	<u>Page</u>
ABBREVIATIONS	xix
UNITS OF MEASUREMENT	xxiii
INTERNATIONAL SYSTEM MULTIPLICATION FACTORS, PREFIXES AND SYMBOLS	xxv
CHAPTER I INTRODUCTION	I-1
A. History and Present Situation	I-1
B. Statutory Authority and Charge	I-1
C. Purpose and Intent	I-2
D. Organization and Use	I-2
E. Law and Regulations	I-3
F. Other Resources	I-3
CHAPTER II REPORTS, PLANS AND SPECIFICATIONS	II-1
A. Procedures for Water Supply Project Approval	II-1
1. Approval Steps	II-1
a. Preliminary Report Preparation (Task 1)	II-1
b. Engineer's Report Preparation and Submission (Task 2)	II-1
c. Design Conference (Task 3)	II-1
d. Plans, Specifications and Permit Application Submission (Task 4)	II-1
e. Initiation of Construction (Task 5)	II-4
f. Notification, Inspection, and Approval (Task 6)	II-4
2. Scope of Review	II-4
3. Deviations/Modifications to KDHE Standard Approval Procedure	II-4
a. Water Main Extensions	II-4
b. Minor Additions/Modifications to Processes	II-4
c. New Wells	II-5
B. Documentation Requirements for Water Supply Project Approval	II-5
1. Preliminary and Engineer's Reports	II-5
2. Plans and Specifications (General)	II-5
a. Plans and General Requirements	II-6
b. Plans and Project Design Requirements	II-6
c. Specifications	II-7

TABLE OF CONTENTS (Continued)

	<u>Page</u>
3. Documentation Requirements for New Wells	II-8
a. Location Details	II-8
b. Well Details	II-8
c. Water Line Details	II-8
d. Documentation of Absence of Pollution Sources	II-8
e. Water Sampling	II-9
4. Water Sampling Requirements for New Sources (Surface Waters and Wells)	II-9
5. Documentation Requirements for Treatment Plant Modifications	II-9
CHAPTER III GENERAL FACILITIES CONSIDERATIONS	III-1
A. General Design Guidelines and Standards	III-1
1. Alternative Solutions and Regionalization	III-1
2. Service Needs	III-1
3. Design Periods	III-1
4. Conservation	III-2
5. New Processes, Methods, Chemicals, and Equipment	III-2
6. Waste Handling and Disposal	III-2
7. Costs and Financing	III-3
8. Security	III-3
B. Plant Siting Considerations	III-3
1. Evaluation of Alternative Sites	III-3
2. Plant Siting Restrictions	III-4
3. PWSSs and Pollution Sources	III-4
4. Site Survey	III-4
5. Source Water Assessment	III-5
C. Plant Layout and other Considerations	III-5
1. Plant and Building Layout	III-5
2. Materials of Construction	III-5
3. Ventilation and Dehumidification	III-6
4. Operation and Maintenance	III-6
5. Automation	III-6
6. Monitoring, Sampling, and Laboratory Requirements	III-6
7. Emergency Plan	III-7
8. Safety	III-7

TABLE OF CONTENTS (Continued)

	<u>Page</u>
9. Contamination of Source, Partially Treated or Finished Waters	III-7
10. Disinfection	III-7
11. Hydraulics	III-7
12. Piping and Channels	III-7
CHAPTER IV SOURCE DEVELOPMENT	IV-1
A. Quantity Requirements	IV-1
1. Flowing Sources	IV-1
2. Impoundments	IV-2
3. Wells	IV-2
B. Quality Requirements	IV-2
C. Surface Water – Resource Facilities and Other Requirements	IV-2
1. Flowing Sources	IV-2
a. Streams and Rivers	IV-2
b. Springs	IV-3
2. Impoundments	IV-4
a. Site Selection	IV-4
b. Raw Water Characteristics	IV-4
c. Permits	IV-4
d. Lake Use	IV-4
3. Single Purpose Lakes	IV-4
4. Multipurpose Lakes	IV-6
5. Intake Structures	IV-6
6. Off-Channel Reservoirs	IV-8
D. Groundwater – Resource Facilities and Other Requirements	IV-8
1. Sanitary Surveys	IV-8
2. Location and Protection of Wells	IV-9
3. Construction Criteria for Wells	IV-11
a. Contractor Licensing	IV-11
b. Drilling Fluids, Additives, Packers	IV-11
c. Temporary Sealing Requirements	IV-12
d. Well Casing	IV-12
e. Well Screen	IV-13
f. Gravel Pack	IV-14

TABLE OF CONTENTS (Continued)

	<u>Page</u>
g. Grouting of Annular Space Between the Casing and Drill Hole	IV-15
h. Plumbness and Alignment Requirements	IV-17
i. Development	IV-17
j. Well Capacity Tests	IV-18
k. Disinfection	IV-18
l. Abandoned Wells and Test Holes	IV-19
m. Horizontal Collector Wells	IV-19
n. Reconstructed Wells and Related Appurtenances	IV-20
4. Construction Criteria for Well Houses, Discharge Piping, and Related Appurtenances	IV-21
a. General Well House Requirements	IV-21
b. Well House Floor	IV-21
c. Floor Drain	IV-22
d. Casing Seal and Discharge Piping	IV-22
e. Well Vent	IV-23
f. Water Level Measurement	IV-23
g. Valves and Other Appurtenances	IV-24
5. Construction Criteria for Pitless Units and Related Appurtenances	IV-26
a. Approval Criteria	IV-26
b. Limitations on Field Welding	IV-26
c. Concrete Slab	IV-26
d. Appurtenances	IV-27
CHAPTER V DESIGN OF WATER TREATMENT PROCESSES	V-1
A. Introduction	V-1
B. Overview of Design Requirements for Meeting the Primary Drinking Water Regulations	V-2
1. General Requirements	V-2
2. VOC Removal	V-2
3. Fluoride Control	V-2
4. Filtration and Disinfection for Pathogen Removal and Inactivation	V-3
5. Corrosion Control for Lead and Copper	V-4
6. IOC and SOC Removal	V-4
7. Radionuclide Removal	V-6
8. DBP Control and Precursor Removal	V-6

TABLE OF CONTENTS (Continued)

	<u>Page</u>
C. Design Requirements for Optional Treatment Processes	V-7
1. Introduction	V-7
2. Softening	V-7
3. Iron and Manganese Removal	V-8
4. Hydrogen Sulfide Removal	V-8
D. General Design Considerations	V-8
1. General Criteria	V-8
a. Degree of Treatment Provided	V-8
b. Minimum Number of Units	V-9
c. Piping	V-9
d. Flow Rate and Flow Regime	V-9
e. Chemical Addition	V-9
f. Hydraulic	V-9
g. Process Control	V-9
h. Monitoring	V-9
i. Climate and Weather	V-9
j. Training and Safety	V-9
k. Adjustable Features and Future Needs	V-10
2. Permit Application	V-10
3. Remaining Chapter Organization	V-10
E. Presedimentation	V-10
1. Basin Design	V-10
2. Chemical Addition	V-10
3. Presedimentation Criteria	V-11
a. Detention Time	V-11
b. Overflow Rate	V-11
c. Water Depth	V-11
d. Weir Rate	V-11
e. Drain Lines	V-11
f. Bypass	V-11
F. Rapid Mixing and Coagulation	V-11
1. Requirement	V-11
2. Location	V-12
3. Rapid Mix Criteria	V-12

TABLE OF CONTENTS (Continued)

	<u>Page</u>
4. Mechanical Mixers – Metal Salt Coagulation (For Systems Not Practicing Lime Softening)	V-12
a. Detention Time	V-12
b. Velocity Gradient (G Value)	V-12
5. pH Criteria	V-12
6. Mixing Requirements for Lime Softening	V-13
7. Recycle Streams	V-13
G. Flocculation	V-13
1. Requirement	V-13
2. Exception	V-13
3. Basin Design	V-14
4. Detention Time	V-14
5. Equipment	V-15
6. Piping	V-15
H. Sedimentation	V-16
1. General Requirements	V-16
a. Basin Design	V-16
b. Inclined Settlers	V-16
c. Detention Time	V-16
d. Inlets	V-16
e. Outlet and Overflow Devices	V-16
f. Drainage	V-17
g. Solids Collection	V-17
h. Solids Removal	V-17
i. Solids Disposal	V-17
j. Cross Connections	V-17
2. Conventional Basin Criteria	V-18
a. Minimum Detention Times	V-18
b. Overflow Rate	V-18
c. Basin Dimensions	V-19
d. Inclined Settlers	V-19
3. Solids Contact Basin Criteria	V-19
a. Installation and Start-Up of Equipment	V-19
b. Operation of the Equipment	V-19
c. Chemical Feed	V-20
d. Mixing	V-20
e. Mixing Volume	V-20
f. Detention Time	V-20

TABLE OF CONTENTS (Continued)

	<u>Page</u>
g. Overflow Rates	V-21
h. Solids Concentrators	V-21
i. Water Losses	V-21
j. Outlets	V-21
I. Dissolved Air Flotation	V-22
J. Filtration	V-22
1. Pretreatment and Number	V-24
a. Pretreatment	V-24
b. Number	V-24
2. Structural and Hydraulic Details	V-24
a. Filter Box Depth	V-24
b. Minimum Water Depth	V-24
c. Maximum Water Velocity	V-24
d. Walkways	V-24
e. Other Considerations	V-24
f. Appurtenances	V-25
3. Flow Control	V-26
4. Underdrains	V-26
5. Filter Media	V-26
a. Quality	V-26
b. Criteria for Common Bed Types	V-26
c. Filter Media Placement	V-28
6. Underdrains and Support Gravel	V-29
7. Rate of Filtration	V-29
a. New Filter Systems	V-29
b. Existing Filter Systems	V-29
c. Higher Filtration Rates	V-30
d. Polymer Usage	V-30
8. Backwash	V-30
9. Backwash Rate and Duration	V-31
10. Backwash Equipment	V-31
11. Surface Wash or Subsurface Wash	V-31
12. Air Scouring	V-32
13. Rapid Rate Pressure Filters	V-34
a. General	V-34
b. Rate of Filtration	V-34
c. Details of Design	V-34
14. Bag and Cartridge Filters	V-35
15. Biologically Active Filters	V-38

TABLE OF CONTENTS (Continued)

	<u>Page</u>
K. Softening	V-38
1. General Considerations	V-38
2. Related Criteria	V-38
3. Lime Softening	V-39
4. Caustic Soda Softening	V-40
5. Cation Exchange	V-41
a. Design	V-41
b. Bypass	V-41
c. Underdrains and Supporting Gravel	V-42
d. Cross-Connection Control	V-42
e. Sampling Taps	V-42
f. Brine Distribution	V-42
g. Brine Pump or Educator	V-42
h. Salt and Brine Storage Tanks	V-42
i. Salt and Brine Storage Capacity	V-43
j. Waste disposal	V-43
k. Construction Materials	V-43
l. Housing	V-43
L. Stabilization	V-43
1. The CaCO ₃ Saturation Index (SI)	V-44
2. Stabilization of Softened Water	V-44
3. Corrosion Control for Lead and Copper	V-45
4. Chemical Addition	V-45
5. Carbon Dioxide Removal By Aeration	V-46
6. Instability Due To Biochemical Action In the Distribution System	V-46
7. Operational Control of Stability	V-46
M. Disinfection	V-46
1. CT Requirements	V-47
2. Groundwater (Excluding GWUI)	V-49
3. Surface Water and GWUI	V-49
a. Predisinfection and Preoxidation	V-50
b. Primary Disinfection	V-50
c. Supplemental Disinfection	V-51
4. Chlorine Residuals and Use of Chloramines	V-51
5. Chlorine Dioxide	V-52
a. Generators	V-52

TABLE OF CONTENTS (Continued)

	<u>Page</u>
b. Other Design Requirements	V-52
c. Public Notification	V-53
6. Ozonation	V-53
a. Air Feed System	V-54
b. High Purity Oxygen Feed	V-56
c. Ozone Generator	V-58
d. Ozone Contactors	V-59
e. Ozone Destruct Unit	V-63
f. Control of Residual Ozone and Hydrogen Peroxide	V-64
g. Piping Materials	V-65
h. Joints and Connections	V-65
i. Instrumentation	V-65
j. Alarms	V-66
k. Safety	V-67
l. Construction Considerations	V-68
7. Ultraviolet (UV) Disinfection	V-68
a. Water Quality and Pretreatment Requirements	V-69
b. Design Considerations and Requirements	V-71
c. Reactor Validation	V-78
N. Taste and Odor Control	V-82
1. Requirement	V-82
2. Chlorine and Chlorine Dioxide	V-82
3. Hydrogen Sulfide Removal	V-82
a. Oxidation Using Free Chlorine	V-82
b. Oxidation Using Other Oxidants	V-83
c. Aeration and Stripping	V-83
d. Filtration	V-84
e. Bench and Pilot Studies	V-84
4. Powdered Activated Carbon (PAC)	V-84
a. Point of Addition	V-84
b. Rate of Application	V-85
c. Method of Application	V-85
5. Granular Activated Carbon (GAC)	V-86
6. Potassium Permanganate	V-86
7. Ozone	V-86
8. Taste and Odor Arising in the Distribution System	V-86
9. Other Methods	V-86

TABLE OF CONTENTS (Continued)

	<u>Page</u>
O. Iron and Manganese Removal	V-86
1. Removal by Oxidation, Detention, and Filtration	V-87
a. Description of Removal Process	V-87
b. Detention Time	V-87
c. Dosage Considerations	V-88
d. Sedimentation Basins	V-88
e. Filtration	V-89
2. Removal by Manganese Coated Media Filtration	V-89
3. Stabilization by Sequestration	V-90
a. Polyphosphates	V-91
b. Sodium Silicates	V-91
4. Removal by Ion Exchange	V-92
5. Removal by Line-Soda Ash Softening	V-92
6. Sampling Taps and Testing Equipment	V-92
P. Aeration and Air Stripping	V-92
1. Methods	V-93
2. Protection	V-93
3. Disinfection	V-93
4. Stabilization	V-93
5. Design Criteria	V-93
a. Natural Draft and Forced or Induced Draft Multi-Tray Aeration Systems	V-93
b. Pressure Aeration	V-95
c. Air Stripping	V-96
d. Bypass	V-99
e. Sampling Taps, Testing Equipment and Monitoring	V-99
Q. Adsorption with GAC	V-100
1. Design Basis	V-100
2. Contactor Type and Number	V-101
3. Media Requirements	V-101
4. Materials of Construction	V-102
5. Competitive Adsorption	V-102
6. Water Stability	V-102
7. Disinfection and Biological Activity	V-102
8. Backwashing	V-102
9. Regeneration of Spent GAC	V-103
10. Radon	V-103

TABLE OF CONTENTS (Continued)

	<u>Page</u>
11. Safety	V-103
R. Removal of Trace Inorganic Contaminants and Radionuclides	V-103
1. General Requirements	V-103
2. Ion Exchange, Adsorption on Activated Alumina, and Other Adsorptive Processes	V-104
3. Electrodialysis (ED) and Electrodialysis Reversal (EDR)	V-107
S. Membrane Processes	V-108
1. Raw Water Quality	V-110
2. Membrane Type, Configuration, Number and Arrangement	V-111
3. Process Operating Conditions	V-111
4. Process Performance	V-111
5. Pretreatment Requirements	V-113
6. Post-Treatment Requirements	V-113
7. Bypass Water	V-114
8. Cross-Connection Control	V-114
9. Membrane Cleaning	V-114
10. Integrity Testing	V-114
11. Useful Life of Membranes	V-115
12. Waste Volume, Composition, and Disposal	V-115
13. Instrumentation and Control	V-115
14. Operator Training and Start-Up	V-116
T. Fluoridation	V-116
1. Requirements	V-116
2. Application Principles and Criteria	V-117
CHAPTER VI WATER STORAGE TANKS	VI-1
A. Primary Design Considerations	VI-1
1. Type of Storage	VI-1
2. Location	VI-1
3. Materials	VI-2
4. Foundation	VI-2
5. Sizing	VI-2
a. Backwash Water Supply Storage	VI-2
b. Clearwell	VI-2

TABLE OF CONTENTS (Continued)

	<u>Page</u>
c. Distribution Storage	VI-3
d. Pressure Tanks	VI-3
e. Pressurized Systems	VI-4
6. Roof and Sidewall	VI-4
7. Overflow	VI-5
8. Vents	VI-5
9. Level Controls	VI-5
B. Other Considerations	VI-6
1. Access	VI-6
2. Basins and Wet Wells	VI-6
3. Drain	VI-6
4. Fire Protection	VI-6
5. Freezing	VI-6
6. Grading	VI-6
7. Internal Catwalk	VI-6
8. Painting and/or Cathodic Protection	VI-6
9. Safety	VI-7
10. Security	VI-7
11. Silt Protection	VI-7
12. Disinfection	VI-7
a. Re-chlorination	VI-7
b. Maintenances and Repair	VI-7
13. Pressure Tanks	VI-8
14. Water Circulation	VI-8
15. Maintenance/Inspection	VI-8
CHAPTER VII PUMPING FACILITIES	VII-1
A. General Requirements	VII-1
B. Pumping Stations	VII-1
1. Location	VII-1
2. Facilities	VII-1
3. Space Requirements	VII-2
4. Equipment Servicing	VII-2
5. Sanitary and Other Conveniences	VII-2
6. Stairways and Ladders	VII-2
7. Heating	VII-2
8. Ventilation	VII-2

TABLE OF CONTENTS (Continued)

	<u>Page</u>
9. Dehumidification	VII-2
10. Lighting	VII-2
11. Suction Wells	VII-2
C. Pumps	VII-3
1. Types	VII-3
2. Selection Criteria	VII-3
a. Capacity	VII-3
b. Characteristic Curves	VII-3
c. Efficiency	VII-3
d. Speed	VII-3
3. Number of Pumps	VII-3
4. Desirable Operating Conditions	VII-3
5. Pump Suction and Priming	VII-4
6. Drives	VII-4
7. Power Requirements	VII-4
8. Well Pump Selection and Installation	VII-4
9. Booster or High Services Pumps	VII-4
D. Appurtenances	VII-5
1. Valves	VII-5
2. Piping	VII-5
3. Gauges and Meters	VII-6
4. Water Seals	VII-6
5. Controls	VII-6
6. Automatic and Remote Controlled Stations	VII-6
7. Standby Power	VII-6
8. Water Prelubrication	VII-6
CHAPTER VIII DISTRIBUTION SYSTEMS	VIII-1
A. Basic considerations	VIII-1
1. Quantity and Pressure	VIII-1
2. Quality	VIII-2
3. General Pipeline Location	VIII-2

TABLE OF CONTENTS (Continued)

	<u>Page</u>
B. Protection Considerations	VIII-3
1. Separation of Water Mains and Sewers	VIII-3
a. Gravity Sanitary Sewers	VIII-3
b. Sewer Connections	VIII-4
c. Pressure Sewer Lines	VIII-4
d. Sewer Manholes	VIII-4
e. Storm Sewers	VIII-4
f. Drains	VIII-5
2. Separation of Water Mains and Other Pollution Sources	VIII-5
3. Cross Connections	VIII-5
4. Line Crossings	VIII-6
a. Surface Water Crossings	VIII-6
b. Railroad Crossings and Mains Near Tracks	VIII-7
c. Mechanical Encasement	VIII-7
5. Pressure	VIII-7
6. Dead Ends	VIII-7
7. Repairs, Replacements, and Extensions of Mains	VIII-7
8. Frost	VIII-7
9. Plastic Pipe	VIII-8
10. Pressure and Leakage Tests	VIII-8
11. Thrust Blocks	VIII-8
12. Valves	VIII-8
13. Sanitary Precautions	VIII-8
14. Disinfection	VIII-8
15. Deposits and Corrosion	VIII-9
16. Plumbing	VIII-9
C. Materials and Installation	VIII-9
1. Used Pipe	VIII-9
2. Joint Materials	VIII-9
3. Air Relief Valves, Combined Air/Vacuum Relief Valves, and Blow-off Chambers	VIII-9
4. Fire Hydrants	VIII-10
5. Installation of Mains	VIII-10
D. System Design	VIII-11
1. Field Studies	VIII-11
2. Computer Modeling	VIII-11
3. Valve Spacing	VIII-11

TABLE OF CONTENTS (Continued)

	<u>Page</u>
4. Valve Sizing	VIII-12
5. Valve Location	VIII-12
6. Metering	VIII-12
7. Water Loading Stations	VIII-13
CHAPTER IX CHEMICAL STORAGE, HANDLING AND APPLICATION	IX-1
A. Basic Considerations	IX-1
1. Plans and Specifications	IX-1
2. Chemical Application	IX-1
3. Feed Equipment	IX-2
a. Numbers of Feeders	IX-2
b. Design and Capacity	IX-2
c. Location	IX-3
d. Feed Lines	IX-4
e. Controls	IX-4
f. Solution Tanks	IX-5
g. Day Tanks	IX-6
h. Service Supply Water	IX-6
4. Chemicals	IX-7
a. Quality	IX-7
b. Shipping Containers	IX-8
c. Protective Measures	IX-8
d. Storage	IX-8
e. Handling	IX-9
f. Housing	IX-10
g. Operator Safety	IX-10
h. Hazardous Material Handling and Spills	IX-11
B. Chlorine Gas Requirements	IX-11
1. Chlorinator Specifications	IX-11
2. Chlorine Cylinders and Containers	IX-13
3. Chlorinator Piping	IX-14
a. Cross-Connection Protection	IX-14
b. Piping	IX-14
c. Connecting Lines	IX-14
d. Color Coding	IX-14
e. Materials for Chlorine Solutions	IX-14
f. Thermal Expansion	IX-14
g. Automatic Switch-over	IX-15

TABLE OF CONTENTS (Continued)

	<u>Page</u>
h. Withdrawal Rates	IX-15
4. Testing Equipment	IX-15
5. Respiratory Protection Equipment	IX-15
6. Chlorine Gas Feed and Storage Room Specifications	IX-16
7. Leak Detection, Repair and Recovery	IX-17
 C. Other Chemicals	 IX-18
1. Hypochlorites	IX-18
a. Stability	IX-18
b. Containers	IX-19
c. Materials	IX-19
d. Dangerous Reactions	IX-20
e. Personal Protection	IX-20
f. Gas Release	IX-20
g. Feeders	IX-20
2. Acids and Caustics	IX-20
3. Sodium Chlorite for Chlorine Dioxide Generations	IX-20
a. Storage	IX-21
b. Handling	IX-21
c. Feeders	IX-22
4. Ammonia	IX-22
5. Lime Slurry	IX-25
6. Powdered Activated Carbon	IX-25
7. Polyphosphates	IX-26
8. Polymers	IX-26
9. Activated Alumina	IX-26
