Arthritis	3
Asthma	5
Cancer	
Skin Cancer	7
Cardiovascular Health	
High Blood Pressure	11
Cholesterol	
Not Checked Cholesterol within Five Years	13
High Blood Cholesterol Status.....	15
Chronic Obstructive Pulmonary Disease (COPD)	17
Depressive Disorder	19
Diabetes	21
Disability	
Disability	23
Exercise and Physical Activity	
Did Not Participate in the Recommended Level of Aerobic AND Strengthening Physical Activity.....	25
Not Participating in Any Physical Activity	27
Fruits and Vegetable Consumption	
Consuming Fruits Less than 1 Time Per Day	29
Consuming Vegetables Less than 1 Time Per Day.....	31
Health Care Access	
Lack of Health Care Coverage.....	33

Lack of Health Care Coverage 18 to 64 Years Old Only	35
No Personal Doctor	37
Did Not See Doctor Due to Cost.....	39
General Health	41
Healthy Days - Health Related Quality of Life	
Physical Health Status.....	43
Poor Physical or Mental Health is Barrier to Usual Activities.....	45
Immunization	
Not Immunized Against Influenza.....	47
Not Immunized Against Influenza 65 Years and Older Only	49
Never Had Pneumonia Vaccination 65 Years and Older Only	51
Seatbelt Use	53
Tobacco Use	
Current Smoker	55
Smokeless Tobacco Use	57
Male Smokeless Tobacco Use	59
Veteran Status	61
Weight Status (BMI Categories)	
Obese.....	63
Overweight or Obese	65
Technical Notes	67

Unpublished Tables - The following data tables are not published due to insufficient sample and/or statistically unreliable estimates for Ellis County: Heavy Drinking, Activity Limitation Due to Arthritis, Cancer (Excluding Skin Cancer), Heart Attack, Coronary Heart Disease, Stroke, Activity Limitation Due to Physical, Mental or Emotional Problems, Not Participating in the Recommended Level of Physical Activity (Aerobic AND/OR Strengthening), Mental Health Status, and Tried Quitting Smoking.

Percentage of Adults Who Are Binge Drinkers, 2015

Ellis County

Numerator: Respondents not participating in the recommended level of physical activity or participating in insufficient recommended level of physical activity for either aerobic or muscle strengthening guidelines.

Denominator: All respondents, excluding unknowns and refusals.

Not participating in the recommended level of physical activity referred to not participating in aerobic and strengthening exercises according to guidelines.

Participating in insufficient level of recommended physical activity referred to participating only in aerobic or only in strengthening exercises according to guidelines.

The aerobic guideline is defined as 150 minutes a week of moderate-intensity aerobic activity, or 75 minutes a week of vigorous-intensity aerobic activity, or an equivalent combination of moderate- and vigorous-intensity aerobic activity.

The strengthening guideline is defined as muscle-strengthening activities that involved all major muscle groups two or more times per week.

* Insufficient sample and/or statistically unreliable estimate

Italicized prevalence estimates have a margin of error >5 and should be interpreted with caution. Please refer to Technical Notes for more information.

Italicized prevalence estimates have a margin of error >5 and should be interpreted with caution. Please refer to Technical Notes for more information.

Technical Notes

The 2015 BRFSS data for your county/region on health risk indicators, analyzed by various subpopulation groups (e.g. gender, age group, ethnicity, etc.), are included in this report. The indicators are summarized in tables that show:

- Unweighted Frequency: the number of respondents who reported the risk behavior
- Weighted Percentage: the prevalence estimate for the risk behavior within a particular subpopulation group category
- Standard Error: used to compute the 95% confidence limits
- Lower and upper 95% confidence limits

Prevalence estimates vary in precision depending on sample size. One way of describing the precision of an estimate is the margin of error, which is the half-width of the confidence interval. When the sample size is large for a particular subpopulation group, the corresponding margin of error for an estimate is small. When the sample size is small for a particular subpopulation group, the corresponding margin of error for an estimate is large. Large margins of error (i.e. >5) indicate that an estimate may be less precise. Prevalence estimates that have a margin of error >5 are *italicized* in this report and should be interpreted with caution.

To determine whether two weighted percentages are significantly different from one another, the reader must compare the confidence intervals. Confidence intervals which do not overlap indicate a statistically significant difference between the two prevalence estimates while overlapping confidence intervals indicate that two estimates are not statistically different from one another. It is incorrect to say two estimates are different if their confidence limits overlap.

Estimates have been censored with an asterisk ("*") when the sample size was inadequate and/or when the estimates were statistically unreliable. Specifically, estimates were censored when any of the following conditions were met:

- the numerator of the indicator is less than 5
- the denominator of the indicator is less than 50
- the relative standard error (RSE) is 30 percent or higher

RSE is obtained by dividing the standard error of the estimate by the estimate itself, then multiplying that result by 100 to be expressed as a percent.

2011 BRFSS data represent a new baseline for public health surveillance. Due to changes in BRFSS survey methodology, the BRFSS estimates for 2011 and subsequent years cannot be compared to estimates from the years prior to 2011.

For more information on changes to the Kansas BRFSS survey methodology beginning in 2011, please visit: <http://www.kdheks.gov/brfss/newmethod.html>
