Laura Kelly, Governor

June 22, 2020

Dear Storage Tank Consultants:

Based on statewide COVID-19 data and workplace precautions implemented by the public and private sectors, the KDHE Storage Tank Section has determined that it is time to resume normal operations with respect program deliverables, deadlines and associated penalties.

The Storage Tank Section is slowly bringing more staff back into the office as conditions in Shawnee County (and surrounding counties) appear stable. Some KDHE staff will still be working remotely, however. Beginning July 6, 2020, hard copies **and** electronic reports in .pdf format should be submitted to the appropriate KDHE Project Manager. **The date the hard copy is received will be the report received date.** If your document is too large to email, please mail in the hard copy as you normally would. KDHE staff are now receiving mail on a regular basis.

Again, please keep in mind this is for work in the Storage Tank Section only; check with other programs as needed for direction regarding reporting, etc. Additional guidance concerning the Storage Tank Program will be provided by KDHE as necessary as the COVID-19 pandemic evolves.

Sincerely,

Storage Tank Section Staff
