Vaccination efforts by school and public health officials, immunization providers and parents are key to the success of protecting our children and communities from vaccine preventable disease. Thank you for your dedication.

Other vaccine recommendations are:

- Required for children attending child care facilities licensed by KDHE and early childhood programs licensed by the Kansas Department of Health and Environment (KDHE).

- Legal alternatives to school vaccination requirements are found at K.S.A. 72-6262. In addition to the immunizations required for children attending child care facilities licensed by KDHE and early childhood programs operated by schools, other vaccine recommendations are:

  - **Rotavirus**: Two or three doses are recommended for < 8 months of age; not required. Total doses needed for series completion is dependent on the type of vaccine administered and the age of the child when doses were given.

  - **Influenza**: Annual vaccination recommended for all ages ≥ 6 months of age. Number of doses is dependent on age and number of doses given in previous years.

Vaccination efforts by school and public health officials, immunization providers and parents are key to the success of protecting our children and communities from vaccine preventable disease. Thank you for your dedication.
