

2015 Kansas Behavioral Risk Factor Surveillance System Local Data

Harvey County

January 2017

2015 Kansas Behavioral Risk Factor Surveillance System Local Data

State of Kansas
Sam Brownback, Governor

Kansas Department of Health and Environment
Susan Mosier, MD, MBA, FACS, Secretary and State Health Officer

Report Preparation:
Pratik Pandya, MPH
Advanced Epidemiologist
Bureau of Health Promotion (BHP)

Report Supervision:
Ghazala Perveen, MBBS, PhD, MPH
Director of Science and Surveillance, Health Officer II
Bureau of Health Promotion (BHP)

Project Funding:
Partial funding for the 2015 Behavioral Risk Factor Survey was provided by cooperative agreement 6NU58DP006025-01-01 from the Centers for Disease Control and Prevention, Atlanta GA and by Kansas Health Foundation 200804006-01, Wichita, KS.

Table of Contents

Alcohol Consumption

Binge Drinking.....	1
---------------------	---

Arthritis

Arthritis	3
Activity Limitation Due to Arthritis	5

Asthma	7
---------------------	---

Cancer

Cancer (Excluding Skin Cancer)	9
Skin Cancer	11

Cardiovascular Health

Heart Attack	13
Coronary Heart Disease	15
High Blood Pressure	17

Cholesterol

Not Checked Cholesterol within Five Years	19
High Blood Cholesterol Status.....	21

Chronic Obstructive Pulmonary Disease (COPD)	23
---	----

Depressive Disorder	25
----------------------------------	----

Diabetes	27
-----------------------	----

Disability

Activity Limitation Due to Physical, Mental or Emotional Problems	29
Disability	31

Exercise and Physical Activity

Not Participating in the Recommended Level of Physical Activity (Aerobic AND/OR Strengthening)	33
Did Not Participate in the Recommended Level of Aerobic AND Strengthening Physical Activity.....	35
Not Participating in Any Physical Activity	37

Fruits and Vegetable Consumption

Consuming Fruits Less than 1 Time Per Day39
Consuming Vegetables Less than 1 Time Per Day.....41

Health Care Access

Lack of Health Care Coverage.....43
Lack of Health Care Coverage 18 to 64 Years Old Only45
No Personal Doctor47
Did Not See Doctor Due to Cost.....49

General Health51

Healthy Days - Health Related Quality of Life

Physical Health Status.....53
Mental Health Status55
Poor Physical or Mental Health is Barrier to Usual Activities.....57

Immunization

Not Immunized Against Influenza.....59
Not Immunized Against Influenza 65 Years and Older Only61

Seatbelt Use.....63

Tobacco Use

Current Smoker65
Male Smokeless Tobacco Use67

Veteran Status69

Weight Status (BMI Categories)

Obese.....71
Overweight or Obese73

Technical Notes.....75

Unpublished Tables - The following data tables are not published due to insufficient sample and/or statistically unreliable estimates for Harvey County: Heavy Drinking, Stroke, Never Had Pneumonia Vaccination 65 Years and Older Only, Tried Quitting Smoking and Smokeless Tobacco Use.

Percentage of Adults Who Are Binge Drinkers, 2015

Harvey County

Numerator: Respondents not participating in the recommended level of physical activity or participating in insufficient recommended level of physical activity for either aerobic or muscle strengthening guidelines.

Denominator: All respondents, excluding unknowns and refusals.

Not participating in the recommended level of physical activity referred to not participating in aerobic and strengthening exercises according to guidelines.

Participating in insufficient level of recommended physical activity referred to participating only in aerobic or only in strengthening exercises according to guidelines.

The aerobic guideline is defined as 150 minutes a week of moderate-intensity aerobic activity, or 75 minutes a week of vigorous-intensity aerobic activity, or an equivalent combination of moderate- and vigorous-intensity aerobic activity.

The strengthening guideline is defined as muscle-strengthening activities that involved all major muscle groups two or more times per week.

* Insufficient sample and/or statistically unreliable estimate

Italicized prevalence estimates have a margin of error >5 and should be interpreted with caution. Please refer to Technical Notes for more information.

Numerator: Respondents who did not participate in the recommended level of aerobic and strengthening exercises during the past month.

Denominator: All respondents, excluding unknowns and refusals.

The aerobic guideline is defined as 150 minutes a week of moderate-intensity aerobic activity, or 75 minutes a week of vigorous-intensity aerobic activity, or an equivalent combination of moderate- and vigorous-intensity aerobic activity.

The strengthening guideline is defined as muscle-strengthening activities that involved all major muscle groups two or more times per week.

* Insufficient sample and/or statistically unreliable estimate

Italicized prevalence estimates have a margin of error >5 and should be interpreted with caution. Please refer to Technical Notes for more information.

Denominator: All respondents, excluding unknowns and refusals.

* Insufficient sample and/or statistically unreliable estimate

Italicized prevalence estimates have a margin of error >5 and should be interpreted with caution. Please refer to Technical Notes for more information.

Technical Notes

The 2015 BRFSS data for your county/region on health risk indicators, analyzed by various subpopulation groups (e.g. gender, age group, ethnicity, etc.), are included in this report. The indicators are summarized in tables that show:

- Unweighted Frequency: the number of respondents who reported the risk behavior
- Weighted Percentage: the prevalence estimate for the risk behavior within a particular subpopulation group category
- Standard Error: used to compute the 95% confidence limits
- Lower and upper 95% confidence limits

Prevalence estimates vary in precision depending on sample size. One way of describing the precision of an estimate is the margin of error, which is the half-width of the confidence interval. When the sample size is large for a particular subpopulation group, the corresponding margin of error for an estimate is small. When the sample size is small for a particular subpopulation group, the corresponding margin of error for an estimate is large. Large margins of error (i.e. >5) indicate that an estimate may be less precise. Prevalence estimates that have a margin of error >5 are *italicized* in this report and should be interpreted with caution.

To determine whether two weighted percentages are significantly different from one another, the reader must compare the confidence intervals. Confidence intervals which do not overlap indicate a statistically significant difference between the two prevalence estimates while overlapping confidence intervals indicate that two estimates are not statistically different from one another. It is incorrect to say two estimates are different if their confidence limits overlap.

Estimates have been censored with an asterisk ("*") when the sample size was inadequate and/or when the estimates were statistically unreliable. Specifically, estimates were censored when any of the following conditions were met:

- the numerator of the indicator is less than 5
- the denominator of the indicator is less than 50
- the relative standard error (RSE) is 30 percent or higher

RSE is obtained by dividing the standard error of the estimate by the estimate itself, then multiplying that result by 100 to be expressed as a percent.

2011 BRFSS data represent a new baseline for public health surveillance. Due to changes in BRFSS survey methodology, the BRFSS estimates for 2011 and subsequent years cannot be compared to estimates from the years prior to 2011.
