

# HIV in Kansas

Annual Report for January 1 – December 31, 2017

**STI/HIV Surveillance Program  
STI/HIV Section  
Bureau of Disease Control and Prevention  
Kansas Department of Health and Environment**

Sources of information for this report:  
Kansas HIV Surveillance System (eHARS)

For further information please contact the STI/HIV Surveillance Program at 785-296-6174  
or email [HIV\\_Request@kdheks.gov](mailto:HIV_Request@kdheks.gov)

To see previous annual and bi-annual reports go to [http://kdheks.gov/sti\\_hiv](http://kdheks.gov/sti_hiv)

Disclaimer: There may be differences from previously reported data due to data cleaning efforts.

*The STI/HIV Section works to stop the spread of STIs & HIV in Kansas*

## Notes:

- Incident Cases: Individuals with HIV or Stage 3 (previously defined as AIDS) who are newly diagnosed in Kansas between January 1– December 31, 2017.
- Prevalent Cases: Individuals with HIV or Stage 3 (previously defined as AIDS) who are presumed to be alive as of December 31, 2017.
- Data is presented as person-based rather than case-based, i.e. those categorized as AIDS are not included in the HIV incidence or prevalence count. They are exclusively present in the Stage 3 incidence or prevalence count.

Disclaimer: The purpose of this publication is to illustrate health conditions in the State of Kansas. This product may be corrected or updated as necessary without prior notification. The included map product is provided without representation or implied or expressed warranty of accuracy for any uses beyond those expressed. The originating agencies are not responsible for publication or use of this product for purposes other than those expressed. Except for the limited purposes allowed in K.S.A. 21-3914, knowingly selling, giving, or receiving any list of names, addresses or maps contained in or derived from public records is a crime.

## HIV Continuum of Care –December 31, 2017

The Continuum of Care (also referred to as the HIV Treatment Cascade) outlines the three major milestones achieved through HIV medical care: engagement in care, retention in care, and viral suppression. This model enables the STI/HIV Section to monitor trends, measure successes, and identify gaps in HIV medical care.

Newly Diagnosed and Linked to HIV Medical Care Within 90 Days as of December 31, 2017			Retained in HIV Medical Care as of December 31, 2017		Virally Suppressed as of December 31, 2017

### Linked to Care

# Number of People Living with HIV by County for the State of Kansas as of December 31, 2017

**Total: 3,062**

This map reflects the number of persons living in Kansas who have been diagnosed with HIV. Last reported address was utilized to determine residency. If the last reported county variable was unknown, that individual will not be reflected in this map.
